

Neil Armstrong Young Flyer Childhood Of Famous Americans

A write-in activity book for young children, full of mazes, dot-to-dot, drawing, colouring, stickering, spot-the-difference, counting, spotting and matching activities - all themed around space. An interactive way for children to find out about what's out in space, with exciting space facts and lots of space-related vocabulary. Illustrations: Full colour throughout WARNING! Not suitable for children under 36 months because of small parts. Choking Hazard.

Focuses on the childhood of the dynamic president, describing how Teddy worked hard to improve his poor health and developed a lifelong interest in nature and the conservation of natural resources.

First man on the Moon Neil Armstrong reveals the adventure of the first Moon landing, and how the Earth and the Moon came to be, in this unique non-fiction picture book. A young boy sits up in bed and gazes at the distant Moon through his window. He wonders if, one day, a human will stand on its surface and look back at the Earth. But Earth is already being studied from the Moon. An all-seeing Moon rock of almost impossible age, called Bok, has been looking down at our blue and green planet for millennia. Geologists - people who study rocks - have a saying: 'Rocks remember'. During his time, Bok has witnessed some truly wondrous things. Created in the Earth-shattering collision 4.5 billion years ago that led to the formation of the Moon, he has seen stars burst into being and meteors streak through the solar system. He has seen his own Moon surface be transformed with craters, and he has watched a fiery, volcanic planet transform into the haven we know today - as mountain ranges rose up, oceans appeared and dinosaurs roamed the Earth. And he found himself rudely awoken one early lunar morning by a strange creature picking him up and throwing him into a box. That is how Bok and Neil Armstrong first met, and this is their (true) story.

Young Chris is an astronaut. A very busy astronaut. Saving the planet from aliens is much more important than taking baths or going to bed. Because at bedtime the worst sort of alien appears - darkness. But when Chris watches the first moon landing on TV, he discovers that there is a dark out in Space that is much darker than he's used to. It's the darkest dark ever, and he realizes that the unknown can be . . . exciting! The Darkest Dark is the debut picture book by Commander Chris Hadfield, international bestselling author of *An Astronaut's Guide to Life on Earth* and *You Are Here*, with spectacular illustrations by illustration team The Fan Brothers. Inspired by Chris's decision to become an astronaut after watching the Apollo 11 moon landing at age nine, *The Darkest Dark* is an inspiring story about facing your fears and following your dreams.

Alphabetically arranged, illustrated articles cover explorers and themes of exploration--institutions, science and technology, and general topics--from ancient times to the present day.

Artfully curated by James R. Hansen, *A Reluctant Icon: Letters to Neil Armstrong*

is a companion volume to *Dear Neil Armstrong: Letters to the First Man from All Mankind*, collecting hundreds more letters Armstrong received after first stepping on the moon until his death in 2012. Providing context and commentary, Hansen has assembled the letters by the following themes: religion and belief; anger, disappointment, and disillusionment; quacks, conspiracy theorists, and ufologists; fellow astronauts and the world of flight; the corporate world; celebrities, stars, and notables; and last messages. Taken together, both collections provide fascinating insights into the world of an iconic hero who took that first giant leap onto lunar soil willingly and thereby stepped into the public eye with reluctance. Space enthusiasts, historians, and lovers of all things related to flight will not want to miss this book.

This space-soaring adventure lets young children glimpse what it would be like to fly into outer space, walk on the moon, and look back at Earth from a very long way away. Part of the Usborne Reading Programme developed with reading experts at the University of Roehampton, specially written for children just starting to read alone. This ebook includes audio and reading-related puzzles. "Crack reading and make confident and enthusiastic readers with this fantastic reading programme." - Julia Eccleshare

This lively, fictionalized biography of Ronald Reagan explores the early years of a boy who would grow up to become known to millions a movie star—and later as America's fortieth president.

Examines the life of the scientist Marie Curie, her background, and her discovery of radium.

Profiles Neil Armstrong (1930-) as part of the StarChild learning center site for young astronomers, a service of the NASA High Energy Astrophysics Science Archive Research Center. Details Armstrong's career as an astronaut. Highlights Armstrong's lunar landing.

