What is lawful self-defense and when is lethal force justified? While you alone are personally responsible for yours and your family's safety, these and other pertinent questions are often clouded with conflicting information. Author, Isabella Hunter writes a lucid and unique examination on lawful self-defense and draws on experience as an advocate for gun safety and public education. "You and Guns: A Conversation" is an introductory guide for the novice and does not require owning a firearm. Highlights include perspectives on morality and lethal confrontation, the fundamentals of firearm safety, helpful considerations for purchasing a firearm, how to find a certified instructor and what to expect when taking lessons. Hunter promotes the usefulness and necessity of having a personal plan of action for life threatening emergencies. Your initiatives and actions following could help save yours and the lives of others.

"You will either master the pistol or the pistol will master you." To fire perfect shots, you must train for perfect shots. But whether you want to shoot squirrels, punch holes in paper targets, or defend your home, there is only one path to achieving consistent accuracy with a handgun: mastering the fundamentals of marksmanship. Written by a former U.S. Marine Corps firearms instructor who has taught more than a thousand law enforcement, military, and security personnel, The Perfect Pistol Shot uses succinct lessons, uncommon exercises, and real-world stories to provide a fresh look at a vital topic for all gunmen. It includes: The single most important "trick" to perfecting handgun marksmanship A simple concept for learning how to shoot a gun twice as fast A series of unique "Prove It" exercises that allow you to test the concepts offered without the pressure of actual shooting An entertaining chapter on guns, gun magazines, and gun gurus that will help you make wiser choices about your training Knowing how to engage targets is valuable for the defensive shooter, but if "engaging" doesn't translate into "hitting," what's the point? You must have a solid foundation on which to build tactical skills. Your reward will be conversion from just another hapless shooter into an independent marksman.

Whether you're a firearms enthusiast, an experienced shooter, or someone who has never even held a gun, Shoot: Your Guide to Shooting and Competition will help you explore different types of firearms, understand crucial safety rules, and learn fundamental shooting skills. This book provides an introduction to a wide variety of shooting sports through detailed descriptions that relate each type of competition to everyday activities and interests. High-quality photography from actual competitions and step-by-step instructional images augment the clearly written descriptions of both basic and advanced shooting skills. Throughout the book, Julie shares beneficial tips, explains sport-specific lingo, and stresses vital safety

concerns. Going beyond just a skill-building manual for those new to firearms and shooting, Shoot addresses competition stress, goal setting, logging, and beneficial practice techniques to help all shooters, from novices to champions, excel and take their skills to the next level.

This handbook is a 'primer' for the new target shooter: introducing the firearms, shooting disciplines and firearm technology, and drawing on the expertise of Bisley, the home of British and Commonwealth target shooting. The book is organized into nine sections and over 60 deliberately short chapters. First the basics: Part A - Target Shooting Basics – introduces the different shooting disciplines available. Part B - Firearms and Shooting Equipment – covers the different rifles, handguns, shotguns, black powder and airguns used by target shooters. Then we look at the major shooting disciplines which I have grouped into: Part C - Target Rifle Disciplines – provides a short overview of each of the main target rifle disciplines, such as Fullbore, Smallbore, High Power, Benchrest and Air Rifle. Part D - Target Pistol and Gallery Disciplines – covers target pistol shooting on so-called Gallery ranges. Part E - Historic Arms Disciplines – introduces shooting with black powder and muzzleloader firearms. Part F - Military and Practical Disciplines – provides an introduction to disciplines involving service weapons and military-style competitions. Part G - Field Sports Disciplines – as the name suggests, target disciplines based around field sports, such as Clay Pigeon and Field Target (Air Rifle). And finally we cover: Part H - Shooting Techniques – introduces marksmanship with rifles, handguns, shotguns and airguns. Part I - Specialist Skills – a group of chapters introducing skills and knowledge, such as the correct cleaning of firearms, hand loading ammunition, and the selection and fitting of sights. We have tried to keep each 'chapter' as short as possible, and provide references to further information (especially on the Web). More importantly we provide contact details for each of the target shooting disciplines. We hope you enjoy this handbook and it helps you get the most from target shooting.

