"MRCP Part 2 Self-Assessment" is the perfect revision aid. Drawn from the highly successful Medical Masterclass material from the Royal College of Physicians of London, this concise volume is specifically designed to cover the topics and format found in the Membership to the Royal College of Physicians (MRCP) Part 1 examination. The large scale, lavishly illustrated, full-colour format makes it easy to comprehend complex topics. With contributions from an extensive list of prestigious and authoritative professionals, the questions cover all areas of assessment, including the scientific background the medicine, general clinical skills, acute medicine and a range of specialties. It is ideal for examination MRCP candidates, doctors preparing for the European Diploma in internal medicine and junior doctors wanting to revise their knowledge and skills. This collection of self-assessment questions and explanatory answers has been drawn from Medical Masterclass, which is produced and published by the Royal College of Physicians of London. The questions have been specifically written to help doctors in their first few years of training to test and revise their medical knowledge and skills; and in particular to pass postgraduate examinations, such as the MRCP(UK)' - John D Firth, in the Introduction.

This second edition of a bestseller provides a practical, user-friendly manual guiding the theory and practice of cardiac electrophysiology. The handbook provides the specialist in training with a thorough grounding procedures, and clinical findings for clinicians. It provides a review of the main kinds of arrhythmia with illustrations of typical ECG findings supported where appropriate by correlative imaging. It also details the principal diagnostic and therapeutic procedures include implantation of pacemakers, resynchronization therapy, and ablation techniques. A family tragedy—the loss of his youngest brother at age eighteen from an osteosarcoma of the skull—triggered Dr. Drouin's interest in studying medicine. Unsatisfied with the model of healing he encountered in medical school, he explored many other models of medicine that eventually led him to practice what is now called integrative medicine. He soon realized that for these complementary medicines to be accepted and integrated into our health care system, they must be scientifically recognized and become part of the curriculum in medical schools. The entire foundation of our approach to health and disease must be redefined through a deeper understanding of reality as described by quantum physics. Dr. Drouin's initial quest has evolved into the creation of a medical and natural medicine curriculum that embraces this new paradigm of healing and the foundation of the International Quantum University for Integrative Medicine (Quantum University). The cost of an incomplete model of understanding in medicine has enormous consequences in the management of chronic and mind-related disease. Creative integrative medicine addresses the real questions and offers a solution to the present crisis in health care. "Dr. Paul Drouin is a true hero for writing this long overdue book. Finally, people are being told the truth about health, healing, and alternative treatments. This book has sound scientific proof to empower you back to true 'health' care instead of 'sick' care. Read and learn." —Joe Dispenza, DC, New York Times best-selling author of You Are the Placebo and Evolve Your Brain

Oxford Specialty Training is a specialty revision series for postgraduate trainees taking into account the training structures and syllabuses and the busy lives of junior doctors. Training in Medicine is a complete guide to early years specialty training in medicine, and particularly focuses on core medical training. Essential for those taking the MRCP, the book covers all of the relevant areas in general medicine training, including epidemiology, evidence based medicine, and professional related issues. Each chapter covers the basic science and clinical topics

Get Free Medical Masterclass Free Ebooks About Medical Masterclass Or Read Online Viewer Search Kindle And Ipad Ebook

which trainees are required to learn as part of their basic training and demonstrate in the MRCP. This book is authored by both trainees and specialists, and has been comprehensively edited and peer-reviewed by both groups in order to create an authoritative yet accessible text. Easy navigation is combined with discrete double-page spreads on individual topics allowing rapid access to information, making the book extremely useful in clinical practice. This is complemented by over 600 full colour illustrations, including high quality clinical photographs, images and diagrams, to aid visual memory of the topics. Breakout boxes highlight the key learning points. The organisation of the material is unique, and the topic-based design ensures easy navigation, and structured revision and learning.

Medicine for MRCP provides a comprehensive review of the material that you need to pass the MRCP Parts 1 and 2 written papers. The twenty-seven chapters mapped out to the RCP syllabus, cover all areas from molecular medicine and genetics, through to medical law and ethics. Written by specialist contributors and educational experts, the content is carefully crafted to build your understanding for both papers. Each chapter begins with the basic science required for Part 1, before covering clinical medicine for Part 1, Part 2 and the PACES examinations. To ensure effective revision, material is presented in short sections with bullet lists, tables, and boxes. Over 150 drawings and photos illustrate key principles and clinical topics making them easier to retain. References to evidence-based protocols and directions to further reading allow for deeper understanding. Candidates can review their progress via the 180 end-of chapter self-assessment questions. Drawing on the authors' expertise, Medicine for MRCP is the ideal companion for the MRCP as well as a useful reference guide for practicing medical doctors.

