Multifunction devices combine the essentials of a fax machine, printer, scanner, and copier into one peripheral for small and home offices. As the market for this equipment grows, the need for skilled repair and maintenance increases. Unfortunately the service documentation supplied by the manufacturers is completely inadequate making the repair jobs even harder and more expensive. Marvin Hobbs teaches you how multifunction peripherals work in theory and in practice with lots of hands-on examples and important troubleshooting and repair tips you don't want to miss. This book fills a gap in the literature, and will be a welcome addition to the library of any technician or do-it-yourselfer. Written by a knowledgeable practitioner with inside industry information Fully covers the troubleshooting and repair of multifunction peripherals A must-have instructional and reference title for anyone who works with computer peripherals!

Trade policy has played a vital role in the decline of European electronics business. The events that resulted in the disappearance of the European television industry, of a European and Japanese video recorder format and of other European consumer electronics are directly related to market structures in exporting countries and business practices. In this book, factual business data shows and economic models explain how restrictive trade practices result in elimination of efficient competitors in export markets. It deals with the memorable case how a videocassette recorder format was established by dumping and how politics enabled it. An innovative tariff increase for CD players was invalidated by heavy dumping, causing closure of production in Europe. European CTV industry succumbed under permanent dumping and a series of biases – as the interest of a state-owned company – and serious errors making trade instruments void and rules irreconcilable with international agreements. Practical and theoretical examples and explanations, some in detail, of trade rules are provided. The book sketches events – carelessness, prejudice or special interests, arbitrary and false application of trade instruments and fraud – resulting in disappearance of various European electronics business segments.
