Kautilya, also known as Chanakya, is India s most illustrious political economist of all time. He regarded economic activity as the driving force behind the functioning of any political dispensation. In fact, he went to the extent of saying that revenue should take priority over the army because sustaining the army was possible out of a well-managed revenue system.Kautilya advocated limiting the taxation power of the State, having low rates of taxation, maintaining a gradual increase in taxation and most importantly devising a tax structure that ensured compliance. He strongly encouraged foreign trade, basing it on the

premise that for a successful trade contract to be established, it had to be beneficial to all. He emphasised State control and investment in land, water and mining. Kautilya was a true statesman who bridged the gap between experience and vision. For Kautilya, good governance was paramount. He suggested built-in checks and balances in systems and procedures for the containment of malpractices. Many postulates of Kautilya's philosophy of political economy are applicable to contemporary times.

MAHARASTRA HSC QB Malcolm Forbes said "Education's purpose is to replace an empty mind with an open one" and this is something which is always followed by Maharashtra State Board of Secondary & Higher Education (MSBSHSE). Education is the most effective tool and a medium of human development. It changes the mindsets through a continuous process involving, research, experiment and innovation. Education is that source by which socially and economically marginalized children and adults can lift themselves out of poverty. Jawahar Navodaya Vidyalayas or JNVs are fully residential and co-educational schools affiliated to CBSE with classes from VI to XII standards. These JNVs are specifically tasked to find talented children in rural areas of India and provide them with an education equivalent to the best residential school system, without regard to their families' socio-economic condition.

Rakesh plants a cherry seedling in his garden and watches it grow. As seasons go by, the small tree survives heavy monsoon showers, a hungry goat that eats

most of the leaves and a grass cutter who splits it into two with one sweep. At last, on his ninth birthday, Rakesh is rewarded with a miraculous sight—the first pink blossoms of his precious cherry tree! This beautifully illustrated edition brings alive the magical charm of one of Ruskin Bond's most unforgettable tales. This book aims to provide an overview of the design, limitations and challenges of heterogeneous catalysts for energy applications.

"The strongest man in the world is the one who stands most alone." The plot of Ibsen's play is relevant more than 125 years after its 1882 publication. Natural springs found in a little Norwegian village are about to put the town on the map until a physician outs a powerful area business that is poisoning the water. Unfortunately, the media is complicit with local government in suppressing the study and when the scientist himself offers to lecture no one will rent him a forum. In short, when the scientist bucks local interests he becomes a pariah to the lightly-educated and easily-manipulated majority in the town, "an enemy of the people." Handier than the free PDFs on the web, this you can hold, bookmark, highlight and shelve. An inexpensive imperative for any history-, economics-, or political- buff.

As the global economy turns more and more service oriented, Information Technology-Enabled Services (ITeS) require greater understanding. Increasing numbers and varieties of services are provided through IT. Furthermore, IT enables the creation of new services in diverse fields previously untouched. Because of the catalyzing nature of internet technology, ITeS today has become more than "Outsourcing" of services. This book illustrates the enabling nature of ITeS with its entailment of IT, thus contributing to the betterment of humanity. The scope of this book

is not only for academia but also for business persons, government practitioners and readers from daily lives. Authors from a variety of nations and regions with various backgrounds provide insightful theories, research, findings and practices in various fields such as commerce, finance, medical services, government and education. This book opens up a new horizon with the application of Internet-based practices in business, government and in daily lives. Information Technology-Enabled Services works as a navigator for those who sail to the new horizon of service oriented economies.

While the standard solid state topics are covered, the basic ones often have more detailed derivations than is customary (with an emphasis on crystalline solids). Several recent topics are introduced, as are some subjects normally included only in condensed matter physics. Lattice vibrations, electrons, interactions, and spin effects (mostly in magnetism) are discussed the most comprehensively. Many problems are included whose level is from "fill in the steps" to long and challenging, and the text is equipped with references and several comments about experiments with figures and tables.
