After your casebook, a Casenote Legal Brief is your most important reference source for the entire semester. Expert case studies and analyses and quicknote definitions of legal terms help you prepare for class discussion. Here is why you need Casenote Legal Briefs to help you understand cases in your most difficult courses: Each Casenote includes expert case summaries, which include the black letter law, facts, majority opinion, concurrences, and dissents, as well as analysis of the case. There is a Casenote for you! With dozens of Casenote Legal Briefs, you can find the Casenote to work with your assigned casebook and give you the extra understanding of all cases Casenotes in 1L subjects include a Quick Course Outline to help you understand the relationships between course topics.

A working guide to the proper methods of interacting with the full Vodou pantheon • Includes the myths, cultural heritage, and ancestral lineage of the lwa and how to honor and serve them • Provides an introduction and guide that is especially useful for the solitary practitioner • Discusses the relationship between Vodou, Haitian culture, and Catholicism In The Haitian Vodou Handbook, Kenaz Filan, an initiate of the Société la Belle Venus, presents a working guide to the proper methods of interacting with the full Vodou pantheon, explaining how to build respectful relationships with the lwa, the spirits honored in Haitian Vodou, and how to transform the fear that often surrounds the Vodou religion. Until recently, the Haitian practice of Vodou was often identified with devil worship, dark curses, and superstition. Some saw the saint images and the Catholic influences and wrote Vodou off as a “Christian aberration.” Others were appalled by the animal sacrifices and the fact that the Houngans and Mambos charge money for their services. Those who sought Vodou because they believed it could harness “evil” forces were disappointed when their efforts to gain fame, fortune, or romance failed and so abandoned their “voodoo fetishes.” Those who managed to get the attention of the lwa, often received cosmic retaliation for treating the spirits as attack dogs or genies, which only further cemented Vodou’s stereotype as “dangerous.” Filan offers extensive background information on the featured lwa, including their mythology and ancestral lineage, as well as specific instructions on how to honor and interact fruitfully with those that make themselves accessible. This advice will be especially useful for the solitary practitioner who doesn’t have the personal guidance of a société available. Filan emphasizes the importance of having a quickened mind that can read the lwa’s desires intuitively in order to avoid establishing dogma-based relationships. This working guide to successful interaction with the full Vodou pantheon also presents the role of Vodou in Haitian culture and explores the symbiotic relationship Vodou has maintained with Catholicism.

Have you ever pondered the fascinating numeric precision woven throughout the Word of God? * 666 pertains to Antichrist. What about 777 or 888? * Why TEN Commandments and not 14 or 18? * Why a 7-day week? Why not 8 or 9? * Why were there 12 tribes of Israel and 12 apostles? In this fascinating reference, the late Dr. Ed Vallowe examines the significance of every number mentioned in the Bible.

Lough Corrib in the West of Ireland, one of the worlds premier game fishing lakes, the largest lake in the Republic, and now one of the most important marine archaeological sites in Europe. This book of beautiful full colour charts on photo paper shows all of the lakes famed shallows, its deep holes and drop-offs, launch sites, local names, depths, contours and historic points of interest, and much more. A "must have" if you are sailing or fishing on Corrib

Every follower of Jesus Christ should be able to answer two simple questions:Who is investing in me?Who am I investing in?God desires to pour an abundance of spiritual and emotional capital into your life. And he wants to use you to pour spiritual and emotional capital into others.

Along the way, you'll be changed. Others will change. You will experience God and his community in a new and personal and supernatural way. And so will others. God calls this process of spiritual investing "making disciples." It's the heart of the Great Commission. It's the vision of a great local church. It's the secret of a healthy joyful, secure, and significant life.

Photographs help document the rise of the Nazi party, Hitler's private life, and the political intrigues of party members.

