The first ever successful computer with a GUI, ability to allow users to preview a document before printing, and a mouse was the Mac. The following are the reasons why it has remained relevant all these years. Turned Icons into Art Since Mac was the first computer with a GUI, it was the first to have icons. Susan Kare designed those first icons for Mac. Macs Beg to Be Networked Back when the Mac was launched, computer networking was exotic and pricey; but even then, Macs could be easily connected to each other. HyperCard Partly Inspired the Web The HyperCard was created by Bill Atkinson in 1987. Through this app, anyone could create on-screen cards with hyperlinks, images, or texts. The Mac laptop is advanced right out of the box, it comes with many basic tools such as calendar management, email, etc. However, there is another world of powerful software for Apple Mac that will make complicated tasks easier. Although most of them are not free, they only cost a few bucks and they are well worth it. Here are some of the best.

Apple's new MacBook Air (M1, 2020) is an absolutely fantastic laptop, and thanks to brilliant new additions, in the form of Apple's own M1 chip (which replaces the Intel processors used by the company) and an improved screen. In previous years, the MacBook Air was a reduced version of the MacBook, which was an excellent thin and light laptop for everyday use, but due to its low features did not really fit into intense creative workloads, such as editing, transfer ultra-high definition video or complex 3D animated scenes. However, this latest version has the same M1 chip introduced in the new MacBook Pro 13-inch (M1, 2020), which means that for the first time the MacBook Air can compete with the more expensive laptop. So it really deserves a place around the best laptops in graphic design. It is better, and still the most inexpensive MacBook you can get right now, and it means if you're looking for a slim and lightweight 13-inch laptop for video and photo editing, then the MacBook Air (M1, 2020) is the perfect choice. This guide will teach you how to master your MacBook Air [M1,2020] very fast, this guide is ideal for both Pros and newbies.
