Perspectives in Lexicology and Corpus Linguistics offers an introduction to words and corpus linguistics. From this foundation it explores the much wider issues that are inevitably raised but somehow marginalized in lexicology (the study of words) and corpus linguistics: how are individual words integrated into language? What are the real benefits of studying the large quantities of text now available in corpora? How do we best conceptualize meaning itself?> This book explores how the communist cult of the individual was not just a Soviet phenomenon but an international one. When Stalin died in 1953, the communists of all countries united in mourning the figure that was the incarnation of their cause. Though its international character was one of the distinguishing features of the communist cult of personality, this is the first extended study to approach the phenomenon over the longer period of its development in a truly transnational and comparative perspective. Crucially it is concerned with the internationalisation of the Soviet cults of Lenin and Stalin. But it also ranges across different periods and national cases to consider a wider cast of bureaucrats, tribunes, heroes and martyrs who symbolised both resistance to oppression and the tyranny of the party-state. Through studying the disparate ways in which the cults were manifested, Kevin Morgan not only takes in many of the leading personalities of the communist movement, but also some of the cultural luminaries like Picasso and Barbusse who sought to represent them. The cult of the individual was one of the most fascinating, troubling and revealing features of Stalinist communism, and as reconstructed here it offers new insight into one of the defining political movements of the twentieth century.

This is the first book to systemize all levels of communicative behavior of phages. Phages represent the most diverse inhabitants on this planet. Until today they are completely underestimated in their number, skills and competences and still remain the dark matter of biology. Phages have serious effects on global energy and nutrient cycles. Phages actively compete for host. They can distinguish between 'self' and 'non-self' (complement same, preclude others). They process and evaluate available information and then modify their behaviour accordingly. These diverse competences show us that this capacity to evaluate information is possible owing to communication processes within phages (intra-organismic), between the same, related and different phage species (interorganismic), and between phages and non-phage organisms (transorganismic). This is crucial in coordinating infection strategies (lytic vs. lysogenic) and recombination in phage genomes. In 22 chapters, expert contributors review current research into the varying forms of phage biocommunication and Phagetherapy. Biocommunication of Phages aims to assess the current state of research, to orient further investigations on how phages communicate with each other to coordinate their behavioral patterns, and to inspire further investigation of the role of non-phage viruses (non-lytic, non-prokaryotic) in these highly dynamic interactional networks.

Modern Solutions for Protection, Control, and Monitoring of Electric Power Systems, Edited by Héctor J. Altuve Ferrer and Edmund O. Schweitzer, III, publishing on June 1, 2010, addresses the concerns and challenges of protection, control, communications and power system engineers. It also presents solutions relevant to decision-making personnel at electric utilities and industries, and is appropriate for university students and faculty. Approaches, technology solutions and examples explained in this book provide engineers with tools to help meet today's power system requirements, including:- Reduced security margins resulting from limitations on new transmission lines and generating stations.- Variable and less predictable power flows stemming from new generation sources and free energy markets.- Modern protection, control, and monitoring solutions to prevent and mitigate blackouts.- Increased communications and automation (sometimes referred to as the 'smart grid') Modern Solutions brings together the combined expertise of engineers working on power system operation,

Cloud computing has become a significant technology trend. Experts believe cloud computing is currently reshaping information technology and the IT marketplace. The advantages of using cloud computing include cost savings, speed to market, access to greater computing resources, high availability, and scalability. Handbook of Cloud Computing includes contributions from world experts in the field of cloud computing from academia, research laboratories and private industry. This book presents the systems, tools, and services of the leading providers of cloud computing; including Google, Yahoo, Amazon, IBM, and Microsoft. The basic concepts of cloud computing and cloud computing applications are also introduced. Current and future technologies applied in cloud computing are also discussed. Case studies, examples, and exercises are provided throughout. Handbook of Cloud Computing is intended for advanced-level students and researchers in computer science and electrical engineering as a reference book. This handbook is also beneficial to computer and system infrastructure designers, developers, business managers, entrepreneurs and investors within the cloud computing related industry.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Brian Scaddan's Electrical Installation Work explains in detail how and why electrical installations are designed, installed and tested. You will be guided in a logical, topic by topic progression through all the areas required to complete the City and Guilds 2357 Diploma in Electrotechnical Technology. Rather than following the order of the syllabus, this approach will make it easy to quickly find and learn all you need to know about individual topics and will make it an invaluable resource after you've completed your course. With a wealth of colour pictures, clear layout, and numerous diagrams and figures providing visual illustration, mastering difficult concepts will be a breeze. This new edition is closely mapped to the new City and Guilds 2357 Diploma and includes a mapping grid to its learning outcomes. It is also fully aligned to the 17th Edition Wiring Regulations. Electrical Installation Work is an indispensable resource for electrical trainees of all ability levels, both during their training and once qualified. Brian Scaddan, I Eng, MIET, is a consultant for and an Honorary Member of City and Guilds. He has over 35 years' experience in Further Education and training. He is Director of Brian Scaddan Associates Ltd, an approved City and Guilds and NICEIC training centre offering courses on all aspects of Electrical Installation Contracting including the City and Guilds 2382, 2391, 2392, 2377 series and NICEIC DISQ courses. He is also a leading author of books on electrical installation.

