This hands-on, practical guide for ESL/EFL teachers and teacher educators outlines, for those who are new to doing action research, what it is and how it works.

Straightforward and reader friendly, it introduces the concepts and offers a step-by-step guide to going through an action research process, including illustrations drawn widely from international contexts.

Specifically, the text addresses: action research and how it differs from other forms of research the steps involved in developing an action research project ways of developing a research focus methods of data collection approaches to data analysis making sense of action research for further classroom action. Each chapter includes a variety of pedagogical activities: Pre-Reading questions ask readers to consider what they already know about the topic Reflection Points invite readers to think about/discuss what they have read action points ask readers to carry out action-research tasks based on what they have read Classroom Voices illustrate aspects of action research from teachers internationally

Summary Points provide a synopsis of the main points in the chapter Bringing the 'how-to' and the 'what' together, Doing Action Research in English Language Teaching is the perfect text for BATESOL and MATESOL courses in which action research is the focus or a required component.

There are currently an estimated 2 billion English learners in the world. In many countries, schools now require English classes. However, after years of studying English, students still have difficulty speaking English. When speaking, proper grammar can be useless if speaking is not clear and understood by the listener. It is time to try something different because the current methods are not effectively working. Learning English grammar rules is not enough, and it is impossible to memorize every English conversation. Situations will be different, and making unique conversations is necessary in the real world.

The emergence of globalisation is bringing massive changes to all aspects of life, including language. In an effort to raise awareness on the effects of globalisation on language learning and teaching, the Applied Linguistics Association of Australia (ALAA) devoted its 31st Annual Congress to this theme. This volume represents a collection of papers by academics in Australia, South-East Asia, New Zealand, Europe and North America, which synthesize language learning and teaching theories and current research to present the views of applied linguists and language educators on a variety of issues with regards to the tensions that globalisation and internationalisation bring on language

and languages. A total of twenty-two articles discuss issues related to the status of the ELT profession in a globalised world, issues of ESL teaching and language assessment, the ever increasing use of ICTs for foreign language learning, and the effects of globalisation on minority languages. This collection of articles attempts to integrate theoretical issues, research findings, and practical applications on different aspects of TESOL to provide academics, researchers, students and language educators with a discussion of the current state of affairs in the field of applied linguistics with regards to globalisation.

How do you gain knowledge? Is it from watching videos, reading books or articles from internet? Is it from your family, friends, teachers, professors? Is from your own feelings? There are many ways of collecting and obtaining knowledge and as human living in the era of 4.0 nowadays, myriad knowledge sources are viral in every place, in every time. However, how do you know the knowledge, how do you come into a conclusion after deepening your doubt and curiosity?

Since the first edition of this established text was published in 1988, action research has gained ground as a popular method amongst educational researchers, and in particular for practising teachers doing higher-level courses. In this new edition Jean McNiff provides updates on methodological discussions and includes new sections of case study material and information on supporting action research. The book raises issues about how action research is theorised, whether it is seen as a spectator discipline or as a real life practice,

and how practitioners position themselves within the debate. It discusses the importance for educators of understanding their own work and showing how their educative influence can lead to the development of good orders in formal and informal learning settings and in the wider community. This second edition comes at a time when, after years of debate over what counts as action research, it is now considered an acceptable and useful part of mainstream research practice.

Student engagement relies on the students and their willingness to participate in the learning process and can be enhanced through the application of various technologies within learning environments. However, strategies for implementing these technologies need research and development to be implemented effectively. The Handbook of Research on Fostering Student Engagement With Instructional Technology in Higher Education is a comprehensive academic publication that focuses on the engagement of learners with academics in higher education and especially how this engagement can be fostered with the integration of new technologies. Featuring an array of topics such as gamification, digital literacy, and social networking, this book is ideal for instructors, educators, administrators, curriculum developers, instructional designers, IT consultants, educational software developers, researchers, academicians, and students.

Teachers working in junior and senior high schools in Japan often find it difficult to access action research applicable to their teaching context. There is no shortage of quality research at the university level in Japan, but

comparatively little at the secondary level. In this, the first edited volume from Accents Asia, we have attempted to bridge this gap, and in the process show that not only are teachers producing stellar research, they are also challenging pre-conceived notions about what it means to teach and learn in what many deem to be an academically ridged education system. In this volume, teacher-researchers explore a range of topics including: Learner Autonomy, Global Issues, Student Motivation and Anxiety, Curriculum Development, Self-Access Language Learning.