"In this in-depth and systematic look at gun carriers, Jennifer Carlson draws on her fieldwork attending guns shows and training courses, becoming an NRA certified instructor, and carrying a firearm to unpack the everyday politics of guns. Carlson argues that guns are taken up to address practical problems of policing and protection-in effect to manage social insecurities and suspicions surrounding state disinvestment and the efficacy of state institutions, especially law enforcement. In this context, guns carrying becomes a means of practicing good citizenship by producing social order amidst disorder. This understanding helps to clarify why Americans cling to their guns as both practical and symbolically charged tools of policing and protection, but it also sheds light on the NRA's hidden power as the primary organization that certifies Americans to carry guns. Rather than focus simply on how to handle a firearm responsibly, these training courses primarily cultivate the disposition, capacity, and desire to use guns in self-defense as well as teach the idea that

It comes with access to 12 online video lessons. Watch Chief Sajnog show you his real-world methods, and read detailed explanations in this book packed with the most effective firearms training you'll ever find, without any of the fluff. If you're looking for "cool" stories or techniques, this is not the book for you. If you want to shoot like a Navy SEAL, this is where to start. You'll learn: How to find the right position for you -- not the cookie-cutter methods that only work for some people -- so you can maximize your aim with as little effort as possible. Simple training exercises you can do right now, at home, without having to spend 1,000's of dollars at the shooting range. How to boost your accuracy by up to 95% -- using the "Navy SEAL focus" technique that you can master in just minutes. The SEAL Sniper Trick that you can start using today, allowing you to instantly hit targets at twice the distance. Why the aiming technique you were taught is completely wrong -- and how you can fix it instantly. Plus... how to do all of this safely, without risking harm to your family. Protect your loved ones, your country, and yourself, with the firearms techniques developed by one of the most respected firearms trainers in the world.

This manual has been written with the Law Enforcement Firearms Instructor in mind. It is an attempt to save the instructor time by furnishing already prepared outlines that cover most of the subject currently taught by and to law enforcement personnel. The purpose of the manual is twofold: First, it can be used by current firearms instructors as a handy reference guide and also as a way of keeping all of the firearms outlines in one simple format. By preparing the manual in this fashion, all of an instructor's outlines are easily accessible should an instructor's class be challenged by the legal system. Secondly, this manual can be used as the text for firearms instructor initial certification classes. Once the new instructor completes the basic certification course, he or she will have a complete set of outlines that can be

used for teaching their classes. The first four outlines in this manual (The Role of the Firearms Instructor, Safety Responsibilities, Record Keeping, and Discipline) are generally used during instructor development classes. The rest of the outlines, while also used in instructor development classes, are also appropriate for basic recruit classes as well as classes that are designed for in-service personnel. The Appendix contains material that can be used as class handouts or made into overheads for class presentations. Some of the courses can be used for general firearms qualification, while others are used for training a specific skill, such as linear and lateral movement or multiple attackers. The manual has been written to take the pain out of the "office work" part of being a firearms instructor and to give the instructor more time to teach.

"A Floating Chinaman is, in the broadest sense, a book about who gets to speak for China. The title is taken from a lost manuscript by H.T. Tsiang, an eccentric Chinese immigrant writer who self-published a series of visionary novels in the 1930s, a time when China was recast as a rich, unexplored mystery to the American public. At this time the United States "rediscovered" China, and the book traces its causes and cues in a variety of sites: the comfortable, middlebrow literature of Pearl Buck, Alice Tisdale Hobart and Lin Yutang; the journalism of Carl Crow and Henry Luce; exuberant reports from oil executives proclaiming a new era in global trade. On the margins--in Chinatowns, on college campuses, in the failed avant-gardism of Tsiang--a different conversation about the possibilities of a transpacific future was taking place. The book is about the circulation of ideas about China; but it is also a book about writers, rivalries, and the acquisition of authority. It is about the creation and refinement of those ideas, as well as the spirit of competition that underlies all critical endeavors. These were decades when China represented a new area of inquiry, and the stakes for writers to flex their expertise were at once intellectual, professional, and deeply personal. The author considers a range of texts--from best-sellers to self-published paperbacks, travel literature to corporate newsletters, FBI surveillance files to flowery letters from an Ellis Island detention center--and considers the competing notions of a transpacific future that animated the literary imagination as well as some satisfying moments of revenge."--Provided by publisher.

My purpose and hope in writing this book about Handguns, Concealed Carry, and Legal Concerns is to impart to you knowledge to save you money. An even more important goal is to save you potential heartache; and most critical, to encourage you to protect your life and that of your loved ones. "Why and how," you ask? First, The Need: The FBI reported, "In 2010 there was a burglary every 15 seconds." One in five women in a recent survey stated they had been a victim of sexual assault. When resisting a criminal assault, an armed woman has a 400% better chance of escaping unharmed than an unarmed woman. Question: What's your plan? Just trust in Blind Luck? The Why: To purchase an inappropriate hand gun or two can cost hundreds of dollars. To run afoul of the law- that expense begins in the

thousands of dollars. To be unarmed and unprepared to confront a violent attacker-that cost is incalculable. Remember: "Lightning and violence have one thing in common-they both strike somewhere." The How: There is no other single source, one volume book covering handguns, ammunition, holsters, maintenance, safes, safety, legal concerns, and miscreant misbehavior. This book is an effort to fill that void. If you are not certain that you need to know more, open the book to page IX and take a quick assessment of your knowledge. Thank you for giving me a look, and don't forget: "You make your choice and you take your chances."

