Keith McCord recounts the history of automotive onboard diagnostic systems and creation of the rudimentary OBD I systems and the development as well as the evolution of OBD II. Currently, OBD-II (OnBoard Diagnostic II) is the standard of the industry, and this book provides a thorough explanation of this system. It details its main features, capabilities, and characteristics. It shows how to access the port connector on the car, the serial data protocols, and what the serial data means. To understand the diagnostic codes, the numbering system is defined and the table of common DTCs is shown. But most importantly, McCord provides a thorough process for trouble shooting problems, tracing a problem to its root, explaining why DTCs may not lead to the source of the underlying problem, and ultimately resolving the problem.

With a little planning and foresight, refrigeration is absolutely not necessary. In this book, the author discusses how to store food and make delicious meals without the use of a refrigerator. From milk and cheese to eggs and meat, the book lays out ways any boater, hiker, or camper can have home-cooked meals without artificially freezing or cooling their food. Broken down into handy categories, this reference guide gives techniques on how to properly wash, store, treat, and cook your food for maximum flavor and usability. Written by a dedicated sailor whose own skills were honed on months-long journeys, the tips in this guide can be put to use by anyone trying to avoid heavy, power-sucking refrigerators. Sailors, campers, and hikers all could benefit, and the books serves equally well for those in RVs, those with limited space, and those trying to live off the grid.

Existing books on garage and workshop space are either oriented towards the lightest-duty automotive enthusiast

or assume an effectively unlimited budget. The vast majority of enthusiasts want to spend their money on tools and parts yet need heavier-duty capabilities from their garage. This book does not address garden rake storage, but describes in detail how to set up an organized and functional garage or workshop for professional-level work at the lowest possible price. "How to Design, Build and Equip Your Automotive Workshop on a Budget" provides the necessary information as the hobbyist considers various tools, designs, installations, and products available for their automotive workspace. Many of the ideas presented for workbenches and storage can be implemented at low cost, or even for free if you're extra resourceful. There are step-by-step instructions for the most essential and practical procedures, including basic electrical wiring sufficient to connect up bank of lights, a compressor, a welder circuit as well as a procedure for routing power from your household electrical service panel and plumbing basic shop fixtures. Most enthusiasts have a limited amount of car space and an even more limited budget, so they must make good use of the space and money available. This book is designed to help the practical hobbyist mechanic make the most of any available space, balancing looks and functionality, while staying within almost any budget.

In 1970, Sylvia Wilkinson was a writer in the category known as 'young Southern Woman Novelist'. While her novels and teaching paid the bills she had a passion for motorsports that led her to write *The Stainless Steel Carrot: An Auto Racing Odyssey*. The book profiled young up-and-coming road racer John Morton as he raced the BRE Datsun 510 in the 1971 and 1972 SCCA Trans-Am 2.5 Challenge. John won the championships and continued on a road-racing career that saw dozens of championship level victories around the country and abroad. The book, well regarded among both racers and general audience readers, has been out of print since 1973. Original copies often sell for over

Sixty years old in 1999, Mercury Marine is the world leader in the marine industry. The memory of its founder, Carl Kiekhaefer, lives on in the hearts and minds of engineers and boat enthusiasts alike. His manic genius and tireless energy found outlet in his need for greater speed, more features and higher value, first in outboards and then in stern drive products. Since Kiekhaefer's departure from the company in 1970, Mercury Marine has come into its own while holding onto those qualities inherited from its founder, qualities that abhor failure. Jeffrey L. Rodengen, author of Iron Fist: The Lives of Carl Kiekhaefer, continues to chronicle the fascinating story of Mercury Marine. The Legend of Mercury Marine details the company's struggle and ultimate triumph in this comprehensive, lavishly illustrated 225-page work.

Excerpt from History Topsfield Massachusetts For over forty years the author collected material relating to Topsfield with the intention of publishing a comprehensive history of the town. At the time of his death he had outlined the work and written many of the chapters. It has been my privilege to carry on the work with the assistance of a group of w.p.a.

Workers and Miss Ruth H. Allen who has written the remaining chapters. I have edited the manuscript, prepared the index and read the proofs. Much information was gleaned from the Probate and Quarterly Court Records of Essex County, and the lists of soldiers in the French and Indian wars and the Revolution were carefully checked with the rolls in the Massachusetts State Archives. It is hoped that it may be possible at some future time to print the chapters on houses and lands and on the families of Topsfield which have been so carefully prepared.