Elegantly written, thoughtful and often amusing, the second edition of *Business Organizations* analyzes the law of business organizations: corporate law, partnership and LLC law, agency, and selected aspects of securities regulation. In clean, uncomplicated prose, the text offers a clear and thoughtful overview of *Business Organizations*, explaining the structure of the law itself, placing it within an historical context, and outlining its economic effect. By integrating basic principles of business and finance in an unthreatening, uncomplicated manner, the text engages readers who have either an elemental or a sophisticated grasp of economics. Various pedagogical features support learning and facilitate use, such as the overview in each chapter, discussion of all the principal cases, extensive use of hypothetical examples, and more.

The Economics of Politics is the fourth volume in Liberty Fund's *The Selected Works of Gordon Tullock*. This volume includes some of Gordon Tullock's most noteworthy contributions to the theory and application of public choice, which is a relatively new science that links economics and political action. This volume combines the best parts of two of his books, *Private Wants: Public Means* and *On Voting*, as well as his famous monograph *The Vote Motive*. The common thread of *The Economics of Politics* is the importance of the bond between *Homo politicus* and *Homo economicus*: they are the same species, each driven largely by self-interest in vigorous pursuit of such personal objectives as wealth, power, prestige, and income security within the confines of society. *The Economics of Politics* covers such diverse public choice topics as: the nature and origins of public choice, the power of using economic analysis to understand and predict the behavior of politically influenced markets, and an evaluation of voting rules and political institutions. Equally confident in both the normative and the positive branches of the discipline, and well-versed in the wide variety of institutions and practices of democracy throughout history, Tullock takes the reader on a journey that goes well beyond the conventional horizon of public choice. Gordon Tullock is Professor Emeritus of Law at George Mason University, where he was Distinguished Research Fellow in the Center for Study of Public Choice and University Professor of Law and Economics. He also taught at the University of South Carolina, the University of Virginia, Rice University, Virginia Polytechnic Institute and State University, and the University of Arizona. In 1966 he founded the journal that became *Public Choice* and remained its editor until 1990. Charles K. Rowley was Duncan Black Professor of Economics at George Mason University and a Senior Fellow of the James M. Buchanan Center for Political Economy at George Mason University. He was also General Director of the Locke Institute.

When you control minds, only your heart can be used against you. Eight months ago, Kira Moore revealed to the mindreading world that mindjackers like herself were hidden in their midst. Now she wonders if telling the truth was the right choice. As wild rumors spread, a powerful anti-jacker politician capitalizes on mindreaders' fears and strips jackers of their rights. While some jackers flee to Jackertown—a slum rife with jackworkers who trade mind control favors for cash—Kira and her family hide from the readers who fear her and jackers who hate her. But when a jacker Clan member makes Kira's boyfriend Raf collapse in her arms, Kira is forced to save the people she loves by facing the thing she fears most: FBI agent Kestrel and his experimental torture chamber for jackers. *MINDJACK: KIRA Open Minds (Book 1) Closed Hearts (Book 2) Free Souls (Book 3) Mindjack Short Story Collection (Book 4) MINDJACK: ZEPH Locked Tight (Book 1) Cracked Open (Book 2) Broken Wide (Book 3) The Locksmith (Book*

4) FORMATS AND TRANSLATIONS Mindjack available in ebook, print, audiobook, French and German LIVE ACTION TRAILER Voted Best Trailer at the 2014 Illinois International Film Festival and one of 50 Most Cinematic Trailers Ever Made – check it out at Susan’s website. KEYWORDS: young adult science fiction, young adult dystopian, teen science fiction, cyberpunk, action and adventure, genetic engineering, post-apocalyptic, metaphysical and visionary

A “funny and fascinating” cultural history about one of our favorite pastimes: eating (The Village Voice). This is a delightful and intelligent look at the food we eat, with a cornucopia of incredible details about the ways we do it. Presented like a meal, each chapter of *Since Eve Ate Apples Much Depends on Dinner* represents a different course or garnish, which Margaret Visser handpicks from the most ordinary American dinner: among them corn on the cob with butter and salt, roast chicken with rice, salad dressed in lemon juice and olive oil, and ice cream. Visser tells the story behind each of these foods and in the course of her inquiries reveals some unexpected treats: the history of Corn Flakes; the secret behind the more dissatisfactory California olives (they’re picked green, chemically blackened, and sterilized); and the fact that, in Africa, citrus fruits are eaten whole, rind and all. For food lovers of all kinds, unexpectedly entertaining book is a treasure of information from the author of the New York Times Notable Book *The Rituals of Dinner*. “Rich in surprising facts, unexpected connections, and a well-documented outrage at what modern technology and agribusiness have done to purity and quality . . . A remarkable amount of information [presented] seamlessly and entertainingly.” —Library Journal