Dear Reader: The *Childhood of Famous Americans* series, sixty-five years old in 1997, chronicles the early years of famous American men and women in an accessible manner. Each book is faithful in spirit to the values and experiences that influenced the person's development. History is fleshed out with fictionalized details, and conversations have been added to make the stories come alive to today's reader, but every reasonable effort has been made to make the stories consistent with the events, ethics, and character of their subjects. These books reaffirm the importance of our American heritage. We hope you learn to love the heroes and heroines who helped shape this great country. And by doing so, we hope you also develop a lasting love for the nation that gave them the opportunity to make their dreams come true. It will do the same for you. Happy Reading! The Editors

John Muir was a Scottish-American naturalist, author, and early advocate of preservation of wilderness in the United States. His activism helped to preserve Yosemite Valley, Sequoia National Park and other wilderness areas. The Sierra Club, which he founded, is still active today. The John Muir Trail is a 211-mile hiking trail in the Sierra Nevada. Now readers can explore how his childhood influenced his life. As a young boy, Neil Armstrong had a recurring dream in which he held his breath and

floated high in the sky. He spent his free time reading stacks of flying magazines, building model airplanes, and staring through a homemade telescope. As a teenager, Neil worked odd jobs to pay for flying lessons at a nearby airport. He earned his student pilot's license on his sixteenth birthday. But who was to know that this shy boy, who also loved books and music, would become the first person to set foot on the moon, on July 20, 1969.

Samuel Langhorne Clemens is perhaps best known by his pen name Mark Twain. He was a writer of such classic American novels as *The Adventures of Tom Sawyer* and *The Adventures of Huckleberry Finn*. Twain grew up in Hannibal, Missouri, served as an apprentice printer, and wrote newspaper articles. Later he was a riverboat pilot on the Mississippi River before heading west to work as a miner. Eventually he settled on writing as a career. Mark Twain was born shortly after a visit by Halley's Comet, and he predicted that he would "go out with it", too. He died the day following the comet's return. Now readers can explore how his childhood influenced his life.

With more than 250 lists, home educators, private school teachers, and others will find important facts and essential information in one easy-to-use resource.

Age range 10+ Why do stars twinkle? How's the best way to start spotting constellations and comets? Is there life beyond Earth? What's the chance of a catastrophic collision with a killer asteroid? He's covered the big space questions for adults, now Australia's very own Astronomer-at-Large Fred Watson embarks on a grand tour of the Universe especially for children. From stargazing to telescopes, space travel to black holes, killer asteroids to aliens, Fred covers every question kids might ask about space — and then some! With incredible illustrations by Fred himself, and a quirky mix of mind-boggling facts, *Spacewarp* is a fascinating book that kids will love — and parents and friends will undoubtedly learn a thing or two as well!

A biography concentrating on the boyhood of the cartoonist and film maker who created Mickey Mouse and Donald Duck.

The early life of the American automotive industrialist who founded the Ford Motor Company and pioneered in assembly-line methods of mass production.

Presents the life and accomplishments of the African American track star who won four gold medals at the 1936 Olympics in Berlin, Germany, and dashed Hitler's hopes for an Aryan domination of the Games, focusing on his childhood.

Library Friendly Edition of original- This is non-fiction for very young children, who will find lots of things to look at and talk about in this highly visual book about space - what it is, where it is, and what's out there. Little ones can find out about planets, stars, asteroids, space travel and lots more - whilst learning lots of interesting new words.

The childhood of civil rights hero and Supreme Court Justice Thurgood Marshall comes to life in this engaging biography. Whenever Thurgood Marshall got into trouble at school, the principal would make him sit in the basement and read the US Constitution. By the time he was twelve, he had most of it memorized, and his interest in law had begun to take seed. In 1967 he was appointed to the US Supreme Court—the first African American to serve in that position. This essential new volume in the *Encyclopaedia of Sports Medicine* series, published under the auspices of the International Olympic Committee, provides a thorough overview of the unique physiologic characteristics, responsiveness to training, and possible health hazards involved in the training, coaching, and medical care of young athletes. Intense involvement in competitive sports often begins during childhood. During adolescence, many athletes reach their peak performance and some may participate in World Championships and Olympic Games at a relatively young age. *The Young Athlete* presents the available information

relevant to exercise and training in youth, reviewed and summarized by authors who are recognized as leaders in their respective fields. The Young Athlete is subdivided into seven parts covering: the physiologic bases of physical performance in view of growth and development; trainability and the consequences of a high level of physical activity during childhood and adolescence for future health; the epidemiology of injuries, their prevention, treatment, and rehabilitation; non-orthopedic health concerns including the pre-participation examination; psychosocial issues relevant to young athletes; diseases relevant to child and adolescent athletes; the methodology relevant to the assessment of young athletes. This valuable reference summarizes a large database of information from thousands of studies and is especially relevant to sports physicians, pediatricians, general practitioners, physical therapists, dietitians, coaches, students, and researchers in the exercise sciences.

You've probably heard of Neil Armstrong and his historic moon landing. But other than that part of his life, what else do you know about him? This biography book will discuss the life of Armstrong before he even became an astronaut. Do you share the same qualities as Neil Armstrong? Maybe you're destined for greatness too!

The most launched astronaut in history discusses his childhood growing up in rural Indiana, his career in the Air Force, and his time working at NASA, while offering an insider's account of the U.S. Space Shuttle program.

