Tristan inherited Hoxne Grange, a way station for spirits. Wolf Kincaid was hired by Tristan's family to prove the Grange isn't haunted. Based on the successful Baby Owner's Manual, The Baby Owner's Maintenance Log presents a refreshing alternative to traditional sugar-sweet baby journals. Hip parents can record all major milestones and measurements in these pages, including the arrival of the unit, fuel preferences and speech activation. Spiral binding, hilarious illustrations and a bound-in envelope for keepsakes make this guided journal a great shower gift.

With interest in beadweaving on the rise, Mastering Peyote Stitch provides a much-needed look into the most integral technique--peyote stitch. With 15 styles in all, beading geniuses will finally have an accessible, easy-to-understand guide to one of the fundamentals of beadweaving, brought to you courtesy of Beadwork Editor Melinda Barta. In the "Peyote Basics" chapter, you will learn the basics of creating flat peyote bands, then advance to circular and tubular variations, eventually learning to fashion dimensional jewelry pieces. Once you've mastered the basics, Melinda dives into designing dimensional jewelry pieces. Additional chapters cover combining peyote with other popular beadweaving techniques (right-angle weave, herringbone, and bead embroidery) and creating unique edgings and embellishments for finished pieces. Melinda, together with Beadwork's Designers of the Year, including Jean Campbell, Lisa Kan, Carole Ohl, Melanie Potter, Jean Power, Cynthia Rutledge, and Sherry Serafini, demonstrates a range of styles in 15 beautiful jewelry projects.

Foundations of Geometry, Second Edition is written to help enrich the education of all mathematics majors and facilitate a smooth transition into more advanced mathematics courses. The text also implements the latest national standards and recommendations regarding geometry for the preparation of high school mathematics teachers--and encourages students to make connections between their college courses and classes they will later teach. This text's coverage begins with Euclid's Elements, lays out a system of axioms for geometry, and then moves on to neutral geometry, Euclidian and hyperbolic geometries from an axiomatic point of view, and then non-Euclidean geometry. Good proof-writing skills are emphasized, along with a historical development of geometry. The Second Edition streamlines and reorganizes material in order to reach coverage of neutral geometry as early as possible, adds more exercises throughout, and facilitates use of the open-source software Geogebra. This text is ideal for an undergraduate course in axiomatic geometry for future high school geometry teachers, or for any student who has not yet encountered upper-level math, such as real analysis or abstract algebra. It assumes calculus and linear algebra as prerequisites.

Empress Zira of Eri Dachi has spent the last two years preparing to reclaim her homeland. She has gathered many capable allies and built an impressive army. She balances politics and military affairs, turning down many suitors and looking for any advantage she can get, while not losing sight of herself of what must be done. Now, she declares war on the Kingdom of Polema, which destroyed her homeland. And she will not wage this war alone. Grand Master Albert Lugot has been freed from his curse and has spent his time gathering a crop of capable Porters to himself. Now, those new Porters make their first Oaths as part of the Order. And their first mission? To aid the Empress in her quest and to bring honor back to their name. This book shares an exciting adventure that reminds readers that the path forward is never easy and is frequently filled with unexpected challenges. Zira and the Grand Master need to find a way to overcome a madman, The Prince of Polema, as he stands before them and blocks their path. This same man led to the fall of the Empire twenty years ago, and now he seeks to finish the job, by "conquering" the daughter of the woman he killed. To actively seek another's death is not the way of the Porters - and yet, the Grand Master refuses to back down. He throws away the Code he has spent most of his life protecting and enters the fray himself, offering up his very soul for a shot at ending the nightmare that has plagued him for twenty years.

Water Management Challenges in Global Change contains the proceedings of the 9th Computing and Control for the Water Industry (CCWI2007) and the Sustainable Urban Water Management (SUWM2007) conferences. The rationale behind these conferences is to improve the management of urban water systems through the development of computerbased methods. Issues such as economic globalisation, climate changes and water shortages call for a new approach to water systems management, which addresses the relevant technical, social and economic aspects. This collection represents the views of academic and industrial experts from a number of countries, who provide technical solutions to current water management problems and present a vision for addressing the global questions. The themes underlying many of the contributions include energy and material savings, water savings and the integration of different aspects of water management. The papers are grouped into three themes covering water distribution systems, sustainable urban water management and modelling of wastewater treatment plants. The water distribution topics cover asset and information management, planning, monitoring and control, hydraulic modelling of steady state and transients, water quality and treatment, demand and leakage management, optimisation, design and decision support systems, as well as reliability and security of water distribution systems. The sustainable urban water management topics include urban drainage systems, water reuse, social aspects of water management and also selected facets of water

resources and irrigation. Computer control of wastewater treatment plants has been seen as less advanced than that of clean water systems. To address this imbalance, this book presents a number of modelling techniques developed specifically for these plants. Water Management Challenges in Global Change will prove to be invaluable to water and environmental engineering researchers and academics; managers, engineers and planners; and postgraduate students.

It's Christmastime in Hillside, but holiday spirit is in short supply for busy flower shop owner Quincy McKay. She's in charge of the town festival and her shop's open house, but her Santa's a no-show and her flower cooler is on the fritz. To make matters worse, she's learned her ex-husband isn't as ex as she'd thought. Just when she thought things couldn't get any worse, her boyfriend, hot cop Alex Cooper announces his parents are coming to town. Alex is the perfect man in Quincy's book, unfortunately his mother thinks he's perfect too. And no woman is perfect enough for her perfect son, especially not the weird flower shop girl who works too much, can't cook and who she catches kissing another man in the department store. And what's this she heard about Quincy being married? Eleanor Cooper must help her son dodge a bullet (and not the kind from his job) during the romantic holiday season to prevent him from being ensnared in a regrettable relationship. Quincy's dignity (of which lately she's in short supply), her reputation, and every business in town are riding upon the success of the city's Christmas celebration. If she can figure out a way to make it work despite failing equipment, helpers as flaky as the falling snow, and a troubling and inappropriate Secret Santa, she might win the respect of everyone in the town, but more importantly, Alex's parents. If Alex can survive his loving but meddling mother until Christmas, and keep Quincy safe from her crazy ex-husband, with a little help from the MLM (Mormon Ladies Mafia), and K.C. the she-Santa, he'll arrange for the perfect holiday for himself and the woman who has captured his heart.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several

architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

This lavishly illustrated book examines Berlin in depth during a period of explosive growth between the two world wars. Between 1871 and 1919, the population of Berlin quadrupled, and the city became the political center of Germany, as well as the turbulent crossroads of the modern age. This was reflected in the work of artists, directors, writers, and critics of the time. As an imperial capital, Berlin was the site of violent political revolution and radical aesthetic innovation. After the German defeat in World War I, artists employed collage to challenge traditional concepts of art. Berlin Dadaists reflected upon the horrors of war, and the terrors of revolution and civil war. Between 1924 and 1929 as the spirit of modernity took hold, jazz, posters, magazines, advertisements, and cinema played a central role in the development of Berlin's urban experience. The concept of the "Neue Frau"--the modern, emancipated woman--helped move the city in a new direction. Finally, Berlin became a stage for political confrontation between the left and the right and was deeply affected by the economic crisis and mass unemployment at the end of the 1920s. This book explores in numerous essays and illustrations the artistic, cultural, and social upheavals in Berlin between 1918 and 1933, and

places them in a broader historical framework.