A bold manifesto by two business leaders, *A Billion Bootstraps* shows why microcredit is the world's most powerful poverty-fighting movement-and an unbeatable investment for your charitable donations. *A Billion Bootstraps* unearths the roots of the microcredit revolution, revealing how the pioneering work of people such as Dr. Muhammad Yunus-winner of the 2006 Nobel Peace Prize-is giving hope to billions. Philanthropist and self-made millionaire Phil Smith and microcredit expert and consultant Eric Thurman provide a riveting narrative that explores how these small loans, arranged by “barefoot bankers,” enable impoverished people to start small businesses, support their families, and improve local economies. By paying back their loans instead of simply accepting handouts, men and women around the world are continually giving others the same opportunity to change their futures. Smith and Thurman also examine why traditional charity programs, while providing short-term relief, often perpetuate the problems they are trying to alleviate, and how applying investment principles to philanthropy is the key to reversing poverty permanently. *A Billion Bootstraps* explains how ordinary people can accelerate the microcredit movement by investing charitable donations in specific programs and then leveraging those contributions so the net cost to lift one person out of poverty is remarkably low. You'll discover how to get more for your money by donating with the mind-set of an investor and calculating measurable returns-returns that will change lives and societies forever.

Originally published: New York: Henry Holt and Company, 1999.

This book aims to provide an easily accessible quick reference guide for advanced nursing students preparing to undertake practical examinations to assess advanced clinical practice competence, and students preparing for practical examinations in non-

medical prescribing assessment. These examinations are commonly known as objective structured clinical examinations (OSCEs). The book is a preparation and revision tool, designed to be read in conjunction with any recommended core clinical textbooks: however, along with giving students step-by-step instructions on performing well in OSCE scenarios, it also gives guidance to academic staff on preparing to teach and mark OSCEs. This book uses a case study approach to OSCEs in a coherent, consistent, and easily understandable style. Both authors are clinical academic nurse practitioners who regularly work in clinical practice in conjunction with teaching advanced nurse practitioner and non-medical prescribing students.

Revised edition of: *Engineering mathematics: a foundation for electronic, electrical, communications, and systems engineers* / Anthony Croft, Robert Davison, Martin Hargreaves. 3rd edition. 2001.

Vitalism is understood as impacting the history of the life sciences, medicine and philosophy, representing an epistemological challenge to the dominance of mechanism over the last 200 years, and partly revived with organicism in early theoretical biology. The contributions in this volume portray the history of vitalism from the end of the Enlightenment to the modern day, suggesting some reassessment of what it means both historically and conceptually. As such it includes a wide range of material, employing both historical and philosophical methodologies, and it is divided fairly evenly between 19th and 20th century historical treatments and more contemporary analysis. This volume presents a significant contribution to the current literature in the history and philosophy of science and the history of medicine.

Physicalism—the thesis that everything there is in the world, including our minds, is constituted by basic physical entities—has dominated the philosophy of mind during the last few decades. But although the conceptual foundations of the physicalist agenda—including a proper explication of notions such as ‘causation’, ‘determination’, ‘realization’ or even ‘physicalism’ itself—must be settled before more specific problems (e.g. the problems of mental causation and human agency) can be satisfactorily addressed, a comprehensive philosophical reflection on the relationships between the various key concepts of the debate on physicalism is yet missing. This book presents a range of essays on the conceptual foundations of physicalism, mental causation and human agency, written by established and leading authors in the field.

Day BangHow to Casually Pick Up Girls During the DayCreateSpace

Scott Foresman Reading Street ((c)2008) components for Grade 1.

