Well-written and well-researched by leading gender communication scholars Julia T. Wood and Natalie Fixmer-Oraiz, *GENDERED LIVES: COMMUNICATION, GENDER, & CULTURE*, 13th Edition, provides the latest theories, research and pragmatic information to help readers think critically about gender and society. The book demonstrates the multiple and often interactive ways a person's views of masculinity and femininity are shaped within contemporary culture. It offers balanced coverage of different sexes, genders and sexual orientations. Reflecting emerging trends and issues, the new edition includes expansive coverage of men's issues, an integrated emphasis on social media and a stronger focus on gender in the public sphere. This volume critiques the increasingly reductive, objectifying, and technologized orientation in mainstream biomedicine. Drawing on the methods of hermeneutic phenomenology and existential analysis in the work of Martin Heidegger, Kurt Goldstein, Medard Boss, and Hans-Georg Gadamer, the author seeks to expose this lacuna and explore the ways in which it misrepresents (or misunderstands) the human condition. Whitehead begins by examining the core distinction in the sociology of medicine between "disease" and "illness" and how this distinction maps onto a more fundamental distinction between the corporeal/objective body and the experiential/lived body. Ultimately, the book exposes the tendency in modern medicine to medicalize the human condition and forwards a reorientation framed by what the author terms "existential health psychology."

Students learn to critically think about philosophy. The *Philosopher's Way* inspires students to think like a philosopher, helping them become more accomplished critical thinkers and develop the analytical tools needed to think philosophically about important issues. "Our millennial children, as well as nonchurchgoing millennials, are both the church's greatest challenge and its most exciting new opportunity." —John Seel, PhD Warning: There is a fundamental frame of reference shift in American society happening right now among young adults. You may think of this group as millennials—those born between 1980 and 2000—but millennials resist this label for good reason: the national narrative on them is pejorative, patronizing, and just plain wrong. Here's what we do know: Of Americans with a church background, 76 percent are described as "religious nones" or unaffiliated—and it's the fastest growing segment of the population. Close to 40 percent of millennials fit this religious profile. Roughly 80 percent of teens in evangelical church high school youth groups will abandon their faith after two years in college. It's unlikely that the evangelical church can survive if it is uniformly rejected by millennials, and yet: Millennial pastors and youth ministers are disempowered; their perspective is often not taken seriously by senior church leadership. Most millennial research is framed in categories rejected by millennials; that is, left-brained, analytical communication is lost on right-brained, intuitive millennials. Evangelicals' bias toward rational left-brained thinking makes the church seem tone-deaf. What's next? Read on. John Seel suggests survival strategies—communication on-ramps for genuine human connection with the next generation. It can be done.

CRITICAL THINKING, THOUGHTFUL WRITING begins with the premise that thinking well involves using language well, and vice versa. This rhetoric with readings--written by critical-thinking scholar John Chaffee and English professors Christine McMahon and Barbara Stout--provides thorough coverage of the writing process, going beyond the traditional rhetoric to teach students how to evaluate sources, images, and arguments. Each chapter focuses on a critical-thinking skill--such as problem solving or analysis of complex issues--that is explored through "Thinking-Writing Activities" and thematically linked readings. The text helps students develop these skills through carefully sequenced pedagogy and a cross-disciplinary approach that asks them to complete writing assignments and critically evaluate readings drawn from a variety of disciplines. The Fifth Edition offers new readings, a new "Thinking Critically About New Media" feature in each chapter, and more photos, which emphasize visual rhetoric.

Don't just understand philosophy – live it in the open-source revival for the digital age. You find yourself in an endless forest, walking past trees like rockets. The smell of dry pine about to ignite. You see a deer, and its eyes are trying to tell you something...but what? These are some of the images of philosophy in action – the scenes you will visit and learn from. For the initiated, Augustine offers an exhortation inspired by the Meditations of Marcus Aurelius, yet everyone who struggles will find comfort in the energetic dialogues, essays, and letters within. Philosophy for Any Life embraces topics such as death, fire, chickens, anxiety, the unity of nature, sex, mindfulness, getting out of bed in the morning, anger, habit, resolve, suffering, and judgment all from the point of view of a Stoic philosopher. Thousands of years of ancient wisdom are rekindled in a fresh, modern style.

The Philosopher's Way A Text with Readings : Thinking Critically about Profound Ideas Prentice Hall

International scholars and sinologists discuss culture, economic growth, social change, political processes, and foreign influences in China since the earliest pre-dynastic period.

