'English Grammar and Writing Skills' has been designed for use as a textbook for school students and those in higher secondary. The book has been planned, keeping in mind the needs of the students, and is aligned to the CBSE and SSC boards. The exercises in each chapter will help the students prepare for their examinations. The book introduces the student to grammar concepts, step by step, and is rich in examples. The exercises are meant to reinforce the understanding of the concepts. At the end of the study, students will be pleasantly surprised by their improved understanding of the subject.

Madness, sexuality, power, knowledge—are these facts of life or simply parts of speech? In a series of works of astonishing brilliance, historian Michel Foucault excavated the hidden assumptions that govern the way we live and the way we think. The Archaeology of Knowledge begins at the level of "things aid" and moves quickly to illuminate the connections between knowledge, language, and action in a style at once profound and personal. A summing up of Foucault's own methodological assumptions, this book is also a first step toward a genealogy of the way we live now. Challenging, at times infuriating, it is an absolutely indispensable guide to one of the most innovative thinkers of our time.

R. K. Narayan (1906—2001) witnessed nearly a century of change in his native India and captured it in fiction of uncommon warmth and vibrancy. Swami and Friends introduces us to Narayan's beloved fictional town of Malgudi, where ten-year-old Swaminathan's excitement about his country's initial stirrings for independence competes with his ardor for cricket and all other things British. Written during British rule, this novel brings colonial India into intimate focus through the narrative gifts of this master of literary realism.

Principles of Physics is a well-established popular textbook which has been completely revised and updated.

"Friday the 13th" meets "Visitor Q." Apehit is Mellick's love letter to the great and terrible B-horror movie genre. Six trendy teenagers (three cheerleaders and three football players) go to an isolated cabin in the mountains for a weekend of drinking, partying, and crazy sex, only to find themselves in the middle of a life and death struggle against a horribly mutated psychotic freak that just won't stay dead. Mellick parodies this horror cliché and twists it into something deeper and stranger. It is the literary equivalent of a grindhouse film. It is a splatter punk's wet dream. It is perhaps one of the most fucked up books ever written. If you are a fan of Takashi Miike, Evil Dead, early Peter Jackson, or Eurotrash horror, then you must read this book.

Jaishankar Prasad's epic poem Kamayani (1936) is a feast for intellectuals. It operates at three different levels: the gross or mythological, the emotional and the spiritual. Prasad infused the vision of a rishi, a sage, into this work. The reader experiences poetic currents of human emotions - anxiety, hope, desire, love, shyness, sorrow, conflict - and finally emerges at an elevated level of consciousness.

Phatik Chakravorti was ringleader among the boys of the village. A new mischief got into his head. There was a heavy log lying on the mud-flat of the river waiting to be shaped into a mast for a boat. He decided that they should all work together to shift the log by main force from its place and roll it away. The owner of the log would be angry and surprised, and they would all enjoy the fun. Every one seconded the proposal, and it was carried unanimously.

This book is specially designed as a course book for the non-Marathi speaking adult learners of Marathi language. This course has been tried out by the authors themselves. They have taught it in various Marathi-language teaching programmes to learners from different disciplines and occupations. All the lessons in it are situation oriented and it serves the purpose of providing cultural set-up of Marathi language. All of them are organized according to the gradation of the structural units given at the beginning of every lesson. These lessons are followed by grammatical notes. The grammatical notes, if followed in sequence will debit the structure of the pedagogical grammar of current Marathi. Every lesson is equipped with various drills and exercises for the practice and for guessing the purpose of the learners. At the end of every lesson a special conversational paragraph is added for giving the feel of free usage of Marathi. An important and unique feature of this book is the special script book added to it in the beginning. It contains eighteen chapters for script teaching. Here-in the letters are graphed according to the principle of shape similarity. The author have taken pains to demonstrate all the possible strokes, their sequences and the direction of writing them. The four appendixes given at the end are quite useful. The vocabulary and the solution of all the exercises especially will be useful learning aids for the self learners as well.

THERE is a small village on the river Madhumati. On account of its being the residence of wealthy zemindars it is regarded as a village of importance. One Chaitra afternoon the summer heat was gradually abating with the weakening of the once keen rays of the sun; a gentle breeze was blowing; it began to dry the perspiring brow of the peasant in the field and play with the moist locks of village women just risen from their siesta. It was after such a siesta that a woman of about thirty was engaged in her toilet in a humble thatched cottage. She took very little time to finish the process usually so elaborate with womankind; a dish of water, a tin-framed looking-glass three inches wide, and a comb matching it sufficed for the task. Then, a little vermilion adorned her forehead. Last of all some betel leaves dyed her lips. Thus armed, a formidable champion of the world-conquering sex set out with a pitcher in her arm and pushing open the wattled gate of a neighbouring house entered within it. There were four huts in the house which she entered. They had mud floors and bamboo walls. There was no sign of poverty anywhere, everything was neat and tidy. The four huts stood on the four sides of a quadrangle. Of these three had entrances opening on the yard, the fourth opened outwards. This last was die reception room, while the others, screened on all sides, constituted the zenana. Some brinjals and salads were growing on the carefully tilled plot of land in front of die raised terrace before the outer room. The whole was enclosed by a reed fence with a bamboo gate. So the woman could easily make her way into the house. It is superfluous to add that she went straight towards the zenana. I know not where the other inmates of the house had gone after their siesta, but at that time diere were only two persons there—one, a young woman of eighteen bent over her embroidery and a child of four immersed in play. His elder brother had wilfully left his ink-pot behind when going to school. The child's eyes had fallen on it, and he was joyfully smearing his face with die ink. He seemed to be afraid of his brother coming back and snatching the ink-pot away, and so he was emptying the pot. The newcomer sat down on the floor by the side of her who was working and asked, "What are you doing?"

Geometric constructions have been a popular part of mathematics throughout history. The first chapter here is informal and starts from scratch, introducing all the geometric constructions from high school that have been forgotten or were never learned. The second chapter formalises Plato's game, and examines problems from antiquity such as the impossibility of trisecting an arbitrary angle. After that, variations on Plato's theme are explored: using only a ruler, a compass, toothpicks, a ruler and dividers, a marked rule, or a tomahawk, ending in a chapter on geometric constructions by paperfolding. The author writes in a charming style and nicely intersperses history and philosophy within the mathematics, teaching a little geometry and a little algebra along the way. This is as much an algebra book as it is a geometry book, yet since all the algebra and geometry needed is developed within the text, very little mathematical background is required. This text has been class tested for several semesters with a master's level class for secondary teachers.