This bestselling all-in-one guide to the event planning business is back and better than ever, fully updated and revised to reflect the very latest trends and best practices in the industry. This handy, comprehensive guide includes forms, checklists, and tips for managing events, as well as examples and case studies of both successful and unsuccessful events. Judy Allen (Toronto, ON, Canada) is founder and President of Judy Allen Productions, a full-service event planning production company.

This book offers the reader a subtler grasp of today's Islamic societies and their discontents, explaining how the autocratic policies of many states in the Middle East inadvertently bolster the popularity of political Islam. This work also explains the political role of Islam in particular countries and regions -- Egypt, Iran, Pakistan, Sudan, and Europe. - Publisher.

In the third instalment in the creepy, captivating Larten Crepsley series, Larten finds out what it means to love... but is he also damned to find out what it means to lose?

Day Bang is a 201-page book that teaches you how to pick up women during the day, primarily in a coffee shop, clothing store, bookstore, grocery store, subway, or on the street. It contains 51 openers, 23 long dialogue examples with commentary, and dozens of additional lines that teach by example. Day Bang includes... -The optimal day game mindset that leads to the most amount of success-An easy mental trick to prevent your brain from going into a flight-or-fight response when it's time to approach a woman you're attracted to-A detailed breakdown of how to use the "elderly opener," an easy style of approach that reliably starts conversations with women-2 ways to tell if a girl will be receptive to your approach-How to avoid the dreaded "interview vibe"-10 common mistakes guys make that hurt their chances of getting a number Day Bang shares tons of tips and real examples on having successful conversations. It teaches you... -How to use my bait system to get the girl engaged and interested in you-How to segue out of the initial opening topic into a more personal chat where you'll get to know the girl on a deeper level-How to take the interesting things you've done (your accomplishments, hobbies, and experiences) and morph them into bait hooks that gets the girl intrigued enough to want to go out with you-My "Galnuc" method to seamlessly get a girl's number-An easy hack at the end of your interactions that will reduce the chance of a flake and prime the girl for going out with you-Ways to open up a conversation on a girl who isn't giving you much to work with Day Bang goes into painstaking detail on how to approach women in a variety of common environments... -How to open a girl in coffee shops when she has a book, laptop, mp3 player, cell phone, research paper, crossword or Sudoku puzzle, or nothing at all-Two methods for approaching a girl on the street, depending on if she's moving or not, with a diagram to explain all the approach variations-How to approach in a retail store or mall environment, with openers to use on customers or sales clerks-How to approach in bookstores, with specific tips on how to customize your approaches in the cafe, magazine section, or general book aisles-How to meet women in public transportation, on both the bus and subway-How to meet women in grocery stores-How to approach girls in secondary venues like a beach, casino, concert, gym, hair salon, handicraft fair, museum, art show, park, public square, or wine festival Dozens of additional topics are logically organized into 12 chapters... -Preparation. How to reduce your approach anxiety-Opening. How to deliver your opener in a way that doesn't scare women away-Rambling. How to have conversations that make women interested in you-Closing. How to get a number in a way that reduces the chance she'll flake-The Coffee Shop. How to pick up in coffee shops and cafes-The Street. How to pick up outdoors-The Clothing Shop. How to pick up in retail shops, malls, and big box stores-The Bookstore. How to pick up in bookstores-Public Transportation. How to pick up in the bus, subway, or long distance transportation-The Grocery Store. How to pick up in grocery stores-Other Venues. How to pick up just about anywhere else women can be found-Putting It All Together. How to maximize your day game potential The lessons taught in this 75,000 word, no-fluff textbook will help you meet women during the day. If you need tips on what to do after getting her number, consult my other book Bang, which contains an A-to-Z banging strategy. Day Bang focuses exclusively on daytime approaching.