A Student Workbook for Public Speaking: Speak from the Heart asks students to think critically about the speech-making process while building their mastery of the fundamental practical skills of public speaking through a series of exercises and activities. Nineteen brief chapters cover the essentials of public speaking including selecting a topic, researching your topic, organizing your topic, overcoming speech anxiety, and delivering informative, persuasive, and special occasion speeches. Each chapter includes a concise introduction to the most important skills and concepts related to each chapter topic, and offers opportunities for critical reflection on how to use each aspect of public speaking appropriately and effectively. Each chapter is paired with an activity, checklist, or worksheet that students may use to develop their speeches, assess their performance, and chart their progress in becoming competent public speakers.

relevant disciplines, as well as their own extensive experience in teaching spoken English, the authors give a fascinating, comprehensive, and insightful account of the nature of second language speaking skills. The research and theory they survey then serves as the basis for the principles, strategies, and procedures they propose for the teaching of spoken English. This book will, therefore, provide an invaluable resource for teachers, teachers in training, and researchers, providing both a state-of-the-art survey of the field as well as a source of practical ideas for those involved in planning, teaching, and evaluating courses and materials for the teaching of spoken English"--

Comprehensive textbook on phonetics, with examples from over 500 languages.

How do learners learn to speak a foreign language? What different approaches have been developed to teach this important skill? Speaking deals with both these questions, providing clear explanations of recent research and developments in methodology. In the final section the author suggests practical ways in which teachers can gain a better understanding of the role of oral classroom activities.

Speaking is a central yet complex area of language acquisition. The assessment of this crucial skill is equally complex because of its interactive nature. This book takes teachers and language testers through the research on the assessment of speaking as well as through current tests of speaking. The book then guides language testers through the stages of test tasks, rating practices and design. Literacy histories, even those seeking to incorporate greater diversity in race and gender, have tended to focus on academic institutions. *Circulating Literacy* speaks to, and connects, the topics of rural studies, literacy sponsorship and identity, gender, and professionalization, arguing for value in the study of periodicals as education tools.

This book covers the theory and practice of writing and speaking in professional settings for practitioners, educators and researchers in healthcare. A thought-provoking work, written by John J. Gartland, MD, Medical Editor at Thomas Jefferson University in Philadelphia and past president of the American Academy of Orthopaedic Surgeons, it will stimulate readers and change their perspectives on all forms of communication with their patients and colleagues. Uniquely, it also shows how

to prepare an interesting, well-organized and well-written grant proposal to maximize the chances of obtaining funding. An essential resource for physicians and residents in all specialties, medical students, and educators and researchers, particularly those applying for research grants or wanting to publish articles. "Developing acceptable writing and speaking skills should be major goals for all physicians to attain because the very nature of the medical profession is such that few physicians can escape the need to speak and write in their professional careers. I share with you concepts and strategies about medical writing, medical speaking, and patient communication skills that have worked well for me over a long medical career. My hope is that these suggested communication and writing strategies will work as well for you as they have for me." - John Gartland, in the foreword.

We all can agree that being a good public speaker is an attribute. Great leaders, prominent business people and others we admire, are known for their ability to communicate. Public speaking is a key skill whether you want to stand up as a leader, become more competent at work, or just improve your day-to-day communication. Some are born with the natural gift of being an excellent public speaker. Others have developed it over the years. Regardless of where you are on your public speaking journey, you can always improve and hone this ability. Our

communication is one way people size us up or judge us. Whether you agree with it or not, It is used as a gauge at work and in social settings to determine where we stand. Being a better communicator will help you climb both the work and social ladders. Sometimes being a good communicator is mistaken with being knowledgeable. We all know of countless examples of good communicators being successful despite their lack of knowledge or hard work. I will admit, as I improved my public speaking and communication skills, I was the beneficiary of being seen as more competent in a management role than I actually was. Just imagine if you were able to be a better public speaker or communicator. By pairing this communication skill with your knowledge and hard work ethic, there is no limit to where you will end up both professionally and personally. I can't even count how many successful presentations, speeches, sales pitches and social engagements I have been a part of. More importantly, I have taught and helped numerous students and clients become better public speakers. These speakers have gone on to be better salespeople, move up their corporate ladder and become more likeable in their social circles. Some have even made it so far down the path, that they are now true masters of public speaking. This book is a collection of the strategies and tactics that I share with them. This is your

opportunity to take a crash course on becoming a master public speaker. Just think of the impact that we could have. Good public speakers can empower, encourage and persuade entire crowds with just one speech. At work, you can motivate your team, land that big sale or project as well as talk your way into a promotion. Have you ever overheard someone having a conversation at a restaurant or other public setting and their simple conversation sounded like an authentic yet well rehearsed speech? Look at how others admire orators like that. There is no reason that you can't excel in the same way. I am sure we agree that the above points are important, but why do we really need to improve our public speaking skills? The possible benefits are powerful and endless. Imagine having an improved sense of self-esteem. Picture yourself having better communication and leadership skills. You can have more friends and a larger professional network. Your personal satisfaction will go through the roof. This isn't a scam. It's a promise. Just work on the skills in this book, get out there and get exposure.

