Timely and topical, this book

Five years into World Trade Organization membership, how is China's system of people-management adapting to the changing world? This edited book provides an up-to-date, state-of-the-art overview of current theory and practice of human resource management, 'with Chinese characteristics'. The latter is a phrase used to refer to the specific cultural, institutional and social setting in which such management structures and processes are to be found in the 'Middle Kingdom'. As the People's Republic of China becomes inexorably linked to the international economy and increasingly faces the challenges of globalization, its enterprises and their managers have to adapt to pressures to conform to external human resources and employment norms, whilst at

the same time conforming to internal labour laws and socio-political demands. The tension between these two sets of factors provides an arena in which human resource managers, as well as workers, have to cope, perform and survive. The papers included in this collection are all based on empirical on-site research by specialists in the field. They deal with such HRM-related topics as expatriates, family demands, human capital, joint ventures, labour disputes, organizational commitment, psychological contracts, social networks, work behaviour and the like. Sound HRM practices matter—they are a sine qua non of effective governance in

democratic government—equally so at the local, regional, state and national levels of government. The NASPAA (Network of Schools of Public Policy, Affairs, and Administration) accreditation standards demand critical competencies for public managers that are vital to human resource managers and supervisors at all levels. These competencies include: skills to lead and manage in public governance; to participate in and contribute to the policy process; to analyze, synthesize, think critically, solve problems and make decisions; to articulate and apply a public service perspective; and to communicate and interact productively with a diverse and changing workforce and citizenry. This second edition of Human Resource Management is designed specifically with these competencies in mind to: Introduce and explore the fundamental purposes of human resource management in the public service and consider the techniques used to accomplish these purposes Provide exercises to give students practice for their skills after being introduced to the theory, foundation, and practices of public and nonprofit sector HRM Facilitate instruction of the material by introducing important topics and issues with readings drawn from the professional literature Provide information and examples demonstrating the interrelatedness of many of the topics in public sector HRM and the trends shaping public and nonprofit management, especially diversity, ethics, and technology. Demonstrate and

describe differences among HRM practices in public, for-profit and nonprofit organizations, and between the levels of government. Human Resource Management is organized to provide a thorough discussion of the subject matter with extensive references to relevant literature and useful teaching tools. Thus, students will consider the issues, purposes, and techniques of HRM and conceptualize how varied their roles are, or will be, whether a personnel specialist in a centralized system or a supervisor managing in one of the increasingly common decentralized systems. Each chapter includes a thorough review of the principles and practices of HRM (including the why and the how), selected readings, important themes, diverse examples, key terms, study questions, applied exercises, case studies, and examples of forms and processes would-be managers will encounter in their roles.