This spin-off from Stephen M. Stahl's new, completely revised, and fully updated sixth edition of the Prescriber's Guide covers the most important drugs in use today for treating depression. Now established as the indispensable formulary in psychopharmacology, easy to navigate and easy to use, the Prescriber's Guide combines evidence-based information with clinically informed guidance to support clinicians in making the most effective prescribing decisions for the good of their patients. Incorporating information on the newest indications, new formulations, new recommendations and new safety data, this edition continues to provide the essential practical support required by anyone prescribing in the field of mental health.

From reviews of the previous edition: 'Provides a wealth of information ... graphically illustrates the need for practitioners to be thoroughly knowledgeable.' Toni Belfield, Director of Information, Family Planning Association. The world's population is increasing dramatically. At levels over 7 billion, rising annually by over 83 million (with births outstripping deaths by a factor of c. 2.4) the toll this imbalance takes on the environment, developing economies and resources (healthcare, education, rates of poverty) and the lives of women in the poorer parts of the world is increasingly unsustainable. Even in the developed world there is still an unacceptably high rate of unplanned pregnancies, demonstrating that appropriate education at both local and global levels about the full range of available contraception is essential. Using a highly accessible question-and-answer format, John Guillebaud and Anne MacGregor seek to ensure everything needed for good family planning practice is here in this book. Now in its seventh edition and online via ExpertConsult, Contraception: Your Questions Answered remains the market-leading, one-stop resource for family planning professionals worldwide. Question and answer format Important information boxes Unwanted side effects boxes

Sport Cyberpsychology is the first book devoted to assessing the influence of technology on human interaction, behaviour and mental health in a sport context, gathering research on the use of technology and the Internet by athletes, coaches and sport science support staff. The book identifies the potential impact of technology on athletes' mental preparation for competition, as well as the role of technology in improving performance. It explores the use of technology by athletes and sport organisations for social interaction, while also considering the 'darker' side of athletes' Internet use. It covers topics including: the role of GPS, gaming and virtual reality in training and injury recovery the use of social media by athletes and sport organisations the psychology of self-presentation and brand management, as well as issues of online privacy the use of technology by other elite groups, such as military and medical personnel, and non-elite sportspeople cyberbullying and online harassment of athletes online gambling and athletes' mental health in relation to their online activities virtual learning environments and the educational opportunities the online world can offer athletes Accessibly written, with a companion website featuring lecture slides, reading lists, video links and suggested social media accounts, Sport Cyberpsychology offers a complete resource for students and instructors alike. It is important reading for any students of sport psychology, sport coaching or sport media, as well as coaches, athletes and sport science support staff.

This new revision guide with over 1500 questions, reasoned answers and links to explanatory text gives a comprehensive range of multiple choice questions (MCQs) and extended matching items (EMIs). Complete with sample papers, this book provides everything you need for the written parts of the MRCPsych and comparable higher postgraduate examinations in psychiatry. Contains over 550 MCQs and 350 EMIs divided into syllabus topics Includes full-length sample exam papers for Parts 1, 2 and 3 of the MRCPsych Challenging questions written to bring out key learning points Full, detailed answers and links to revision and remediation Prepared by experienced teachers and writers of examination questions This book is essential for all psychiatrists preparing for the written MRCPsych and similar examinations, allowing candidates to approach the exam with confidence.

A state-of-the-art reference on educational ethnography edited by leading journal editors This book brings an international group of writers together to offer an authoritative state-of-the-art review of, and critical reflection on, educational ethnography as it is being theorized and practiced today—from rural and remote settings to virtual and visual posts. It provides a definitive reference point and academic resource for those wishing to learn more about ethnographic research in education and the ways in which it might inform their research as well as their practice. Engaging in equal

measure with the history of ethnography, its current state-of play as well as its prospects, The Wiley Handbook of Ethnography of Education covers a range of traditional and contemporary subjects—foundational aims and principles; what constitutes ‘good’ ethnographic practice; the role of theory; global and multi-sited ethnographic methods in education research; ethnography’s many forms (visual, virtual, auto-, and online); networked ethnography and internet resources; and virtual and place-based ethnographic fieldwork. Makes a return to fundamental principles of ethnographic inquiry, and describes and analyzes the many modalities of ethnography existing today Edited by highly-regarded authorities of the subject with contributions from well-known experts in ethnography Reviews both classic ideas in the ethnography of education, such as “grounded theory”, “triangulation”, and “thick description” along with new developments and challenges An ideal source for scholars in libraries as well as researchers out in the field The Wiley Handbook of Ethnography of Education is a definitive reference that is indispensable for anyone involved in educational ethnography and questions of methodology.