Want to develop novel robot applications, but don't know how to write a mapping or object-recognition system? You're not alone, but you're certainly not without help. By combining real-world examples with valuable knowledge from the Robot Operating System (ROS) community, this practical book provides a set of motivating recipes for solving specific robotics use cases. Ideal for enthusiasts, from students in robotics clubs to professional robotics scientists and engineers, each recipe describes a complete solution using ROS open source libraries and tools. You'll learn how to complete tasks described in the recipes, as well as how to configure and recombine components for other tasks. If you're familiar with Python, you're ready to go. Learn fundamentals, including key ROS concepts, tools, and patterns Program robots that perform an increasingly complex set of behaviors, using the powerful packages in ROS See how to easily add perception and navigation abilities to your robots Integrate your own sensors, actuators, software libraries, and even a whole robot into the ROS ecosystem Learn tips and tricks for using ROS tools and community resources, debugging robot behavior, and using C++ in ROS

These days, development inspires scant trust in the West. For critics who condemn centralized efforts to plan African societies as latter day imperialism, such plans too closely reflect their roots in colonial rule and neoliberal economics. But proponents of this pessimistic view often ignore how significant this concept has become for Africans themselves. In *Bewitching Development*, James Howard Smith presents a close ethnographic account of how people in the Taita Hills of Kenya have appropriated and made sense of development thought and practice, focusing on the complex ways that development connects with changing understandings of witchcraft. Similar to magic, development's promise of a better world elicits both hope and suspicion from Wataita. Smith shows that the unforeseen changes wrought by development—greater wealth for some, dashed hopes for many more—foster moral debates that Taita people express in occult terms. By carefully chronicling the beliefs and actions of this diverse community—from frustrated youths to nostalgic seniors, duplicitous preachers to thought-provoking witch

doctors—*Bewitching Development* vividly depicts the social life of formerly foreign ideas and practices in postcolonial Africa. An accessible guide to the growing field of financial econometrics As finance and financial products have become more complex, financial econometrics has emerged as a fast-growing field and necessary foundation for anyone involved in quantitative finance. The techniques of financial econometrics facilitate the development and management of new financial instruments by providing models for pricing and risk assessment. In short, financial econometrics is an indispensable component to modern finance. *The Basics of Financial Econometrics* covers the commonly used techniques in the field without using unnecessary mathematical/statistical analysis. It focuses on foundational ideas and how they are applied. Topics covered include: regression models, factor analysis, volatility estimations, and time series techniques. Covers the basics of financial econometrics—an important topic in quantitative finance Contains several chapters on topics typically not covered even in basic books on econometrics such as model selection, model risk, and mitigating model risk Geared towards both practitioners and finance students who need to understand this dynamic discipline, but may not have advanced mathematical training, this book is a valuable resource on a topic of growing importance.

Sensorimotor Control and Learning is a groundbreaking text that provides a uniquely integrated treatment of sensory and motor processes, reflecting the latest research trends in both neuromotor control and the perceptual sciences. Richly illustrated and written in a clear and concise manner, the book emphasizes the intimate links between sensory and motor processes, providing an integrated view of perception and action. Features of the book:

- Emphasis on the multidisciplinary nature of the subject, which makes the text useful for a wide variety of readers
- A rigorous and thorough account of how motor behaviors are controlled, coordinated, and changed
- Numerous real-world examples relating to everyday experience
- The latest research in the field, including a unique introductory treatment of control theory
- Boxes highlighting and explaining more than 100 key terms, definitions and concepts throughout the text
- Essential background material on neuroscience, biomechanics and engineering, making it a self-contained book for students
- Over 600 high-quality illustrations by the author

Sensorimotor Control and Learning is an indispensable resource for students of kinesiology and psychology, as well as students of other disciplines such as human factors, biomedical engineering, physiotherapy, and the neurosciences.

For courses in Signals and Systems offered in departments of Electrical Engineering. This book focuses on the mathematical analysis and design of analog signal processing using a just in time approach - new ideas and topics relevant to the narrative are introduced only when needed, and no chapters are stand alone. Topics are developed throughout the narrative, and individual ideas appear frequently as needed.

