Understanding Business Global Edition by Nickels, McHugh, and McHugh has been the number one textbook in the introduction to business market for several editions for three reasons: (1) The commitment and dedication of an author team that teaches this course and believes in the importance and power of this learning experience, (2) we listen to our customers, and (3) the quality of our supplements package. We consistently look to the experts – full-time faculty members, adjunct instructors, and of course students – to drive the decisions we make about the text itself and the ancillary package. Through focus groups, symposia, as well as extensive reviewing of both text and key

ancillaries, we have heard the stories of more than 600 professors and their insights and experiences are evident on every page of the revision and in every supplement. As teachers of the course and users of their own materials, the author team is dedicated to the principles of excellence in business education. From providing the richest most current topical coverage to using dynamic pedagogy that puts students in touch with today's real business issues, to creating groundbreaking and market-defining ancillary items for professors and students alike, Understanding Business leads the way.

This book primarily deals with corporate restructuring through mergers and acquisitions (M&As). It critically examines all functions that must be performed in completing an M&A transaction. Domestic and cross-border M&A's are very similar in many respects even though differences between them also exist. The book includes discussions of international finance and multinational financial management, the topics that arise in cross-border M&A transactions. Given the increasing importance of China as the second largest economy in the world and Chinese companies' growing merger and acquisition (M&A) activities globally, we devote the last two chapters of the book to China's outward foreign direct investment and cross-border M&A activities. Moreover, the second volume includes the case studies regarding Chinese foreign direct investment both in Greenfield and acquisition forms give additional insights into challenging tasks of due diligence and post-merger cultural integration that foreign investors face. The M&A literature is a fragmented field of inquiry. The book brings together important, practical insights from this vast literature in a short, but cohesive form that has high managerial relevance.

All of us enjoy individually specific service or a product that is delivered for us only. Customer relationship management (CRM) is the area of expertise that helps companies to work with customers based on their specific needs or requirements. To reach success CRM systems implement the most powerful math and IT tools such as statistical analysis, artificial neural nets, and graph systems. This book deals with the practical implementation and meta-analysis of CRM experience in various locations and business areas. The authors have produced a great book and provided meta-analysis of the latest CRM systems and a roadmap of their development. In the chapters, our readers will find descriptive analysis of CRM models, applied tools, and methods.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times—for all the right reasons—but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. “Why should I put time into studying subjects I will never use in real life?” he protested. Without thinking, I responded, “Because if you don’t get good grades, you won’t get into college.” “Regardless of whether I go to college,” he replied, “I’m going to be rich.”

The economic growth and increasing Internet access within the countries of Brazil, Russia, India, and China (BRIC) is opening new opportunities for companies to reach wider audiences. This study examines these opportunities and assesses how global companies are capitalizing on these emerging markets - in particular, the degree to which digital marketing and social CRM through social networks are being used. For the purposes of this analysis, three German brands are examined in detail - BMW, Adidas, and NIVEA. The book shows that the regular interaction with Internet users and the monitoring of social networks can result in companies experiencing an uplift in both public perception and engagement. Another aspect addressed is the cultural variance that needs to be taken into account when planning social media activities. The book concludes that the full potential of social media has yet to be utilized within the BRIC countries, and that there is a unique opportunity to be realized by companies. Technology is a key driver behind the effects of contemporary globalization on business and other organizations worldwide. Understanding this phenomena in connection with the impact of cultural variations can help improve business and product life cycles in an era in which corporate capital and liquidity buffers must be increased for unexpected developments in global markets. Cultural and Technological Influences on Global Business is a leading publication in its field emphasizing the importance of deeply exploring the effects of cultures and technologies on the global business sector. This reference source is beneficial for professionals, researchers, and practitioners who wish to broaden their understanding of the direct relationship between culture and technology in the international business realm.

This volume brings together a collection of selected (and revised) articles that were presented at the 11th Learning and Technology Conference held by Effat University in Jeddah, Saudi Arabia, in February 2014. The conference is an annual event that explores the latest research and practice in innovative technologies and their impact on education. The contributions to this volume are all authored by practicing academics and research students, with the central theme the realisation that learning and teaching are strongly influenced by technology and innovation. Schools, colleges and academic institutes took the lead in harnessing this technology and created innovative opportunities for learning that did not exist before, one of which being the field of e-Learning. One of the latest innovations in education is the introduction of Massive Open Online Courses (MOOCs), which represents an interesting development in the use of technology and innovation by providing opportunities for learning to massive numbers of students (regardless of their location) at almost no cost. This phenomenon is subject to a great deal of analysis in this book, and will provide an interesting read for students, teachers, decision makers and ordinary people. A particular strength of this book is that the contributors are drawn from, and represent, a number of cultural backgrounds, which provides a range of insights that is often missing from other publications on such important subjects.