This book is a compact, evidence-based, readable book that offers a useful update on smoking cessation. It lists important historical landmarks in tobacco control and illustrates some of the current measures to limit tobacco use in different countries. It summarises the main pharmacokinetic and pathophysiological, effects of smoking / nicotine on the central nervous system and cardiovascular system, before describing the effects of the different pharmacotherapies currently available to help smokers stop. Further sections describe how important smoking and smoking cessation is to particular groups of patients, how they should be best approached and the benefits of smoking cessation specific to their illness.

This is the story of Mary Slessor, a petite redhead from the slums of Dundee who became one of the most influencing people in the land known to her compatriots as 'the white man's grave'. Despite her eccentricities, this woman truly understood and connected with the Africans among whom she lived, so much so that the British government appointed her their first woman magistrate anywhere in the world and later awarded her the highest honor then bestowed on a woman commoner. Examining both the era and the influence of this extraordinary woman, the book reveals aspects of her public and private life that has previously been unanswered.

How do electrical activity and calcium signals in neurons influence the secretion of peptide hormones? This volume presents the current state of knowledge regarding the electrical, calcium signaling and synaptic properties of neuroendocrine systems from both vertebrate and invertebrate systems. The contributions span in vivo and in vitro studies that address: state-dependent plasticity, relevance of firing patterns, membrane properties, calcium flux (including dynamic imaging and homeostasis), and molecular mechanisms of exocytosis, including from non-neuronal secretory cells. The chapters focus not only on research results but also on how experiments are conducted using state-of-the-art techniques, and how the resulting data are interpreted. While there are many books on the secretory properties of neurons, this is the first

Get Free Medical Masterclass Free Ebooks About Medical Masterclass Or Read Online Viewer Search Kindle And Ipad Ebook

to focus on the distinctive secretory properties of neuroendocrine neurons. Accordingly, it offers an important text for undergraduate and graduate neuroscience students, and will also appeal to established scientists and postdoctoral fellows. This is the eighth volume in the Masterclass in Neuroendocrinology series* - now a co-publication between Springer Nature and the INF (International Neuroendocrine Federation). *Volumes 1-7 published by Wiley

Designed to help medical students through their exams. Built around the successful 'Essential Revision Notes for MRCP', this title focuses on what is essential learning for medical undergraduates and gives readers an 'all round' knowledge of medicine at this level.

This book provides a question-based synopsis of family planning issues.

Acute Medicine offers an accessible and concise guide to the practical management of all acute medical problems likely to be encountered in the emergency department, ambulatory care centre, acute medical unit or on the wards. Reflecting the maturation of acute medicine as a separate specialty, the book is divided into common presentations, specific problems and procedures. New to the fifth edition is a chapter on bed-side ultrasonography; throughout, emphasis is placed on patient safety, and the use of flow diagrams, tables and figures ensures that key information is quickly accessible. Thoroughly revised by experts in the subject, and updated to reflect current approaches to diagnosis and management, Acute Medicine is an excellent companion for the trainee as well as an aide-mémoire for the more experienced physician.

Cases for PACES provides a concise study aid to Part II of the MRCP examination; the Practical Assessment of Clinical Examination Skills or PACES. The new edition of this very popular study guide has been completely updated, and now includes scenarios for Station 5, introduced in October 2009. Featuring a 'case study' format that matches the style of the exam, it includes all the essential information - perfect for on-the-ward revision and study. Written by authors who remember their own PACES examination, their experience in learning and teaching PACES is condensed to provide exactly what you need to know to pass. With its informal style, Cases for PACES is also ideal for self-directed learning in groups, and will help you hone your clinical skills and boost your confidence in the run-up to the examination. For more titles to help you prepare for MRCP examinations go to <http://www.wileymedicalstudent.com/> www.wileymedicaleducation.com/a