Some Comments from Len's Students... "I want you to know that in my many years of being a student, you easily rank as the best teacher I have ever had. Your skill and patience has made me infinitely more comfortable with my weapons and myself. The next class you teach, I'll be there in a heartbeat. I'm sure you don't have to be reminded of the multitude of people you have touched and the positive impact you have had on firearms training overall." Bob Patridge "Len has taught me to effectively and safely use a handgun and rifle and for that I will always be grateful. I look forward to the time I spend once or twice a week under his instruction. Len has created a wide range of firearms training programs out of virtually nothing and trained a sizeable and competent cadre of firearms instructors who, like me, greatly respects the man. He is engaged with his students and always approachable. Students who have shot much longer than me comment on his great depth of knowledge and ability to improve their shooting. He clearly loves to teach the material and his enthusiasm is contagious. He has a great sense of humor and makes his classes a lot of fun. But in spite of all of this the safety of his students is always his first concern." Dr. Noel Pillman, MD "I am a retired police officer and a former police firearms instructor for over 20 years. I have been to numerous firearms training classes over the years but have not had any instructors more professional, knowledgeable, and dedicated to what they do than Len Breure." Maurice Merabella "Len was my first real 'tactical' instructor a few years ago. He is a thorough, safe, and well versed instructor. His teaching style is unique in a way that clearly conveys lessons and makes them easy to understand for experienced shooters and novices alike. Len brings a wealth of prior "been there, done that" experience to the table that's an asset to his teaching, and is rarely found in many of the new instructors that have come to the arena since most states have enacted concealed carry laws. I continue to train with a variety of tactical instructors, and am always amazed by how much of the information Len taught me is still the foundation upon which I build." Mike VanMeeteren "I have been fortunate enough to receive numerous training courses that were being taught by Len Breure. In my opinion, Len is one of the best in the business! It is very rewarding to be able to learn from someone who has the experience and knowledge to take tactical training to the next level." Jim Bryant I first meet Len while taking my Minnesota Concealed Carry Course in 2005. Since that time I have taken every course that Len teaches. In my opinion Len is the consummate professional, who teaches with passion

and an incredible degree of knowledge. I would strongly urge anyone interested in personal protection to take Lens courses. Mike Pingel

Guns and Crime: The Data Don't Lie investigates the ways in which the current data on guns and crime are inadequate and inaccurate. Although the majority of murders in the United States are committed with guns, research on gun ownership, the supply of guns, and the relationship between guns and crime is less thorough than studies done for many other aspects of public safety policy. This book explores the weaknesses in current findings, and extrapolates the implications of policymaking based on these faulty foundations. As the gun debate continues to rage in North America, this text offers a cautionary voice to the discourse—before practitioners and policy makers can create a solution to gun violence, they must first improve the quality of the facts they use to make their case. Intended for criminology, statistics, sociology, and economics students, Guns and Crime is also suitable for interested laypersons and practitioners hoping to better understand the mythos surrounding guns in America.

Firearms instructor, Gabby Franco, guides the reader by helping improve shooting skills to a higher level.

Praised by experts and students alike for his practical approach to intuitive shooting techniques, Pincus has brought his program into a skillfully written dialogue featuring sections including: Working with what the body does naturally, Background and Philosophy of Combat Focus Shooting, Combat (or Defensive) Accuracy, Combat Focus Range Drills, The Critical Incident Reload, Volume of Fire, and The Balance of Speed and Precision. Pincus book covers the content and underlying principles of the revolutionary Combat Focus? Shooting Course in their entirety. Combat Focus? Shooting is the intuitive shooting program that is designed to work with what the body and mind do naturally during a dynamic critical incident. This program helps the shooter to learn the Balance Between Speed & Precision and use either sighted or unsighted fire as appropriate to get combat-accurate hits efficiently during a lethal force encounter. Pincus Combat Focus? Shooting program has been incorporated into law enforcement and military training programs across the country and has been taught to security and police officers, military special operations personnel and instructors from around the world. In addition to these armed professionals, hundreds of self-defense students and beginner shooters are taught how to be safer through more efficient shooting in the Combat Focus? courses every year, both at Valhalla Training Center

and other locations.
