designing for egress, evacuation, and life safety, Egress Design Solutions, Emergency Evacuation and Crowd Management Planning, is written by proven experts on egress issues. Meacham and Tubbs are engineers with Arup, an international firm with a stellar reputation for quality design and engineering. Their book examines egress solutions in terms of both prescriptive and performance-based code issues. A portion of the book focuses on techniques for providing egress design solutions and for coordinating egress systems with other critical life safety systems. Another part reviews historic and recent tragic life-loss fire events. As such, this is easily the most comprehensive take on the subject, written especially for architects.

Featuring a groundbreaking shift to a risk- vs. occupancy-based approach, the 2012 NFPA 99 ushers in a new era in health care safety! In response to an increasingly decentralized health care system, a growing array of high-tech procedures, and new security demands, the 2012 NFPA 99 has reinvented itself to reflect a new environment where it is the risk that a procedure poses to patients and staff, not the location where it is conducted, that defines safety guidelines. Its new title -- Health Care Facilities Code -- signifies that it is rewritten to make performance criteria for health care facilities more enforceable and adoptable. Completely reorganized, this new benchmark advances health care facility safety with major changes such as... \* A new risk-based framework \* A fully updated Chapter 5, Gas and Vacuum Systems, including additional maintenance requirements \* New chapters on security, fire protection,

and information technology \* Operating rooms are considered a wet location unless a risk assessment of the area determines otherwise. Move up to a new level of protection and keep facilities up-to-code and patients and staff safe from harm. The 2012 NFPA 99 is essential for engineers, facility managers...AHJs...plumbers...gas and vacuum system installers, designers, and verifiers...security personnel...insurance companies...and manufacturers.
