Creative Caring is the story of one determined family whose son, Ricky, had intellectual disabilities so severe that the typical resources of a community were not available to him. Finding that situation intolerable, they fought relentlessly to create a caring community for Ricky and hundreds of others. Vita Living fought bureaucratic hurdles, abuse from the community, and serious economic challenges so it was brought to the edge of collapse. The goal was to obtain a coveted license to open the first small community-based home in Texas to provide life long care for people with severe mental retardation and behaviors. Despite being told it was impossible, Renee successfully pursued her dream. This memoir, a reflection on her over 40 years of working with children and adults with intellectual disabilities, is a call to action for our society to consider the welfare of all, not only the able bodied. Creative Caring is the story of how Renee and Stan turned the challenges their family faced into triumph. But even more, it's the story of how they succeeded in creating a more generous and nurturing environment for an entire population who has much to contribute to the world around them

This text treats theoretical epidemiology as the discipline of how to study the occurrence of phenomena of interest in the health field. It delineates major principles of study design and data analysis in research into the frequency of occurrence of illness and related phenomena in human populations whether in the community or in clinical situations. Thus it is concerned with the principles of the dominant type of research in applied medical science and in health care administration. Moreover, the principles of research of this type in medicine are not peculiar to the study of illness, health and health care, nor to studies on humans. They apply equally to statistical research in psychology, behavioral science, technology, and other fields.

Engage using #manrepeller. Silk parachute pants. A gold lamé jumpsuit. Ankle boots with fringe. Were these fashion-forward items sending men running in the opposite direction? Maybe, but Leandra Medine never cared. Slipping into drop-crotch shorts and a boxed sequin blazer in the dressing room of Topshop in downtown Manhattan, a brokenhearted Leandra had an epiphany. Looking in the mirror, she suddenly realized she didn't have a boyfriend because of the way she dressed. And the more she thought about it, the more she realized that such outfits said a lot about her life-romantic and otherwise. Now, in her first book, the acclaimed blogger and fashion darling recounts her most significant memories through the lens of her sartorial choices. With her signature sass, blunt honesty, and some personal photos, Leandra shares details of the night she lost her virginity right down to the pair of white tube socks she forgot to take off, as well as when and why she realized her grandma's vintage Hermès ostrich skin clutch could hold much more than just keys and a cell phone. Through it all, she proves you don't need to compromise even your most repellent qualities to find your way into that big white dress (and an organza moto jacket). See? You can have your yeti and wear it, too.

Showcasing the singular voice that has won Leandra millions of fans, this book is a collection of awkwardly funny experiences, a sweet love story, and above all, a reminder to celebrate and embrace a world made for women, by women. In December 2008, my worst nightmare came true . . . How do you pick yourself up after the one thing you most feared happens to you? Alexandra Penney's revealing, spirited, and ultimately redemptive true story shows us how. Throughout her life, Alexandra Penney's worst fear was of becoming a

bag lady. Even as she worked several jobs while raising a son as a single mother, wrote a bestselling advice book, and became editor in chief of *Self* magazine, she was haunted by the image of herself alone, bankrupt, and living on the street. She even went to therapy in an attempt to alleviate the worry that all she had worked for could crumble. And then, one day, that's exactly what happened. Penney had taken a friend's advice and invested nearly everything she had ever earned--all of her savings--with Bernie Madoff. One day she was successful and wealthy; the next she had almost nothing. Suddenly, at an age when many Americans retire, Penney saw her worst nightmares coming true. Based on her popular blog posts on *The Daily Beast*, this memoir chronicles Penney's struggle to cope with the devastating financial and emotional fallout of being cheated out of her life savings and illuminates her journey back to sanity, solvency, and security. "I will work harder than I ever have before--which was pretty hard indeed--and see what happens. I have the feeling something good will come of it: tough, challenging work and laserlike focus have always paid off for me. . . . Was it better to have it and then lose it? Yes, yes, yes! Even though I lived with horrible bag lady fears of losing it all, now that those financial fears have materialized, I'm in pretty good shape and looking to what's next. Experiences -- good and bad, exciting and boring, tragic and absurd -- make up a life. Not to have lived to the fullest is the saddest, most irresponsible life I can think of." --- from *The Bag Lady Papers*