The third edition of this uniquely comprehensive two-volume anthology contains many of the most significant documents in American intellectual history. It includes new selections from a diverse group of authors that cover Puritan theology, communitarian thought, racial ideology, gender theory, cultural criticism, multiculturalism, and postmodernism. The extensive chronology has been revised and expanded to connect over a thousand important books, essays, and artistic works with events in American and European intellectual, cultural, and political history. Section introductions and headnotes have been rewritten to provide updated bibliographical references and to incorporate new ideas from scholarly literature about the selections. This anthology makes readily available substantial selections from the writings of prominent American thinkers, ranging chronologically from the Massachusetts Bay Colony in 1630 to the present. Accessible to a wide range of students, The American Intellectual Tradition is invaluable for courses in intellectual history and serves as an excellent supplementary text for classes in American history, American studies, and American literature. Volume II now offers new selections by Rexford G. Tugwell, Clement Greenberg, Lillian Smith, Susan Sontag, Malcolm X, Hannah Arendt, Samuel Huntington, Kwame Anthony Appiah, and Judith Butler; and includes writings of Charles Hodge, Charles Peirce, William Dean Howells, William Graham Sumner, Lester Frank Ward, Elizabeth Cady Stanton, Charlotte Perkins Gilman, Josiah Royce, William James, Henry Adams, George Santayana, William James, Oliver Wendell Holmes, Jr., Thorstein Veblen, W.E.B. Du Bois, Jane Addams, John Dewey, Randolph Bourne, H.L. Mencken, Margaret Mead, John Crowe Ransom, Meridel Le Sueur, Reinhold Niebuhr, Whittaker Chambers, B.F. Skinner, Daniel Bell, C. Wright Mills, Lionel Trilling, Martin Luther King, Jr., Betty Friedan, Thomas S. Kuhn, Richard Rorty, Evelyn Fox

Keller, and Michael Walzer.

Three sexy, original stories of men who are totally off-limits. From the author of the sizzling *One Dark Night*—three highly charged tales of unexpected desire, from the faraway past deep into the distant future... Here are three beautiful, daring women who find themselves succumbing to the forbidden, overpowering passion ignited by their arch enemies. Set in three different worlds—the past, the present, and the future—these stories will take readers way beyond their wildest imagination and into their most sensuous fantasies.

A storm is coming for Sean Dillon & company in the mesmerizing new thriller of murder, terrorism and revenge from the Sunday Times bestselling author.

Actor, humanitarian, mother, icon: Angelina Jolie is a larger-than-life character, beautiful, compassionate and fascinating in her life and work choices. But beneath this virtuous Madonna image there is a much darker side. Even in an age of 24/7 tabloid excess, Angelina Jolie remains a riddle. This is Morton's highly anticipated biography.

This is the first survey of British immigration policy to include both its pre-World War Two origins and its development after the crucial 1962 Commonwealth Immigrants Act. It is an accessible introduction to a subject of increasing popularity with students and academics. It also integrates the results of extensive archival research. Offering a different perspective to sociological approaches, *British Immigration Policy since 1939* will be of interest to historians, political scientists, and those studying public and social policy.

Molly Murphy Sullivan's husband Daniel, a captain in the New York City police force, is stumped. He's chasing a murderer whose victims have nothing in common - nothing except for the taunting notes that are delivered to Daniel after each murder. And when Daniel receives a note immediately after Molly and her young son Liam are in a terrible subway crash, Daniel and Molly both begin to fear that maybe Molly herself was the target. Molly's detective instincts are humming, but finding the time to dig deeper into this case is a challenge. She's healing from injuries sustained in the train crash and she's refurbishing her house, which has only just been rebuilt after burning down. She's also sidetracked by her friends Sid and Gus's most recent hobby, dream analysis. And when Molly herself starts suffering from strange dreams, she wonders if they just might hold the key to solving Daniel's murder case. Rhys Bowen's characteristic blend of atmospheric turn-of-the-century history, clever plotting, and sparkling characters will delight readers in *The Edge of Dreams*, the latest in her bestselling Molly Murphy series.

