How many diets have you been on? And how many times did you take weight off and put it back on? Dieting has more than a 90% failure rate. So, why try another diet? This book is jam packed with information about the futility of dieting, and guides you to a more holistic way of relating to yourself, food, and physical activity. In this book you will learn: The 7 reasons why diets set you up to fail The 3 core strategies to escape chronic dieting The 7 dimensions of whole living The 3 practices for optimal health The book also raises questions about the theory of emotional eating and warns of an increase in eating disorders as the war on obesity escalates. While reading this book you will have many ah-ha moments that will bring you inner peace, self-confidence and free you from the perils of dieting.

Do you want to lose fat? Build muscle? Feel better? Look younger? Optimize your health? Perform better? Now you can. You don't have to resort to infomercial style gimmicks and gadgets. This book will help you achieve your objectives. It provides the 'source code' to building diet and supplement plans for you (or your clients) no matter your (or their) level of experience. It is interactive: enabling you to follow the path through the book that is most applicable. This book is not meant to be read once, cover-to-cover, and then either committed to memory in some fashion or forgotten about. It's designed to be a tool - a resource - that is used interactively on an ongoing basis. Here is a sampling of FAQs from Chapter 9: Q: Are the recommendations in this book specifically applicable to a gender or age group? A: The short answer is "no." This book is written to be applicable to any healthy adult. Most of it will also apply to teenagers, though the energy expenditure estimations in Chapter 1 may need to be adjusted upward for teens and young adults (folks who are 13-20 years old). For kids younger than 13 - in fact, anyone younger than 18 - these individuals should work with their parent(s)/guardian(s) and their doctor or medical/health care practitioner on applying the principles from this book. Q: Since you're a vegan, why do you allow for the consumption of animal products in this book? A: I wrote this book for a wide audience. I don't like 'preaching to the choir' as the saying goes. Yes, if you're already eating vegan or plant-based you will benefit from reading this book. But I also want this book to be useful by those following other ways of eating: vegetarians, pescatarians, omnivores, those with allergies and intolerances, etc. I like to meet people where they are - not where I think they should be or others think they should be. I also don't view the movement from the typical western diet to a vegan or plant-based diet as having to be transformational - that is, a giant leap - it can be incremental. Some people will take baby steps, and that is okay. Some people will take no steps at all and choose to eat as much animal product as they can while following my plans. That's the choice of each individual to make, though I hope most move in the direction of plant-based and vegan eating - even if only by an inch or two. Of

course, I would love it if everyone on earth stopped consuming animal products, but each individual needs to make this choice freely. Q: Why don't you emphasize exercise for fat loss? A: If your diet and sleep habits are off, then fat-burning exercise is not going to help you very much. There is a saying out there that is quite true: "you can't out-exercise a bad diet." This is true calorically speaking, since you can eat and drink a 1,000 calories very easily at a restaurant without even thinking about it, but would have to push yourself pretty hard to burn 1,000 calories during exercise (and you'd also find yourself pretty darn hungry shortly thereafter and likely to binge). But it's also true hormonally speaking: you can't out-exercise a hormonal s\*\*t-storm (pardon my French!). If your diet and sleeping habits are off, you will only make a bad situation worse by piling on exercise. As just one example, cortisol, the so-called stress hormone, is elevated by exercise, lack of sleep, caffeine, stress, and other factors. If you have cortisol levels that are continuously elevated you'll have a heck of a time losing fat; you'll also be putting your overall health at risk. (By the way, this doesn't mean you shouldn't exercise. It just means you shouldn't view exercise as the magic bullet for fat loss. Exercise has many other benefits. Also, more is not better: you want to exercise the right amount based on your needs, capabilities, and objectives.)

