The strange and thrilling world of Japanese track racing - a cycling and betting culture unlike anything else on earth The Olympic cycling sport of keirin was invented in Japan more than 70 years ago to raise money to rebuild the country after World War II. Now, fans bet billions of dollars a year on races, with the top riders earning huge sums. In each race, a pacemaker leads nine riders around huge concrete velodromes, then leaves the track with around a lap and a half to go - the cue for a frantic finish as the competitors reach speeds of up to 70 kph. Along the way they block and shove each other, clash heads and occasionally crash (the two Japanese characters used to write keirin mean 'battle' and 'wheel'). To prevent race fixing, the cyclists spend meets living in dorms, with no access to online technology. Their lives are ruled by ritual and fierce competition, from their rookie days at the Japan Keirin School near Mount Fuji to the annual Grand Prix final, whose winner takes home prize money of almost one million

dollars. A small number of foreign riders are invited to compete in Japan every year and some, like Shane Perkins, have overcome culture shock to prosper in the home of keirin. The Olympic version - which has made stars of Chris Hoy, Jason Kenny and Victoria Pendleton - is being taken more seriously in Japan as Tokyo prepares to host the 2021 Olympics and Paralympics. Justin McCurry, the Guardian's Japan and Korea correspondent, explores a blue-collar Japan we rarely see and a uniquely fascinating sporting culture.

This book aims to capture the complicated development of Korea from monoethnic to multicultural society, challenging the narrative of “ethnonational continuity” in Korea through a discursive institutional approach. At a time when immigration is changing the face of South Korea and an increasingly diverse society becomes empirical fact, this doesn't necessarily mean that multiculturalism has been embraced as a normative, policy-based response to that fact. The approach here diverges from existing academic analyses, which tend to conclude that core institutions defining Korea's immigration and nationality regimes—and which, crucially, also reflect a basic and hitherto unyielding commitment to racial and ethnic homogeneity—will remain largely

unaffected by increasing diversity. Here, this title underscores the critical importance of “discursive agency” as a necessary corrective to still dominant power and interest-based arguments. In addition, “discursive agents” are found to play a central role in communicating, promoting, and helping to instill the ideas that create a basis for change on the road to remaking Korean society. *The Road to Multiculturalism in South Korea* will be of interest to students and scholars of Asian studies, immigration and migration studies, race and ethnic studies, as well as comparative politics broadly.

A large part of the book is then devoted to a detailed description of the specific related diseases and their clinical presentations, the disease course, and potential complications in both pediatric and adult patients. The advice regarding treatment is based on the best currently available evidence in this constantly evolving area. Soon you'll be enchanting your customers like never before.”-Former chief evangelist of Apple and marketing guru, Guy Kawasaki “The book is FANTASTIC – it's not so much a 'how to do marketing book' as a 'how to believe in your business and succeed' book. It's so well written and easy to read that you almost feel like you're having a chat with the author rather than being lectured at by some 'know it all.' The ideas are so simple that its almost just common sense and yet most business owners just wouldn't have the time to think of them” - Lia Banton, Small Business Consultant “A refreshing 'let's get back to basics' guide to marketing. lonely and hard to keep focused on the end goals, and this is the perfect book to help entrepreneurs keep energy levels where they need to be in order to be as effective as possible. Think a hybrid between a bestselling a self-help guide and a step by step, key in hand marketing guide; Jack Canfield's The Success Principles meets Harry Beckwith's 'Selling the Invisible'. Entrepreneurs often suffer from isolation and a drain on their energy as they try to be jack-of-all-trades in a small or non-existent team. Their days are so filled with running their business that they often have no time to think of new ideas for growing their business or increasing profits. They are hungry not only for new ideas, but for support. Often it's not just the lack of business knowledge that hampers entrepreneurs, but difficulty in keeping motivated and believing in ones dream. This book will give business owners not only a variety of easy to implement and proven marketing activities that will build confidence, but also what isn't normally included in classic business books to help owners stay motivated and not feel so isolated. In addition individuals are becoming more and more concerned with feeling good about their business, using ethical practices and understand that in this new customer driven/customer-centric economy small businesses must establish a win-win business model and marketing system. Ideas like CRM and customer experience are bandied about, but small businesses neither understand them, nor know how to even begin to apply the ideas. Win Win Marketing will benefit all readers with its uniqueness:- combining a 'self-help' approach with down to earth practical marketing ideas- presenting a customer centric and positive way to approach marketing and business growth- easy to read and understand 'sound bites' that a time-pressed business owner can easily understand and apply- providing insider tips and resources to make the ideas immediately applicable- easy to implement, affordable and