Bursting with fascinating facts and the latest breathtaking images, this space ebook for children brings the wonders of the Solar System to life. Find out about the never-ending storms on Jupiter. Learn about the towering volcanoes of Venus - all 1,600 of them, and see the Valles Marineris on Mars - a canyon that is ten times longer than Earth's Grand Canyon. Find out many more fascinating "super" facts about the cosmos with SuperSpace. Based on recent research and discoveries, SuperSpace showcases everything you need to know about the Universe - from the Big Bang to the formation of galaxies and planets as well as the technology used to explore its unimaginable depths. Fabulous cutaway artworks help to reveal the inner workings of the Sun, planets, and spacecraft. SuperSpace brings the cosmos to life in a visually compelling and informative way, making it a must-have book for every budding space enthusiast.

A narrative biography traces civil rights activist Rosa Parks' childhood and the influences that gave her the courage to stand up for her rights, causing her to become a symbol of the modern Civil Rights Movement. Simultaneous.

"A biography of Neil Armstrong's life--from his early childhood to walking on the moon and legacy."--

Using simple language that beginning readers can understand, this lively, inspiring, and believable biography looks at the childhood of Amelia Earhart. Illustrated throughout.

Presents the childhood of the astronaut who became the first man to walk on the moon.

"An extraordinary delight for a reader of any age." —The New York Times Book Review

Brian Floca explores Apollo 11's famed moon landing with this newly expanded edition of Moonshot! Simply told, grandly shown, and now with eight additional pages of brand-new art and more in-depth information about the historic moon landing, here is the flight of Apollo 11. Here for a new generation of readers and explorers are the steady astronauts clicking themselves into gloves and helmets, strapping themselves into sideways seats. Here are their great machines in all their detail and monumentality, the ROAR of rockets, and the silence of the Moon. Here is a story of adventure and discovery—a story of leaving and returning during the summer of 1969, and a story of home, seen whole, from far away.

Have you always wanted to explore the Moon like Neil Armstrong or the eleven other astronauts who have walked on its surface? You can tour the Moon from your own backyard with a small telescope or binoculars. This book will point you to the Sea of Tranquility (the landing spot for Apollo 11) and many other fascinating features you can spot on the Moon's surface. Beginning with the New Moon, as each day passes, an additional slice of the Moon becomes visible. With each new slice comes new craters, lunar seas and jagged mountain ranges. This easy-to-use, illustrated reference book enables everyone, young and old, to better appreciate our nearest neighbour in space. Learn about the early years of the first person to step foot on the moon, a historic feat he described as "one small step for man, one giant leap for mankind."

Neil Armstrong didn't grow up wanting to be an astronaut—because there were no astronauts in 1930. But he did love to fly from an early age, and after serving in the Korean War and then finishing college, he joined the organization that would eventually become NASA. As the first man to walk on the moon in 1969, his comment, "That's one small step for man, one giant leap for mankind," was heard by millions, and Neil Armstrong's influence on the world didn't stop there. From his early years in Ohio to his NASA career, to his later service as an aerospace professor and on Congressional panels, Neil Armstrong's life is a legacy to be admired, and this narrative biography illuminates his childhood. A brief biography of the man who was the first African American baseball player on a major league team, as well as the first African American elected to the Baseball Hall of Fame.

Suggests children's books for such topics as the Korean War, the civil rights movement, space exploration, the Vietnam War, multiculturalism, and the Persian Gulf War

One of the most popular series ever published for young Americans, these classics have been praised alike by parents, teachers, and librarians. With these lively, inspiring, fictionalized biographies -- easily read by children of eight and up -- today's youngster is swept right into history.

Shows how Jackie Robinson's superior athletic skills, coupled with his dignity and perseverance, helped to break the color barrier in professional sports.

An introduction to the life of astronaut Neil Armstrong, who was the first man to walk on the moon.

Raising Spiritual Children is a practical resource for parents who want to raise their children to be whole, healthy, and capable of using their spiritual gifts with wisdom. • What does it mean to have spiritual gifting? • How can we help our children learn to operate in a gifting that we ourselves may not have? • Why is nurturing courage so important? • What do we do when their dreams come to pass — especially if they are dreams about negative events in the future? This book answers these questions and many more. Not only will it help parents, grandparents, and spiritual mentors raise their children, but it will also help nurture readers' hearts. For more information, visit the book website, www.raisingspiritualchildrenbook.com.

Read Book Neil Armstrong Young Flyer Childhood Of Famous Americans

An authorized portrait of the first astronaut to set foot on the moon sheds light on other aspects of his career, from the honors he received as a naval aviator to the price he and his family paid for his professional dedication.