This widely adopted text explores key theories and models that frame reading instruction and research. Readers learn why theory matters in designing and implementing high-quality instruction and research; how to critically evaluate the assumptions and beliefs that guide their own work; and what can be gained by looking at reading through multiple theoretical lenses. For each theoretical model, classroom applications are brought to life with engaging vignettes and teacher reflections. Research applications are discussed and illustrated with descriptions of exemplary studies. New to This Edition *Current developments in theory,

research, and instructional practices. *Useful pedagogical features in every chapter: framing questions, discussion ideas, and learning activities. *Classroom applications give increased attention to English language learners and technology integration. *Coverage of additional theories (Third Space Theory) and theorists (Bakhtin and Bourdieu).

This describes the lifestyles of planktons and their adaptation for living independently of solid surfaces.

Tracing the evolution of polo from its origins in Central Asia to its current manifestation as a professional sport that attracts wealthy sponsors and patrons, this sociological study examines how polo has changed according to the economic and cultural differences of the nations and continents where it is played. One hundred historic and modern photographs are included.

Designing with Creo Parametric 2.0 provides the high school student, college student, or practicing engineer with a basic introduction to engineering design while learning the 3D modeling Computer-Aided Design software called Creo Parametric from PTC. The topics are presented in tutorial format with exercises at the end of each chapter to reinforce the concepts covered. It is richly illustrated with computer screen shots throughout. Above all, this text is designed to help the reader expand their creative talents and communicate their ideas through the graphics language. Because it is easier to learn new information if you have a reason for learning it, this textbook discusses design intent while you are learning Creo Parametric. At the same time, it shows how knowledge covered in basic engineering courses such as statics, dynamics, strength of materials, and design of mechanical components can be applied to design. You do not need an engineering degree nor be working toward a degree in engineering to use this textbook. Although FEA (Finite Element Analysis) is used in this textbook, its theory is not covered. The first two chapters of this book describe the design process. The meat of this text, learning the basic Creo Parametric software, is found in Chapters 3 through 6. Chapters 7, 8, and 12 deal with dimensioning and tolerancing an engineering part. Chapters 9 and 10 deal with assemblies and assembly drawings. Chapter 11 deals with family tables used when similar parts are to be designed or used. Chapter 13 is an introduction to Creo Simulate and FEA.

AMAZON'S #1 BESTSELLING VAMPIRE DETECTIVE SERIES! Over two million copies sold! Multiple USA Today bestsellers. #1 in Vampire Romance, Urban Fantasy, and Women Sleuths! Included inside: MOON DANCE (Vampire for Hire #1) Six years ago federal agent Samantha Moon was the perfect wife and mother, your typical soccer mom with the minivan and suburban home. Then the unthinkable happens, an attack that changes her life forever. And forever is a very long time for a vampire. Now the world at large thinks Samantha has developed a rare skin disease, a disease which forces her to quit her day job and stay out of the light of the sun. Now working the night shift as a private

investigator, Samantha is hired by Kingsley Fulcrum to investigate the murder attempt on his life, a horrific scene captured on TV and seen around the country. But as the case unfolds, Samantha discovers Kingsley isn't exactly what he appears to be; after all, there is a reason why he survived five shots to the head...

VAMPIRE MOON (Vampire for Hire #2) Sequel to Moon Dance, private investigator Samantha Moon finds herself hunting down a powerful crime lord and protecting an innocent woman from her ruthless ex-husband?all while two very different men vie for her heart. And as the stakes grow higher and her cases turn personal, Samantha Moon will do whatever it takes to protect the innocent and bring two cold-blooded killers to justice?her own brand of justice.

Presents a concise survey of lexicology. This book surveys the study of words, providing an overview of basic issues in defining and understanding the word as a unit of language. It also examines the history of lexicology, the evolution of dictionaries and developments in the field. It is of interest to undergraduate students of linguistics.