Written around 1660, the unique Chinese short story collection *Idle Talk under the Bean Arbor* (Doupeng xianhua), by the author known only as Aina the Layman, uses the seemingly innocuous setting of neighbors swapping yarns on hot summer days under a shady arbor to create a series of stories that embody deep disillusionment with traditional values. The tales, ostensibly told by different narrators, parody heroic legends and explore issues that contributed to the fall of the Ming dynasty a couple of decades before this collection was written, including self-centeredness and social violence. These stories speak to all troubled times, demanding that readers confront the pretense that may lurk behind moralistic stances. *Idle Talk under the Bean Arbor* presents all twelve stories in English translation along with notes from the original commentator, as well as a helpful introduction and analysis of individual stories.

“And, behold, I send the promise of my Father upon you:” To obtain the “power,” the commandment given to us by Jesus: “Tarry ye in the

city of Jerusalem (your present city) until ye be endued with power from on high” (Luke 24:49) must be obeyed. Many Christians claim the experience of Acts 2:4, but they have not attained the experience provided for in Luke 24:49. The progress so far is fine, but the deceiver still has many of us lulled to sleep, deluded, and self-satisfied, far from the goal Jesus intended for us to reach. I once owned an airplane, but owning an airplane and getting the motor going so it will take off with its own power are two different things. If you have the Holy Spirit, He still may not have sufficient sway in your life for you to have the advanced experience of power and the gifts of the Spirit. Many do not seek God far enough, and in quite the right manner to allow the Holy Spirit to exert His power, even though He has been received. Every evidence points to the fact that the early church and apostles put into practice what the church has failed to do today. Therefore, they had an experience that overshadows ours. Every single new testament church was founded in fasting and prayer. Acts 14:23. After Jesus said, “I send the promise of the Father upon you” He also told them, “Tarry . . . until ye be endued with power.” Where there is a lack of perfection and refinement among God’s people, as there is today, this power and the gifts of the Holy Spirit cannot very well be received by prayer alone. (If they can be received in this manner, I ask, where are they? Even in the days of the apostles, they too, found it necessary at times to employ this method to arrest the flesh and become refined in order to receive this power. They were in a state of perfection that far exceeded ours today. We believe many put into practice the prophet’s-length fast and obtained the power and gifts. Without following their example and deeds, we are without their mighty experiences. Consecrated fasting acts as a refining fire to the saint of God, and enables him to become purified and cleansed to such an extent he can obtain the power and the gifts of the Spirit. It actually requires a further process of purification and sanctified living to obtain and retain the gifts of the Spirit than otherwise. The best means of reaching that goal is to do as Paul asked us to do, follow him “in fastings often.” This volume endeavors to take what has generally been overlooked, and reveal, perhaps for the first time in detailed form, the secret of the early church. It is made so simple and easy of accomplishment that anyone can have an experience as dynamic as those of any of the apostles and followers of Jesus Christ.

In *An Introduction to Psychological Assessment and Psychometrics*, Keith Coaley outlines the key ingredients of psychological assessment, providing case studies to illustrate their application, making it an ideal textbook for courses on psychometrics or psychological assessment. New to the Second Edition: Includes occupational and educational settings Covers ethical and professional issues with a strong practical focus Case study material related to work selection settings End of chapter self-assessments to facilitate students’ progress Complaint with the latest BPS Certificate of Testing curriculum Electronic inspection copies are available for instructors.

An Introduction to Real Estate Finance serves as the core of knowledge for a single-semester first course in real estate finance. Unlike other real estate finance textbooks, with their encyclopedic but often stale details, it combines a short traditional text with a living website. The book gives students and professors highly applied information, and its regularly updated online features makes it especially useful for this practitioner-oriented audience. It covers fundamental topics such as accounting and tax, mortgages, capital markets, REITs and more. It also addresses the 2008 financial crisis and its impact on the real estate profession. This text is a valuable companion for students of real estate finance as well as financial analysts, portfolio managers, investors and other professionals in the field. Offers a concise, efficient, "finance-centric" alternative to traditional real estate finance texts Website gives readers the tools to find current information about their own areas of specialization—a unique approach not found in other real estate finance textbooks Gives students and professors the material to examine every subject in broad and highly detailed terms
