This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters authored by leaders in the field are organized around nine themes: *Background of Arabic Language Teaching; *Contexts of Arabic Language Teaching; *Communicative Competence in Arabic; *The Learners; *Assessment; *Technology Applications; *Curriculum Development, Design, and Models; *Arabic Language Program Administration and Management; and *Planning for the Future of Arabic Language Learning and Teaching. The Handbook for Arabic Language Teaching Professionals in the 21st Century will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around the world. It is intended to create dialogue among scholars and professionals in the field and in related fields--dialogue that will contribute to creating new models for curriculum and course design, materials and assessment tools, and ultimately, better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic speaking countries.

Although Microsoft goes to some pains to hide it, Office 2003 has a split personality. The gnomes of Redmond toil feverishly to deliver features aimed at helping connect information workers to expensive and complex corporate servers. They're just following the money. Most of the revenue in the Office division comes from corporate customers. Microsoft sells Office desktop licenses by the tens of thousands to corporations, which then take their own sweet

time to deploy the software. As of last July, nearly a year after the release of Office 2003, Information Week cited Microsoft estimates that about a third of its Office installed base was running Office XP, and an even higher percentage were running Office 2000 and even Office 97. Although the majority of its corporate customers have purchased licenses for Office upgrades that entitle them to use Office 2003, they're still using older versions, and many have no firm plans to switch to the most recent version. Meanwhile, the least heralded edition of Office 2003 has crept to the top of the sales charts and stayed there.; In its most recent report, covering the end of February, NPDTechworld reported that Office 2003 Student and Teacher Edition is the #1 best-selling software program in the Business category. (The Office 2003 Professional upgrade was #4.) On the All Categories list, Office 2003 Student and Teacher Edition is the only productivity program to make the top 10.