This is volume 1 of Planets, Stars and Stellar Systems, a six-volume compendium of modern astronomical research, covering subjects of key interest to the main fields of contemporary astronomy. This volume on "Telescopes and Instrumentation" edited by Ian S. McLean presents, after a general Introduction to Telescopes, accessible review chapters on Robotic and Survey Telescopes, Segmented Mirror Telescopes, Honeycomb Mirrors for Large Telescopes, Active Thin-Mirror Telescopes, Optical and Infrared Interferometers, Submillimeter Telescopes, Radio Telescopes, Space Telescopes in the Ultraviolet, Optical, and Infrared (UV/O/IR), CMB Telescopes and Optical Systems, Very- High-Energy Gamma-Ray Telescopes, Instrumentation and Detectors, Silicon-Based Image Sensors, Long-Wavelength Infrared Detectors, and Astronomical Spectrographs. All chapters of the handbook were written by practicing professionals. They include sufficient background material and references to the current literature to allow readers to learn enough about a specialty within astronomy, astrophysics and cosmology to get started on their own practical research projects. In the spirit of the series Stars and Stellar Systems published by Chicago University Press in the 1960s and 1970s, each chapter of Planets, Stars and Stellar Systems can stand on its own as a fundamental review of its respective sub-discipline, and each volume can be used as a textbook or recommended reference work for advanced undergraduate or postgraduate courses. Advanced students and professional astronomers in their roles as both lecturers and researchers will welcome Planets, Stars and Stellar Systems as a comprehensive and pedagogical reference work on astronomy, astrophysics and cosmology.

This book fully integrates the conventional and biotechnological approaches to fruit crop breeding. Individual chapters are written on a wide variety of species covering all the major fruit crops in one volume. For each crop, there is a discussion of their taxonomy and evolution, history of improvement, crossing techniques, evaluation methods, and heritability of major traits and germplasm resources. Also discussed are the most recent advances in genetic mapping and QTL (quantitative trait loci) analysis, marker assisted breeding, gene cloning, gene expression analysis, regeneration and transformation. Patenting and licensing issues are also covered.

This book includes 9 projects on building smart and practical AI-based systems. These projects cover solutions to different domain-specific problems in healthcare, e-commerce and more. With this book, you will apply different machine learning and deep learning techniques and learn how to build your own intelligent applications for smart ...

Designed to speak clearly and intelligently to non-musicians and musicians alike, "Inside Film Music" is a must for every film music fan. Through its forty-plus lively, insightful interviews, it delves deeply into the creative process, the basics of musical thought, filmmaking's collaborative nature, and the individual psyches of its participating composers. It covers every current style of film music, the essence of what it means to write a score for motion pictures ... and much more. Composers featured included Academy Award Winners John Barry (Dances with Wolves, Out of Africa, Goldfinger); Rachel Portman (Mona Lisa Smile, The Cider House Rules, Chocolat); Stephen Warbeck (Shakespeare in Love); and Gabriel Yared (Cold Mountain, The Talented Mr. Ripley, City of Angels, The English Patient). Also interviewed are Academy Award Nominees John Debney (Sin City, The Passion of the Christ, Bruce Almighty, Spy Kids); Philip Glass (The Hours, Kundun); Mark Isham (Freedom Writers, The Black Dahlia, Home for the Holidays, Quiz Show); Marc Shaiman (How Harry Met Sally, Ghosts of Mississippi, A Few Good Men, City Slickers, Misery); and Alan Silvestri (Back to the Future, Forrest Gump, The Polar Express). Additionally there is commentary from Marco Beltrami (Hellboy, The Terminator 3); Mychael Danna (Little Miss Sunshine, Capote); Cliff Martinez (Wonderland, Traffic, Sex, Lies and Videotape); and Jeff Rona (TV series: Homicide, Chicago Hope, Profiler).

This detailed volume utilizes our current understanding of the structural basis of multidrug recognition and multidrug efflux mechanisms to provide protocols involving these vital intrinsic membrane proteins widely distributed in bacteria. Beginning with protocols for the structural analysis of bacterial multidrug exporters, the book continues with sections on biochemical and bioengineering analysis, computational analysis, biomedical approaches, as well as advanced technologies expected to be applied to multidrug efflux transport studies. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective chapters, lists of the necessary materials

and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, *Bacterial Multidrug Exporters: Methods and Protocols* serves as an ideal guide to this fast moving field of study.

After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend , and her soul makes a first step to healing.