You've seen Susan Powter on her phenomenally successful "Stop the Insanity" infomercial, on the Home show, and on The Susan Powter Show, bringing her message of health, hope and wellness to millions. Now in this runaway bestseller she gives women everywhere the step-by-step motivation to take control of their lives. What is insanity? -A multimillion-dollar diet industry that fails to help women lose weight permanently -A fitness industry that excludes the unfit -Women hating the way they look and feel After her divorce, Susan Powter fell into a "fat come" that left her fat, unfit, and depressed. At more than 240 pounds, she courageously turned to the "experts"—the diet and fitness industries—for help. But she found, as millions of other have, that starvation and deprivation don't work, and that the diet and fitness industries work against women, setting them up for failure, ruining their health, taking their money, and giving them temporary, short-term answers. Then on her own Susan Powter discovered how to eat, breath, and move, to lose weight permanently and regain her health, strength, and sanity.

After accidentally killing everyone in her class, Alice Wonder is now a patient in the Radcliffe Lunatic Asylum. No one doubts her insanity. Only a hookah-smoking professor believes otherwise; that he can prove her sanity by decoding Lewis Carroll's paintings, photographs, and find Wonderland's real whereabouts. Professor Caterpillar persuades the asylum that Alice can save lives and catch the wonderland monsters now reincarnated in modern day criminals. In order to do so, Alice leads a double life: an Oxford university student by day, a mad girl in an asylum by night. The line between sanity and insanity thins when she meets Jack Diamond, an arrogant college student who believes that nonsense is an actual science.

**ABOUT THE BOOK** If you are interested in increasing your speed then it is safe to assume that you are already working out or training for something, so congratulations to you. If you haven't started on the path to wellness, then let this guide be an inspiration; I will show you how you can increase your speed through optimized efforts. We are creatures of progress. We've evolved over eons by constantly striving to do better. Progress begets progress by motivating us complete more milestones, reach our goals, and set our sights on bigger and better things. If your goal is to run a faster marathon, complete a triathlon before your legs give out, or cross the finish line of a Tough Mudder with people younger than you (rather than with people twice your age), you've come to the right place. **MEET THE AUTHOR** In 2006, Ari was diagnosed with Crohn's disease. Crohn's is an incurable disease of the digestive tract. Ari's case was severe, and required over a dozen daily medications and several hospital visits. After reaching a personal low point in hospital, Ari decided he would do everything in his power to strengthen his by then weak body. Through a combination of yoga, nutrition, natural supplements and rigorous exercise (Triathlon and Crossfit) he was able to fight back the symptoms of Crohn's until he was finally able to suspend his medication. Eventually Ari was declared free of all traces of the 'incurable' disease, and competed in Ironman France in June of 2011. Ari has since spoken at seminars and at a regional TED Talk about his struggle against a seemingly insurmountable opponent. Through the process of data collection, self tracking, and analysis, Ari helped develop Less Doing. This was a way of dealing with the daily stresses of life by optimizing, automating, and outsourcing all of his tasks in life and business. Now he focuses on Achievement Architecture, helping individuals be more effective at everything.

**EXCERPT FROM THE BOOK** There are no hard rules when it comes to doing a Fartlek, but a great example is running. You can simply go out for a nice jog and every so often throw in an all-out sprint for a short period of time. If you are running in a city, jog for 5 blocks, then sprint for 1, and then return to a jogging pace. This also applies to sports like hockey, where you are moving around waiting to attack the puck, and even race car driving where you get to "relax" on the straightaways and then you need to pool all of your resources to make sure you get through that hair pin turn unscathed. Fartleks offer a unique opportunity for your cardiovascular system to learn to recover during activity. If your body gets tricked into thinking that 6 minute mile pace is rest simply because you aren't sprinting at a 4 minute mile pace, you start to set the bar higher and higher and as soon as you come off that sprint, even though you are still moving, your heart rate and respiration rate will start to decline. There's also a fascinating evolutionary component to this kind of training. Researchers believe that Persistence Hunting was the first form of hunting accomplished by human beings. Before we had weapons, it was possible for humans to catch their prey through running and determination. Buy a copy to keep reading!

