This dual-language text provides theory and methodology for teaching reading in Spanish to Spanish/English bilingual or Spanish-dominant students. The goal is to help educators teach these students the skills necessary to become proficient readers and, thus, successful in the school system. At the very core of the book are the hispano-parlantes--the Spanish-speaking children--who bring to the schools, along with their native language and cultures, a wealth of resources that must be tapped and to whom all educators have a responsibility to respond. True to the concepts of developing bilingual educators to serve bilingual students, the text presents chapters in English and Spanish. Each chapter is written in only one language at the preference of the author. Thus, to be successful with this book, the reader must be bilingual. Themes emphasized in the text include current reading methodologies, the concept of reading as developmental literacy skills, reading in the content areas, new views of the development of proficiency in the second language, issues related to students with special learning needs, assessment, and the uses of technology in the delivery of instruction. Never losing sight of its goal--to teach reading in Spanish to bilingual or Spanish-dominant students--the book includes a series of focusing questions and follow-up activities; these are not simply translations of existing activities, strategies, and techniques intended for monolingual English students, but specifically designed to be appropriate for Spanish-speaking students. Directed to university preservice and in-service instructors of reading and bilingual education as well as administrators and district- and school-level staff developers who work with Hispanic populations, the book is sensitive at all times to nuances of the languages and cultures of the intended audiences.

After failing to learn a new language on five separate occasions, I taught myself to speak Spanish like a native in just six months by watching movies and TV shows, listening to music, and reading books and comics like Harry Potter and Garfield. This simple, easy-to-learn technique, that even the most linguistically-challenged can master literally overnight, is used by many of the most respected and skilled polyglots and language teachers in the world, and it's never really been laid out, explained, and demonstrated in full, point-by-point, step-by-step detail until now. When characters in a movie or TV show are speaking the dialogue, unless it's set in a previous period like the 1800s or something, they speak normal, everyday language. So if you wanted to learn Spanish, the type of normal everyday Spanish that native speakers use every day, aka "conversational Spanish"... Don't you think that Spanish-language TV shows, movies, music, and books might be a good source to learn from...if only you knew how? Not only that, but it would be fun, wouldn't it? Far better than learning the language from some boring, dry textbook or workbook that, even worse, is teaching outdated, formal, "non-conversational" Spanish (look at the dialogue in one sometime: do people actually talk like that? No). The basic technique is obvious: consume popular Spanish-language media and try to learn what they're saying by looking up what you don't understand. Sure. But the issue is twofold: 1) The problems you will inevitably run into (how do I apply what I've learned? how do I ensure I'm not misunderstanding the meaning and thereby learning something incorrect? where do I look things up? what if it's not in the dictionary and Google Translate isn't cutting it? etc.), and... 2) How do we do things as efficiently as possible? If you're a beginner you're going to have to sort out how to do this all on your own, how to solve any problems you might run into on your own, while probably doing many things less effectively and slower than is necessary. I've already learned all this stuff the hard way, I've made many of the mistakes you would if you went this alone, let me just save you a ton of time, trouble, and possibly money by teaching you what I already know from experience. Has this basic technique been used for centuries by language students and teachers alike? Yes, there are records dating back to the 18th century of language teachers using popular media in the language they're teaching to help their students learn it. I'm not claiming to have invented it. What

I've done here is, after having used and refined the technique myself for several years, distilled it down to a system that's easy to learn, and which is taught in a format that's organized, easy to understand, and which takes advantage of all the latest technology, such as the all the various resources available on the internet now.