Like its bigger, bestselling predecessors, *Backpack Literature* features the authors' collective poetic voice which brings personal warmth and a human perspective to the discussion of literature, adding to students' interest in the readings. New selections have been added including four new one-act plays to help "ease" students into the study of this genre. The new plays include two comedies-- David Ives's, *Sure Thing* and Jane Martin's *Beauty*--as well as Terrence McNally's poignant *Andre's Mother* and Edward Bok Lee's experimental drama *El Santo Americano*.

It is Brighton, 1959, and the theatre at the end of the pier is having its best summer season in years. Ronnie, a brilliant young magician, and Evie, his dazzling assistant, are top of the bill, drawing audiences each night. Meanwhile, Jack – Jack Robinson, as in 'before you can say' – is everyone's favourite compère, a born entertainer, holding the whole show together. As the summer progresses, the off-stage drama between the three begins to overshadow their theatrical success, and events unfold which will have lasting consequences for all their futures. Rich, comic, alive and subtly devastating, *Here We Are* is a masterly piece of literary magicianship which pulls back the curtain on the human condition. 'One to watch for 2020' according to: *The Sunday Times* *The Times* *The Daily Telegraph* *The Guardian* *Financial Times* *Evening Standard* *The*

Scotsman The Irish Times 'He tells simple, truthful stories about what feel like real people. Here We Are is a welcome addition to a proud legacy.' The Big Issue The variety of voices and its historical and emotional reach are so finely entwined, it is as perfect and smooth as an egg. Passages leap out all the time, demanding to be reread, or committed to memory... It is perhaps too simple to say that Swift creates a form of fictional magic, but what he can do with a page is out of the ordinary, far beyond most mortals' ken.' Rosemary Goring, The Herald 'Here We Are is a subtle portrait of a vanished world, with moving passages about the problems of wartime evacuees returning to impoverished London life after the wonders of the countryside.' The Independent 'In Here We Are, Swift does not just dwell on the pivotal moments of our lives, but traces their shockwaves both forward and back. Moving seamlessly from pre-war to post, from the events of one illusory, youthful summer to the present, we are given candid access to the innermost reflections of three people who loved and betrayed each other. The end result is the stuff of life, an enduring mystery that Ronnie, Evie, Jack - that we all - must live with. I thought it was wonderful.' Joseph Knox, author of Sirens 'As with all his books, it's the moments of quiet, undramatic poignancy that stay with you' Sunday Express 'a quietly, devastating, magical novel' Telegraph 'With a wizardry of his own, Swift conjures up an about-to-disappear little world and turns it into something of wider resonance' Sunday Times Praise for Mothering Sunday: 'Bathed in light; and even when tragedy strikes, it blazes irresistibly... Swift's small fiction feels like a masterpiece' Guardian 'Alive with sensuousness and sensuality ... wonderfully accomplished, it is an achievement' Sunday Times 'From start to finish Swift's is a novel of stylish brilliance and quiet narrative verve. The archly modulated, precise prose (a hybrid of Henry Green and Kazuo Ishiguro) is a glory to read. Now 66, Swift is a writer at the very top of his game' Evening Standard 'Mothering Sunday is a powerful, philosophical and exquisitely observed novel about the lives we lead, and the parallel lives – the parallel stories – we can never know ... It may just be Swift's best novel yet' Observer

Written in easy-to-read and -use format, this book updates and revises its bestselling predecessor to become the most complete, comprehensive resource on plastics testing. This book has an emphasis on significance of test methods and interpretation of results. The book covers all aspects of plastics testing, failure analysis, and quality assurance - including chapters on identification analysis, failure analysis, and case studies. The book concludes with a substantial appendix with useful data, charts and tables for ready reference. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Communities of microscopic plant life, or phytoplankton, dominate the Earth's aquatic ecosystems. This important new book by Colin Reynolds covers the adaptations, physiology and population dynamics of phytoplankton communities in lakes and rivers and oceans. It provides basic information on composition, morphology and physiology of the main phyletic groups represented in marine and freshwater systems and in addition reviews recent advances in community ecology, developing an appreciation of assembly processes, co-existence and competition, disturbance and diversity. Although focussed on one group of organisms, the book develops many concepts relevant to ecology in the broadest sense, and as such will appeal to graduate students and researchers in ecology, limnology and oceanography.

Within a broad framework for analyzing portfolio capital flows to developing countries, the paper undertakes a comparative analysis of equity markets in six Middle Eastern countries. The analysis, based primarily on a range of quantitative indicators, identifies the principal characteristics of these markets, including relative to international comparators, and examines associated structural features. This, along with an analysis of the informational efficiency of selected markets in the region, provides a basis for the subsequent review of policies for enhancing the role of equity markets in the macroeconomy of Middle Eastern countries.