Classical, modern, and contemporary philosophical writings that address the fundamental concepts of communication. To philosophize is to communicate philosophically. From its inception, philosophy has communicated forcefully. Socrates, Plato, and Aristotle talk a lot, and talk ardently. Because philosophy and communication have belonged together from the beginning—and because philosophy comes into its own and solidifies its stance through communication—it is logical that we subject communication to philosophical investigation. This collection of key works of classical, modern, and contemporary philosophers brings communication back into philosophy's orbit. It is the first anthology to gather in a single volume foundational works that address the core questions, concepts, and problems of communication in philosophical terms. The editors have chosen thirty-two selections from the work of Plato, Leibniz, Hegel, Husserl, Heidegger, Wittgenstein, Benjamin, Lacan, Derrida, Sloterdijk, and others. They have organized these texts thematically, rather than historically, in seven sections: consciousness; intersubjective understanding; language; writing and context; difference and subjectivity; gift and exchange; and communicability and community. Taken together, these texts not only lay the foundation for establishing communication as a distinct philosophical topic but also provide an outline of what philosophy of communication might look like.

From respected philosopher and writer Jonathan Wolff, this brief introduction to ethics stimulates independent thought, emphasizes real-world examples, and provides clear and engaging introductions to key moral theories and the thinkers behind them. The new Second Edition offers expanded coverage of moral reasoning, as well as two thoughtful and contemporary new chapters on applying moral philosophy and the ethics of race. A companion primary source collection, Readings in Moral Philosophy, amplifies issues discussed in the text, connecting them to problems in applied ethics.

Thinking Critically, 8/e, teaches the fundamental thinking, reasoning, reading, and writing abilities that students need for academic success. The text begins with basic skills related to personal experience and then carefully progresses to the more sophisticated reasoning skills required for abstract, academic contexts. Thinking Critically introduces students to the cognitive process while teaching them to develop their higher-order thinking and language abilities. A number of distinctive characteristics make the text an effective tool for both instructors and students. Exercises, discussion topics, and writing assignments encourage active participation, stimulating students to critically examine their own and others' thinking.

We are already living in the future. Artificial intelligence is playing an even-greater role in society: from the 'weaponization' of software to the possibility of a post-antibiotic age. The Sentient Machine is the perfect guide to this brave new world. Amir Husain outlines the history behind artificial intelligence from the creation myth of Frankenstein to the advances made by technology innovators such as Elon Musk. Amir Husain asks the essential question: what is the future for humanity in a world that is dominated by machines? Will machines solve all human problems or will they lead us down a dystopian path to human irrelevance? Husain asks what will be the consequences - from job losses, our future, to the existential questions. How are we intelligent, what constitutes progress, how can AI bring us to "the good life"? How can humans prevent ceding decisions to the network of autonomous systems that increasingly surround us? One of the world's leading technologists looks at our future as we are on the cusp of a second Big Bang, when machines can think independently from us. Will the increasing role of artificial intelligence heal or harm our society? In The Sentient Machine, Amir Husain addresses complex computer science concepts in plain language and illustrates his points drawing on a wide variety of cultural and historical references. This is an accessible guide to a fascinating subject. A book that could be adopted onto computer science courses, and some philosophy courses.

This anthology of classical and contemporary philosophical and legal essays and legal cases focuses on legal philosophy as its own subject--rather than as an outgrowth of social or political philosophy or applied ethics. The essays focus on how law is organized and the particular philosophical issues that law raises-- and gives readers the opportunity to think through actual debates—many of them still live in the courts. Provides short introductions and thought-provoking questions for each selection. The Practice of Law. The Rule of Law. The Moral Force of Law. Elements of Legal Reasoning. Natural Law and Legal Positivism: Classical Perspectives. Formalism and Legal Realism. The Contemporary Debate: Hart v. Dworkin. Law and Economics. Critical Legal Theory and Feminist Jurisprudence. Punishment: Theory and Practice. Problems of Criminal Liability. The Rights of Defendants. Compensating for Private Harms: The Law of Torts. Private Ownership: The Law of Property. Private Agreements: the Law of Contract. Constitutional Government and the Problem of Interpretation. Freedom of Religion, Speech and

Privacy. Equality and the Constitution. For anyone interested in the law.

