In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

"My worst fear wasn't of dying, it was of living. Living, while everyone around me had their flesh savagely torn from their bodies, to be shoved into the festering and ever-hungry mouths of zombies." Contagious (The Contagium Series Book One) "I wasn't afraid of death. If I died, it would be over. It terrified me, right down to my very core, to be alive while the rest of the world was dead." During the Second Great Depression, twenty-four year old Orissa Penwell is forced to drop out of college when she is no longer able to pay for classes. Unable to find a job, she moves in with her aunt in Indianapolis. Down on her luck, Orissa doesn't think she can sink any lower. She couldn't be more wrong. A virus breaks out across the country, leaving those that are infected crazed, aggressive and very hungry. Orissa is used to only being responsible for herself. When she finds herself a reluctant leader of a group of survivors, she must make a choice—set aside her issues and help the others--or go off alone in search of her own family and friends. Deathly Contagious (The Contagium Series Book Two) Orissa Penwell will do anything in the zombie-plagued world to keep her friends safe. After the discovery of a zombie-proof safe house, she thinks things may actually work out and they can get through the apocalypse together. The compound offers more than just shelter. It gives her and her friends a sense of community and purpose. It gives them a reason to keep living in the dead world. But her chance at happiness is shattered when someone she recently let into her life—and her heart—is killed. Hell-bent on revenge, Orissa will do whatever it takes to seek vengeance and get even...without caring what the risk is for herself. Things quickly go from bad to worse and she finds herself lost and abandoned—and forced to face the zombie-plagued world on her own. When lies, secrets, and desperation are added to the already harrowing world, Orissa discovers that zombies aren't the only things to worry about. What—or who—will justice cost her? And just how far will Orissa go to avenge someone she loves?

They linger in our thoughts, in our hearts, and in the decisions we make. A soul crusher or a dream maker, depending on the perspective. My person is MISTER BLACK. I didn't know him by that name when I first met him. I didn't know him at all, but the impression he left behind was just as powerful as the name I call him today. When our secrets converge in a passionate encounter, stepping out of the shadows just might be worth the risk. Note: This is a NEW ADULT contemporary mystery/thriller romance meant for readers 18+

Why has an economy that has done so many things right failed to grow fast? Under-Rewarded Efforts traces Mexico's disappointing growth to flawed microeconomic policies that have suppressed productivity growth and nullified the expected benefits of the country's reform efforts. Fast growth will not occur doing more of the same or focusing on issues that may be key bottlenecks to productivity growth elsewhere, but not in Mexico. It will only result from inclusive institutions that effectively protect workers against risks, redistribute towards those in need, and simultaneously align entrepreneurs' and workers' incentives to raise productivity.

Focusing on the essential information you need to know for the clinical practice of oncology, this practical volume in the Lippincott Manual series provides concise, high-yield content that reflects today's fast-changing advances in the field. In one convenient, portable resource, you'll find complete coverage of cancer management, all at your fingertips for quick review and reference. The Washington Manual® of Oncology, 4th Edition, is an ideal reference for oncologists, residents, fellows, medical students, nurse practitioners, and physician assistants.

This book offers a widely interdisciplinary approach to investigating important questions surrounding the cognitive foundations of group attitudes and social interaction. The volume tackles issues such as the relationship between individual and group attitudes, the cognitive bases of group identity and group identification and the link between emotions and individual attitudes. This volume delves into the links between individual attitudes (such as beliefs, goals and intentions) and how they are reflected in shared attitudes where common belief, collective acceptance, joint intentions, and group preferences come into play. It pursues answers to the connections between trust and beliefs, goals and intentions and attempts to investigate questions such as: does trust have an affective component and how it may relate to hope and fear? The volume also scrutinizes game theory and questions whether it can satisfactorily explain and model social interaction and if there may be any concepts which are not addressed by the current theory. Contributors are derived from disciplines including philosophy, economics, psychology, logic and computer science. Interdisciplinary in scope and comprehensive detail, this volume integrates a variety of approaches – philosophical, psychological and artificial intelligence – to strategic, normative and emotional aspects of social interaction.
