This book discusses the use of the internet in China, the complicated power relations in online political communications, and the interactions and struggles between the government and the public over the use of the internet. It argues that there is a "semi-structured" online public sphere, in which there is a certain amount of equal and liberal political communication, but that the online political debates are also limited by government control and censorship, as well as by inequality and exclusions, and moreover that the government rarely engages in the political debates. Based on extensive original research, and considering specific debates around particular issues, the book analyses how Chinese net-users debate about political issues, how they problematize the government's actions and policies, what language they use, what online discourses are produced, and how the debates and online discourses are limited. Overall, the book provides a rich picture of the current state of online political communication in China.

Interior Design magazine's 2021 compendium of the best architecture and design projects across genres, from workplace and hospitality to residential and institutional. A unique, arresting and versatile document of the traumatic earthquake which hit Haiti in 2010 and its aftermath. Encased in a cardboard box, the project comprises 16 unbound posters and a map page which draws attention to the epicentre and its rippling impact on the population of the island. The unique format allows the viewer to absorb each page individually or to hang the entire project. The visual testimony to the events of the the first days after the event are provided by award-winning photographer Ron Haviv and the essay by esteemed writer Simon Winchester.

There are over 2000 registered historic buildings in Shanghai, with hundreds more waiting to be added. Most are pre-War structures and are either Western buildings, or Chinese-style buildings with a distinct Western influence. These include villas, offices, apartment buildings and shikumen (a house of both wood and brick). Structures were selected for this book because of the interesting stories behind them or because they were related to a topical news event.

He's a down-on-his-luck janitor with aspirations of writing the great American trash novel. She's the spoiled, sharp-tongued boss's daughter, always looking for a creative way to spice up her boring life. Normally, these two would never meet, but a higher power has different plans for both of them. The major motion picture from 20th Century Fox starring Ewan McGregor, Cameron Diaz and Holly Hunter hits the box office in October.

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

An exciting fantasy novel for 8 to 12 year olds involving enchantment, mystery and a

garden gnome. To the boy called Red, it seems the most marvellous escape he could wish for: a gift that grants him more freedom than he ever believed possible - the chance to fly, to soar with the gulls, high over the tall brick walls that have imprisoned him for so long. But this gift comes with a terrible price - and puts him in grave danger. Is there anyone Red can trust to help him? The curious Captain Bass who has strange powers of his own? The wildly unpredictable twin sisters he is strongly drawn to? In this magical, mysterious story, Red's adventure is like a chamber of mirrors at a carnival - a dazzling and breathtaking tale. 'This is a rich fantasy - alive with original twists, surprises and mysteries which I dare not reveal. Children's Literature is about to be enriched with a new classic.' Margaret Mahy

This fully revised and updated edition of "Handbook of Combustion" - the standard work on this topic - comes with 30% more content and an extended new editorial team with two more renowned experts. The new edition combines the strength of the previous one while increasing the scope by additional chapters on unconventional natural gas, boiling liquid expanding vapor explosion (BLEVE) and smog formation, and by expanding existing topics, e.g., biofuels and chemical looping combustion. The work is divided in five topics: 1) Fundamentals and Safety, 2) Combustion Diagnostics and Pollutants, 3) Gaseous and Liquid Fuels, 4) Solid Fuels, and 5) New Technologies. Cross-references in and between the topics guide the reader to the content of interest and provide access to additional subjects. This major reference summarizes all significant information on combustion such as the chemistry, physics, and modeling of combustion processes, spectroscopic methods, safety regulations, pollutants formation, fuel types and, not the least, environmental impacts. The Handbook of Combustion is a complete and impressive work written for academic as well as industrial researchers and developers. Reviewer quotes (amazon): "... the entire area of combustion, including gasification and new technologies, is described in a clear and comprehensive way." "... this is a unique handbook, which closes a big gap in the literature."