The legendary Bruce Lee was one of the most influential martial artists of the 20th Century. But Lee's physical abilities were only the tip of the iceberg. Besides being one of the world's top martial artists and cinematic superstar, Bruce Lee was also a philosopher and one of the original champions of self-help and human achievement. As Lee evolved his revolutionary, "non-restrictive" approach to martial art training and combat, he simultaneously evolved a unique, non-restrictive philosophy toward life and living. Built around the same fundamental principles he applied to his martial art, the central theme of this philosophy is "personal liberation" -- liberation of body, mind, and spirit through greater self-knowledge. Here, for the first time, are the fundamental tenets of Lee's philosophy of self-actualization and personal liberation taken out of the martial arts arena and put into the arena of daily living. A groundbreaking guide, *LIBERATE YOURSELF* doesn't offer you a set, rigid, one-size-fits-all philosophy, but rather a fluid set of operating principles you can use to cultivate a flexible, highly adaptable attitude toward living life to its fullest, develop the skills and confidence required to free yourself from the chains of limitation, whether of physical or psychological origin, and raise your living to the level of an art form. *LIBERATE YOURSELF* can help you: - Become more at ease with yourself and the world around you - Take charge of your attitude and fully realize your innate potential in all aspects of your life - Adapt to and deal effectively with whatever situation you find yourself in - Break down barriers and overcome obstacles that keep you from achieving your goals and enjoying success

Tapping is an activity that many of us engage in everyday without even thinking about what we are doing. We drum our fingers on a desk or table while we wait for something to happen. We tap our forehead while we are figuring out a problem. We stroke our chin or rub our head as we contemplate the issues of the day. Each of these acts is our body's clumsy way of attending to a need for peace or resolution. Tapping prayer is a spiritual practice that intentionally focuses our attention on the rhythmic movement of our finger tips. It directs the energy of God's healing onto specific points on our body that through the practice of acupuncture and reiki, have shown to be conduits of healing. Tapping prayer is the most exciting addition to my spiritual tool belt in 25 years of ministry. It's fun and effective and easy to administer alone, one on one, or in a group. It is very flexible...and did I mention, effective? Tapping prayer is effective in bringing individuals into a one on one relationship with God that creates peace, healing, and a desire to share those gifts with other individuals, communities, and Creation. Tapping prayer is an integration of sacred wisdom from the East and West. It is a spiritual practice that blends a knowledge of the Spirit's movement through our body with an understanding of meridian

tapping based on the Emotional Freedom Technique created by Gary Craig. Tapping prayer brings balance and peace to individuals who are experiencing spiritual distress. By gently tapping on identified points of entry for the Holy which correspond to meridian end points in acupuncture, while praying for God to attend to a particular pain, we focus God's intention to heal and in most cases actually experience a peace which is not of our own doing. By acknowledging pain instead of wishing for relief, we recognize God's interest to heal us and indeed, God heals us. This technique can be used for individuals who are seeking peace from a wide variety of issues ranging from: trauma such as a car accident, an abusive parent, a friend killed in battle, a sudden illness, a job loss, a fire, a damaged relationship. Tapping prayer can also facilitate forgiveness and/or letting go. Tapping prayer is effective in praying for others (surrogate prayer tapping focused on an individual who is not present to the prayer tapping), for events (9/11, Sandy Hook, a company leaving a community), or Creation (an oil spill, deforestation, strip mining). Wherever there is a disruption to the peaceful flow of the Holy Spirit, tapping prayer can be applied. When I first learned about the Emotional Freedom Technique as a tool to help veterans in our community, I thought it was weird. The tapping. The repetition. It seemed...odd. This was not how I understood healing from trauma to work, and yet it worked. Clearly, my Western roots were showing. When I got home from the training I began using the technique with members of my community and saw such dramatic results I had to learn more. They also found it strange, but effective. Some folks were uncomfortable with the language of "energies" and "chi," so I experimented a bit and added more traditional faith language to the mix. I dug deeply into my own faith traditions and discovered a theology of healing that accompanied tapping prayer. I found that by invoking God's presence into the act of tapping, people from varying faith experiences were able to connect to the Holy on a deeper level. They began to experience God as very real and very present in their lives. They asked to learn more about this new way of praying. They discovered that by using tapping prayer on a wide variety of issues, their relationship with God grew deeper. If you are ready to draw closer to God's healing love for you, please take responsibility for your participation in tapping prayer, and let's pray! --Todd Farnsworth
