Seminar paper from the year 2019 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, Pforzheim University, language: English, abstract: This essay deals with the importance and interests of different stakeholders and tries to identify how they affect the success of a business. Firstly, the essay will compare the shareholder and stakeholder theory and afterwards, the importance of employees, customers, creditors, suppliers and social stakeholders will be discussed. Further, this essay illustrates the drivers and changes of trust in a company. It is often assumed that shareholders are the most important stakeholder group in any business. However, there are two main competing theories that argue how a company should be run: the shareholder approach and the stakeholder approach. On the one hand, the shareholder approach claims for profit maximisation of the shareholder as the only objective of business. On the other hand, the stakeholder approach suggests satisfying the interest of various stakeholders. In practice, shareholder models have dominated in the past. However, corporate scandals and the financial crisis have raised doubts about that model and led to a loss of trust.

Pharmacognosy is a term derived from the Greek words for drug (pharmakon) and knowledge (gnosis). It is a field of study within Chemistry focused on natural products isolated from different sources and their biological activities. Research on natural products began more than a hundred years ago and has continued up to now with a plethora of research groups discovering new ideas and novel active constituents. This book compiles the latest research in the field and will be of interest to scientists, researchers, and students.

This volume advances the debate on the past, present and future of international business and management research. A truly international group of experts present their perspectives, and ask the question 'What is it that we know?' when discussing major issues and concepts in the field. This annual collection includes a regular special feature on a leading scholar; exploring in this volume the work of Jean-François Hennart and his theories on multinational enterprise and strategic management. Part two addresses international business and international management issues from a philosophical perspective, examining key topics such as post-merger integration, dominant design theory, internalizing firms and the strategy-performance relationship. Written by experienced IB teachers and workshop leaders, this fully updated edition offers unrivalled coverage of the new 2014 syllabus. With the most comprehensive coverage of all the SL and HL topics, a special focus on concept-based learning helps you fully embed this new requirement - all the essential concepts are integrated at every stage, including change, culture and globalization. The only DP Business and Management text developed with the IB, rigorous exam support gives unrivalled insight into IB assessment and drives high achievement. Thoroughly matched to the IB philosophy and encouraging a truly outward-looking approach, case studies and TOK connections ensure a firm understanding of today's increasingly international business environment. -The most comprehensive coverage of the new 2014 syllabus, written by experienced IB teachers and workshop leaders -Completely overhauled to comprehensively build the in-depth subject knowledge learners need for success -Fully embed the new concept-b

The International Baccalaureate® (IB) was founded in Geneva, Switzerland in 1968 as a non-profit educational foundation that endeavored to develop inquiring, knowledgeable and caring

young people who would go on to create a better and more peaceful world through intercultural understanding and respect. What began as a single program for internationally mobile students preparing for college, has grown into a series of programs for students up to age 19. Barron's is pleased to offer a brand new review guide for the IB Biology exam. The content of the exam is compiled from the newly revised IB Biology course syllabus. This review book focuses specifically on the syllabus material to ensure that students are fully prepared and includes: An overview of the tests/papers, including an explanation of scoring, command terms, and optional topics based on the brand new 2014 syllabus Connections to the Nature of Science (NOS) theme that runs throughout the syllabus Study tips and strategies for maximizing scores A section on mathematical calculation and statistical analysis review 2 full-length paper 1, 2, and 3 practice exams with fully explained answers The book is formatted to prepare students for either the one-year SL (standard level) or the two-year HL (higher level) biology exam. The 2013 IB HL Economics syllabus change introduced Paper 3, an essentially calculations-based assessment. This development challenged teachers and students alike, as few Paper 3 practice resources have been available. This is furthermore an area of the syllabus where, as in Mathematics, practice is fundamentally important in developing the skills and confidence for needed for success. Paul Hoang's latest publication therefore represents an invaluable resource in helping students to prepare for the examination challenges they face. For many candidates the mix of words, theory and numbers in Paper 3 questions can be overwhelming, if they have not developed easy familiarity throughout their course. With clear layout and content that beautifully mirrors IB examination questions, this resource is the one we have all been waiting for. I absolutely recommend it as a 'must have' for all those who are preparing for the HL Economics examination. It is a core resource invaluable to students and teachers alike. Janet Barrow, IB Economics Teacher, OSC Teacher, IB Examiner, author of IB Business Management and TOK teacher resources 20160615

Examines the topic of managing multinationals in a knowledge economy. This book concludes that, despite all the technological advances in cross-border communication and coordination, social capital and human resources are the most critical factors possessed by multinationals.