2013 BMA Medical Book Awards Highly Commended in Primary Health Care! Now in edition 6, Contraception: Your Questions Answered has been completely revised and updated to incorporate all the latest information about contraception methods, effectiveness, mechanisms, side-effects and complications. Popular question and answer format

The education system has been an interesting topic for decades now. If you want to monitor the progress of a country, start by checking how good its education system is. This book not only exposes the flaws of the education system but also unpacks how these flaws can lead a person to be easily manipulated, economically, socially, culturally and politically. If you are the kind of person who wants to understand how this manipulation works, this book is perfect for you. Prepare and protect yourself from these thought control tactics. Ultimately, it's a matter of personal choice: You can buy pack of cigarettes, a bottle of vodka, a large size family pizza, etc., for the price of this book, or you can experience this one of a kind book which makes you go, HOLY SH*T and use these learnings for the rest of your life. Don't let the authorities, control your thoughts and your choices.

Simulation in Surgical Training and Practice is reviewed extensively in this important Surgical Clinics of North America issue.

Articles include: Applying Educational Theory to Simulation Based Training and Assessment in Surgery; Figuring out Team Simulation Training; Faculty Development for Simulation Training; The Evolving Role of Simulation in Teaching Surgery in

Respiratory Care: Patient Assessment and Care Plan Development, Second Edition describes the purpose of patient assessment and then guides the reader through the process of reviewing existing data in the medical record

MasterClass in Geography Education provides a comprehensive exploration of the major themes in geography education research and pedagogy, drawing on international research. The editor draws together a variety of professional, academic and practitioner perspectives to support professional development of geography teachers. The book incorporates discussion of the place of subject knowledge in geography, the role and function of research in geography education and the relationship between research and practice. Topics covered include: - research and professional practice - constructing geographical knowledge - ethical considerations - carrying out research projects MasterClass in Geography Education will be essential reading for all studying the teaching and learning of geography on PGCE and Education MEd/MA courses.

A comprehensive guide to religious education, ensuring a solid foundation for supporting effective learning and teaching. For more than 40 years, Rich's Vascular Trauma has been surgeons' #1 reference for the diagnosis and treatment of vascular injury in both civilian and military settings across the globe. Published in association with the Society for Vascular Surgery (SVS), the fully updated 4th Edition reflects recent changes in vascular injury patterns, wounds, and trauma care, drawing from current research and a wide variety of peer-reviewed publications to keep you up to date with the latest evidence-based management strategies and techniques. Written and edited by vascular surgeons who are also trauma specialists—civilian and military experts who have proficiency in both open-surgical and endovascular techniques—this must-have reference offers a global perspective on every aspect of the broad spectrum of vascular trauma. Covers all vascular surgery procedures required to stop hemorrhage and restore perfusion in vessels in the limbs, junctional areas, torso and neck, including damage control techniques such as shunting, and endovascular techniques such as REBOA and stenting. Addresses pre-hospital, emergency department, surgical, and endovascular stages of treatment in developed, austere and deployed settings, including a rich section on vascular trauma in multiple international settings that provides important context for the global surgical community. Includes nine new chapters covering prehospital management, endovascular suites, stent-grafts, selective aortic arch perfusion, extracorporeal systems and gathering evidence in vascular trauma, and more. Presents surgical techniques in step-by-step, highly illustrated detail, as well as high level, strategic decision-making such as the logistics of setting up an endovascular trauma service. Includes a new, rapidly digestible "Tips and Tricks" section summarizing how to execute essential vascular maneuvers and management steps to ensure that patients get the best outcomes. Emphasizes the current management of civilian vascular injuries while drawing upon the best available evidence, experience, and lessons learned from Afghanistan, Iraq, and the "urban battlefield." Contains an innovative chapter on the systems approach and quality improvement in vascular trauma, offering information and tactics for all providers wishing to understand how clinical systems underpin patient outcome and recovery.

Can you adapt to the wide variety of learning environments in medicine? Can you learn for exams at the same time as training to be a doctor? Can you stay focused on the future while getting today's job done? Can you achieve a life-work balance? How to Succeed at Medical School will help you learn these vital skills, and much more. This excellent guide to the study skills essential for surviving and thriving at medical school gives you insight into what to expect, covering the early days right through to clinical attachments. With case studies, illustrations, quotes from other students, tip boxes, exercises, portfolios, and learning techniques to help you communicate and to study and revise — it's jam-packed to help you succeed! Written by experienced medical school teachers, this is your guide from the start of medical school to the
