From the award-winning author of *The Boy Detective Fails*: A novel of two brothers growing up on the other side of the tracks. "A trailer park in the Plains town of Tenderloin is the setting of this crusty coming-of-age debut, which features some of the liveliest characters just this side of believable that one is apt to meet in a contemporary novel. The first-person narrator is a moral but susceptible eleven-year-old called Dough, who lusts after his fifth-grade teacher and idolizes his trouble-making older brother, Pill-Bug. The boys, who are new to the town and shamed by the stigma of living in a trailer, were named by a father who wanted them to remain tough and who ended up dying while smuggling cigarettes along a Texas highway. Their mother and her new boyfriend, French, are low-life swingers, allowing the siblings to spend nights with Val, who entertains a slew of men but whom Dough worships as a virginal Madonna. Dough's own adoring friend is Lottie, a slightly deranged girl who offers Dough a gift of one of her taxidermist father's specimens; meanwhile, Pill-Bug earns a special affection from Lunna, a high school floozy. Each character is vividly described . . . Meno's passionate new voice makes him a writer to watch." —Publishers Weekly

Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars. is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage trucks and transit buses, by as much 35 percent in the same time frame.

New, fully revised and edited edition. Jasper Tudor, born in secrecy in 1431, rose to become one of the key supporters of King Henry VI during the difficult period of English history known as the Wars of the Roses. Devoted to the Lancastrian cause and to his nephew Henry Tudor, Jasper's loyalty led him through a life full of adventure. When he was just six years old, Jasper's life was changed dramatically by the death of his mother, the dowager queen Katherine de Valois, and the arrest of his father Owen Tudor soon afterwards. Jasper and his older brother Edmund were called to court and by 1452 they became the first Welshmen to be elevated to the English peerage. Sadly, Edmund died in captivity in 1456, leaving Jasper to protect his brother's child, the future king Henry VII. Jasper's dedication to the Lancastrian cause took him through many of the well-known battles of the Wars of the Roses, including the historic victory at Bosworth. It is clear that Henry VII owed an enormous part of his success in claiming the throne in 1485 to his uncle, who was his closest adviser, confidante and mentor. In this detailed biography, Debra Bayani clearly shows that Jasper Tudor was a key figure in the tumultuous history of England, detailing his life from his birth in 1431 to his death in 1495.
