beaten-path destination in the otherwise well-traversed Southeast Asia travel route. With the northern mountains covered in verdant jungle and sprinkled with age-old hill tribes, elephant camps, and ancient ruins, it is no wonder that the North is becoming an unforgettable experience for travelers. Laid back cities like Chiang Mai and Chiang Rai offer a burgeoning restaurant and nightlife scene that provides the perfect respite after experiencing the natural beauty of Northern Thailand. T. F. Rhoden has spent seven years exploring this fascinating country. First as a graduate student, then as a Peace Corps volunteer, and finally as an aid worker on the Thai-Burma border. Through his unique experiences, Rhoden provides insight into the country that has become his second home. With a comprehensive background section covering the history, culture, and logistics of travel, and sixteen sections dedicated to each stop on his recommended travel route, this book will allow travelers to feel like locals while enjoying the indisputable beauty that the North has to offer.

There is a common belief that until recently Americans have preferred isolation to interest in remote areas such as Southeast Asia. This thesis can be tested by examining the history of American relations with a place on the opposite side of the globe from the United States. Such a land is Sumatra. It is one of the largest islands in the world. Its 166,789 square mile area exceeds that of the third largest American state,

California, and is larger than Italy. Lying halfway around the world from the United States, its 1050 mile length is almost divided by the equator, which runs across it for 285 miles. Sumatra's strategic importance is two-fold. Firstly, it is the first island stepping stone from the Asiatic mainland into the Australasian archipelago. This was demonstrated in 1942 when the United States stationed planes on Sumatra in an attempt to stem the Japanese advance southward. Secondly, it lies athwart the shortest sea routes from Eastern Asia to Europe and the Eastern United States. Sumatra's southern tip forms one side of the Straits of Sunda which guards the access to the Java, China and Philippine Seas. At the island's northern tip is the entrance to the Straits of Malacca, the shortest sea lane between the Near and Far East. The opening of the Suez Canal in 1869 shifted the shortest route between the Far East and the Western World from the Sunda to the Malacca Straits.

East Africa is rapidly becoming one of the most popular areas in the world among the increasing numbers of travellers who are prepared to venture outside their own continent. of either heat or cold and with plenty of sunshine. Scenically the area is one of the most beautiful on earth with a marvellous variety of landscape. The beaches are vast and clean and unspoilt. But the outstanding attractions of East Africa, for most people, are its fascinating peoples and the unparalleled abundance of its wild life. This guide is the first of three planned to cover the whole region of East Africa. It deals with Kenya and Northern Tanzania. The other guides will deal with Uganda and the rest of Tanzania. Many books have been written about East Africa. They come into four main categories; the magnificent picture books, the geography books, the stories about animals and the detailed technical books on such special aspects as game conservation, bird life, prehistory, or butterflies. None of these is suitable as a practical guide for either the local resident or the average intelligent visitor, who is interested in everything but is not an enthusiastic specialist in any particular subject.