This book is the compilation of eight research studies conducted by students from the Master's in Education with Emphasis on English Didactics at the School of Education in Universidad Externado de Colombia, and one study carried out by the professors from the same Emphasis. The articles focus on the role of teachers as materials developers

in their English as a Foreign Language (EFL) context and the importance of developing contextualized materials to promote students' learning processes. These issues comprise several themes such as teacher-developed materials in a Master's programme in Education with Emphasis on English Didactics, helping high-intermediate students develop argumentative skills in writing, enhancing undergraduates' reading comprehension through the awareness of reading strategies, digital storytelling to foster EFL writing, the effect of combining two corrective feedback strategies on written errors correction, self and peer assessment on students' oral performance (CALLA), communicative games to foster oral interaction in the EFL classroom, and promoting the reading process through collaborative strategic reading (CSR). This book is divided into eight chapters. Each chapter explains the corresponding research process undergone by the students. It describes their theoretical considerations, instructional and research designs, data analysis and findings, and conclusions in relation to their concern.

The Handbook of Research on the Education of School Leaders brings together empirical research on leadership preparation and development to provide a comprehensive overview and synthesis of what we know about preparing school leaders today. With contributions from the field's foremost scholars, this new edition investigates the methodological foundations of leadership preparation research, reviews the pedagogical and curricular features of preparation programs, and presents valuable insights into the demographic, economic, and political factors affecting school leaders. This volume both mirrors the first edition's macro-level approach to leadership preparation and presents the most up-to-date research in the field. Updates to this edition cover recent state and federal government efforts to improve leadership in education, new challenges for the field, and significant gaps and critical questions for framing, researching, evaluating, and improving the education of school leaders.

Sponsored by the University Council of Educational Administration (UCEA), this handbook is an essential resource for students and scholars of educational leadership, as well as practitioners, policymakers, and other educators interested in professional leadership. . listening, speaking, reading and writing. It brings together contributors from across six continents, who analyse a wide range of teaching and learning contexts, including primary, secondary, tertiary, private, and adult ESL/EFL classes. In doing so, they provide locally relevant accounts that nonetheless resonate with other contexts and wider concerns. This informative and practical edited collection will appeal to students and scholars who are interested in the four building blocks of language learning, as well as language education and teacher education.

Designed to help students analyze and interpret research data using IBM SPSS, this user-friendly book, written in easy-to-understand language, shows readers how to choose the appropriate statistic based on the design, and to interpret outputs appropriately. The authors prepare readers for all of the steps in the research process: design, entering and checking data, testing assumptions, assessing reliability and validity, computing descriptive and inferential parametric and nonparametric statistics, and writing about outputs. Dialog windows and SPSS syntax, along with the output, are provided. Three realistic data sets, available on the Internet, are used to solve the chapter problems. The new edition features: Updated to IBM SPSS version 20 but the book can also be used with older and newer versions of SPSS. A new chapter (7) including an introduction to Cronbach's alpha and factor analysis. Updated Web Resources with PowerPoint slides, additional activities/suggestions, and the answers to even-numbered interpretation questions for the

Many research studies show that the use of technology inside and outside classrooms makes teaching and learning more engaging and motivating. Technology can provide learners with endless opportunities and can improve the learning experience, simplify access to educational resources, enhance autonomous learning, meet individual learning needs, and prepare the learners for future career success when using it to foster 21st-century skills. However, the range and number of technologies currently available can yield challenges for educators if they do not know how to effectively integrate them into their teaching pedagogy. Policies, Practices, and Protocols for the Implementation of Technology Into Language Learning discusses the skills necessary for successful technology use in education and examines technology tools that assist in teaching different languages with a focus on English as a Foreign Language (EFL). Covering a range of topics such as reading, writing, and integrated language skills, this book is ideal for instructors, policymakers, administrators, researchers, practitioners, academicians, and students. This book will provide college teachers with specific tips, techniques, and strategies that will help them motivate and engage students. Modeled after the highly successful Classroom Assessment Techniques and Collaborative Learning Techniques, the book describes learning strategies and techniques drawn from corporate training and education literature. The strategies in the

book, broken down into step-by-step directions, offer practical advice on how to increase motivation, promote active learning, build community, help students learn holistically, and ensure students are working in their optimal challenge zone. Each technique includes purpose, preparation, procedures, examples, online implementation, variations and extensions, observations and advice, and key resources. While much of the existing literature on student engagement is general and theoretical, this book emphasizes practical techniques and strategies that have been devised by experienced classroom teachers from a wide variety of disciplines and institutions.

Issues in Materials Development provides readers with theoretical foundations and practical aspects of designing materials for EFL/ESL contexts. It starts with discussing some basic and preliminary principles of materials design followed by scrutinizing critical issues in materials development in an objective and systematic way. This ranges from considering learners' needs, adopting, adapting, selection, and gradation of materials to the specific focus of the book on developing various types of materials for the four language skills, pronunciation, ESP vocabulary, and computer assisted language learning materials. Authenticity of materials to be designed and the inclusion of affective factors to develop motivating materials to engage language learners, in addition to features of materials design at a universal level are other areas to read about. This book finally tries to open new horizons and possible futuristic approaches to improve today's ELT materials.

This book, written by leading practitioners, brings together a comprehensive overview of TESOL.
