NCERT has developed Exemplar Problems in science for Class X with the objective to cover the fundamentals of all Class X topics. This special edition of Educart Science NCERT Exemplar Book for Class X Science will act as the Bible for students preparing for their dream careers. It is made my country's top CBSE teachers in collaboration with Educart Experts after a year of rigorous research and development process. This Science Educart Exemplar book is prepared by our country's top experts, to give students a single reference book throughout the year to clear doubts.

### **Below are the key differentiation of this Educart book:**

- Revised with **30% reduced syllabus**.
- Every single question of this Educart NCERT Exemplar is solved keeping the basics in mind.
- Strict NCERT syllabus guidelines are followed when writing explanations.
- Special attention is put to explanations of MCQs and VSA as 25% of paper comes from them.
- Questions that have appeared in previous board examinations are identified, so that students use that extra data to prioritize important questions.
- Extra examinable insight in certain solutions is given under the categories of Definition, Differentiation, Concept Applied and Extra Information.
- NCERT recommended Diksha 2.0 platform (launched February 2020) questions (important ones) are solved at the end of each chapter.

Educart NCERT Exemplar Science also serves the purpose of revision, in the last moments before Board examinations, especially, as a major part of paper comes from this book statistically. We sincerely hope that the contents of this book will prove immensely beneficial to all students. **We wish you the best of luck.**

On Sunday April 27, 2003, 27-year old Aron Ralston set off for a day's hiking in the Utah canyons. Dressed in a t-shirt and shorts, Ralston, a seasoned climber, figured he'd hike for a few hours and then head off to work. 40 miles from the nearest paved road, he found himself on top of an 800-pound boulder. As he slid down and off of the boulder it shifted, trapping his right hand against the canyon wall. No one knew where he was; he had little water; he wasn't dressed correctly; and the boulder wasn't going anywhere. He remained trapped for five days in the

canyon: hypothermic at night, de-hydrated and hallucinating by day. Finally, he faced the most terrible decision of his life: bracing the bones in his wrist by snapping them against the boulder, he hacked through the skin, and finally succeeded in amputating his right hand and wrist. The ordeal, however, was only beginning. He still faced a 60-foot rappell to freedom, and a walk of several hours back to his car - along the way, he miraculously met a family of hikers, and with his arms tourniqued, and blood-loss almost critical, they heard above them the whir of helicopter blades; just in time, Aron was rescued and rushed to hospital. Since that day, Aron has had a remarkable recovery. He is back out on the mountains, with an artificial limb; he speaks to select groups on his ordeal and rescue; and amazingly, he is upbeat, positive, and an inspiration to all who meet him. This is the account of those five days, of the years that led up to them, and where he goes from here. It is narrative non-fiction at its most compelling.

It seemed like any other season on Mount Everest. Ten expeditions from around the world were preparing for their summit push, gathered together to try for mountaineering's ultimate prize. Twenty-four hours later, eight of those climbers were dead, victims of the most devastating storm ever to hit Everest. On the North face of the mountain, a British expedition found itself in the thick of the drama. Against all odds, film-maker Matt Dickinson and professional climber Alan Hinkes managed to battle through hurricane-force winds to reach the summit. In *Death Zone*, Matt Dickinson describes the extraordinary event that put the disaster on the front cover of *Time* and *Newsweek*. The desperate attempts of teams on the southern side of the mountain, fatal errors that led to the deaths of three Indian climbers on the North Ridge and the moving story of Rob Hall, the New Zealand guide who stayed with his stricken client, and paid with his life. Based on interviews with the surviving climbers and the first-hand experience of having lived through the killer storm, this gripping non-fiction book tackles issues at the very heart of mountaineering. *Death Zone* is an extraordinary story of human triumph, folly and disaster.

Authoritative, thorough, and engaging, *Life: The Science of Biology* achieves an optimal balance of scholarship and teachability, never losing sight of either the science or the student. The first introductory text to present biological concepts through the research that revealed them, *Life* covers the full range of topics with an integrated experimental focus that flows naturally from the narrative. This approach helps to bring the drama of classic and cutting-edge research to the classroom - but always in the context of reinforcing core ideas and the innovative scientific thinking behind them. Students will experience biology not just as a litany of facts or a highlight reel of experiments, but as a rich, coherent discipline.

This book presents a comprehensive, systematic approach to the development of learning strategies.