There is increasing evidence around the world of a heightened response by business to the spread of HIV/AIDS. Businesses are recognising the impact that the virus is having in terms of the human, financial and social costs to its operations and host communities. Even in countries where the virus has a low prevalence level, early action is essential to avoid serious impacts on economic activity and future markets. The response has manifested itself in many different ways, from action to protect workforces, to community outreach and philanthropy. Moreover, these efforts have not been undertaken.

Incorporation of particular components with specialized properties allows one to tailor the end product's properties. For instance, the sensitivity, burning behavior, thermal or mechanical properties or stability of energetic materials can be affected and even controllably varied through incorporation of such ingredients. This book examines particle technologies as applied to energetic materials such as propellants and explosives, thus filling a void in the literature on this subject. Following an introduction covering general features of energetic materials, the first section of this book describes methods of manufacturing particulate energetic materials, including size reduction, crystallization, atomization, particle formation using supercritical fluids and microencapsulation, agglomeration phenomena, special considerations in mixing explosive particles and the production of nanoparticles. The second section discusses the characterization of particulate materials. Techniques and methods such as particle size analysis, morphology elucidation and the determination of chemical and thermal properties are presented. The wettability of powders and rheological behavior of suspensions and solids are also considered. Furthermore, methods of determining the performance of particular energetic materials are described. Each chapter deals with fundamentals and application possibilities of the various methods presented, with particular emphasis on issues applicable to particulate energetic materials. The book is thus equally relevant for chemists, physicists, material scientists, chemical and mechanical engineers and anyone interested or engaged in particle processing and characterization technologies.

The proceedings of the 11th International Mine Ventilation Congress (11th IMVC), is focused on mine ventilation, health and safety and Earth science. The IMVC has become the most influential international mine ventilation event in the world, and has long been a popular forum for ventilation researchers, practitioners, academics, equipment manufacturers and suppliers, consultants and government officials around the globe to explore research results, exchange best practices, and to launch new products for a better and safer industry. It also serves as a useful platform to attract and train future ventilation professionals and mine planning engineers, as well as for mining companies to discover better practices to provide better ventilation planning.

"How Art Works explores puzzles that have preoccupied philosophers as well as the general public: Can art be defined? How do we decide what is good art? Why do we gravitate to sadness in art? Why do we devalue a perfect fake? Could 'my kid have done that'? Does reading fiction enhance empathy? Drawing on careful observations, probing interviews, and clever experiments, Ellen Winner reveals surprising answers to these and other artistic mysteries."--Jacket.

Once a pristine, natural paradise, CHIMA has become a battle ground for eight animal tribes. Best friends are now enemies. The animals fight for control of a natural resource called CHI, a powerful element that is both a source of life and potential destruction. Only a few brave heroes in CHIMA understand the true nature of CHI, and the possible downfall of CHIMA that will result from its misuse. Their stories, and the stories of those who seek to destroy them, are known as... THE LEGENDS OF CHIMA. The third volume in the hit series continues the adventures of Laval and his fellow members of the Lion tribe as they fight against Prince Cragger & the Crocodile tribe to preserve the balance of the mysterious force known as Chi.

Organic Chemistry of Explosives is the first text to bring together the essential methods and routes used for the synthesis of organic explosives in a single volume. Assuming no prior knowledge, the book discusses everything from the simplest mixed acid nitration of toluene, to the complex synthesis of highly energetic caged nitro compounds. Reviews laboratory and industrial methods, which can be used to introduce aliphatic C-nitro, aromatic C-nitro, N-nitro, and nitrate ester functionality into organic compounds. Discusses the advantages and disadvantages of each synthetic method or route, with scope, limitations, substrate compatibility and other important considerations. Features numerous examples in the form of text, reaction diagrams, and tables.

This wonderful story of Mümine Y?ld?z and her little daughter Ay?e fills the hearts with crimson cherries... It invites us to a wonderful journey of discovery on endeavor, patience, love, friendship, fidelity and love of nature...

More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost." *Junior Theory Level 1* - a foundational music theory book specifically designed for children aged 4-7.