The Philosopher's Way: Thinking Critically About Profound Ideas, 3/e, inspires students to think like a philosopher. Integrated readings, interspersed with commentary, guide students in their understanding of the topics, while critical thinking activities challenge students to go beyond their reading and explore the connections philosophy has on their everyday lives. Full-color visuals bring topics to life, and writing examples give students a foundation for their own philosophical exploration.

Philosophers have long been interested in love and its general role in morality. This volume focuses on and explores the complex relation between love and justice as it appears within loving relationships, between lovers and their wider social context, and the broader political realm. Special attention is paid to the ensuing challenge of understanding and respecting the lovers' personal autonomy in all three contexts. Accordingly, the essays in this volume are divided into three thematic sections. Section I aims at shedding further light on conceptual and practical issues concerning the compatibility or incompatibility of love and justice within relationships of love. For example, are loving relations inherently unjust? Might love require justice? Or do love and justice belong to distinct moral domains? The essays in Section II consider the relation between the lovers on the one hand and their broader societal environment on the other. Specifically, how exactly are love and impartiality related? Are they compatible or not? Is it unjust to favor one's beloved? Finally, Section III looks at the political dimensions of love and justice. How, for instance, do various accounts of love inform how we are to relate to our fellow citizens? If love is taken to play an important role in fostering or hindering the development of personal autonomy, what are the political implications that need to be addressed, and how? In addressing these questions, this book engenders a better understanding both of conceptual and practical issues regarding the relation between love, justice, and autonomy as well as their broader societal and political implications. It will be of interest to advanced students and scholars working on the philosophy of love from ethical, political, and psychological angles.

This best-selling text continues to fill an existing gap in the literature taught in applied ethics courses. As a growing number of courses that include the perspectives of diverse cultures are being added to the university curriculum, texts are needed that represent more multicultural and diverse histories and backgrounds. This new edition enhances gender coverage, as nearly half of the pieces are now authored by women. The new edition also increases the percentage of pieces written by those who come from a non-Western background. It offers twelve up-to-date articles (not found in previous editions) on human rights, environmental ethics, poverty, war and violence, gender, race, euthanasia, and abortion; all of these topics are addressed from Western and non-Western perspectives.

Designed for students with no prior training in logic, INTRODUCTION TO LOGIC AND CRITICAL THINKING offers an accessible treatment of logic that enhances understanding of reasoning in everyday life. The text begins with an introduction to arguments. After some linguistic preliminaries, the text presents a detailed analysis of inductive reasoning and associated fallacies. This order of presentation helps to motivate the use of formal methods in the subsequent sections on deductive logic and fallacies. Lively and straightforward prose assists students in gaining facility with the sometimes challenging concepts of logic. By combining a sensitive treatment of ordinary language arguments with a simple but rigorous exposition of basic principles of logic, the text develops students' understanding of the relationships between logic and language, and strengthens their skills in critical thinking. Nobody knew adversity like King David. He was called and anointed to reign in life, and yet he had to find a way in God to keep from losing it all. In What to Do on the Worst Day of Your Life, Brian Zahnd looks into the life of David to discover a pattern of faith we can apply to overcome life's daunting obstacles. In David's story we find a timeless model for how to encounter God's restorative power in the midst of deep tragedy. Join Brian Zahnd, and see what David did on his worst day. You'll see David weep but not get bitter. You'll see him reorient his vision and regain his passion. All along the journey you'll be reminded that God's great work in David's life was not an odd, one-off miracle but a pattern of faith for all who are facing the worst day of their life.

Serving as an introduction to ethical theory as it applies to environmental issues, this work can also be used as a casebook on contemporary problems of science, industry, and individual decision-making

An ordinary shopping trip becomes a mysterious adventure when the shopper discovers each level of the new five-tiered KT Mall symbolizes an essential ingredient of human happiness. In this book, Andrea Clausen intends to reconcile Kripke's point according to which conceptual content has to be considered as being constituted by social, normative practice - by a process of mutual assessments - with the view that the content of empirical assertions has to be conceived as objective. She criticizes approaches that explicate content-

constitutive practice in non-normative terms, namely in terms of sanctioning behavior (Haugeland, Pettit, Esfeld). She also rejects a pragmatist reading of Heidegger that proceeds from thoroughly normative but pre-conceptual practice. She develops and defends a particular reading of an approach that conceives normative, conceptually articulated practice - giving and asking for reasons - as primitive (Brandom, McDowell).

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN
Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." –Jonathan Yardley, The Washington Post Book World
