In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.

The long, dark history of political violence in the United States Violence has been employed to achieve political objectives throughout history. Taking the life of a perceived enemy is as old as mankind. Antiquity is filled with examples of political murders, such as when Julius Caesar was felled by assassins in 44 BCE. While assassinations and assassination attempts are not unique to the American way of life, denizens of other nations sometimes look upon the US as populated by reckless cowboys owing to a "Wild West" attitude about violence, especially episodes involving guns. In this book, J. Michael Martinez focuses on assassinations and

attempts in the American republic. Nine American presidents—Andrew Jackson, Abraham Lincoln, James A. Garfield, William McKinley, Harry S. Truman, John F. Kennedy, Richard Nixon, Gerald Ford, and Ronald Reagan—have been the targets of assassins. President-elect Franklin D. Roosevelt was also a target shortly before he was sworn into office in 1933. Moreover, three presidential candidates—Theodore Roosevelt, Robert F. Kennedy, and George Wallace—were shot by assailants. In addition to presidents and candidates for the presidency, eight governors, seven U.S. senators, nine U.S. House members, eleven mayors, seventeen state legislators, and eleven judges have been victims of political violence. Not all political assassinations involve elected officials. Some of those targeted, such as Joseph Smith, Malcolm X, and Martin Luther King Jr., were public figures who influenced political issues. But their cases are instructive because of their connection to, and influence on, the political process. No other nation with a population of over 50 million people has witnessed as many political assassinations or attempts. These violent episodes trigger a series of important questions. First, why has the United States—a country constructed on a bedrock of the rule of law and firmly committed to due process—been so susceptible to political violence? Martinez addresses these questions as he examines twenty-five instances of violence against elected officials and public figures in American history. This one-volume narrative history of American Indians in the United States traces the experiences of indigenous peoples from early colonial times to the present day,

demonstrating how Indian existence has varied and changed throughout our nation's history. Although popular opinion and standard histories often depict tribal peoples as victims of U.S. aggression, that is only a part of their story. In *American Indians in U.S. History*, Roger L. Nichols focuses on the ideas, beliefs, and actions of American Indian individuals and tribes, showing them to be significant agents in their own history. Designed as a brief survey for students and general readers, this volume addresses the histories of tribes throughout the entire United States. Offering readers insight into broad national historical patterns, it explores the wide variety of tribes and relates many fascinating stories of individual and tribal determination, resilience, and long-term success. Charting Indian history in roughly chronological chapters, Nichols presents the central issues tribal leaders faced during each era and demonstrates that, despite their frequently changing status, American Indians have maintained their cultures, identities, and many of their traditional lifeways. Far from "vanishing" or disappearing into the "melting pot," American Indians have struggled for sovereignty and are today a larger, stronger part of the U.S. population than they have been in several centuries.

Annotation. Tariffs and their impact on trade have played a major role in American history since colonial times. The primary issue leading to the separation of the colonies from Great Britain, the tariff has remained one of the most divisive issues in American history. It is also a frequently misunderstood issue. This A-Z encyclopedia, with over 400 entries, provides a comprehensive

overview of the people, events, and legislation that have affected tariffs and trade relations from the pre-colonial era to the present. Designed as a tool for students, scholars, and the general public, the book is a useful resource for anyone interested in tariff and trade issues. Teaching U.S. History is a must read for any aspiring or current teacher who wants to think critically about how to teach U.S. history and make historical discussions come alive in our schools' classrooms.

'The History Wars is very important. The book will sit on the shelves of libraries as a code stone to help people understand the motivations of players in today's contemporary debate. It sheds light on the political battle which is carried on in the pubs and on the footpaths about who we are and what has become of us.'

andmdash; Hon. Paul Keating, Prime Minister of Australia, 1991-1996 The nation's history has probably never been more politicised than it is today. Politicians, journalists, columnists, academics and Australians from all walks of life argue passionately andmdash; and often, ideologically andmdash; about the significance of the national story: the cherished ideal of the 'fair go', the much contested facts of Indigenous dispossession, the Anzac legend, and the nation's strategic alliance with the United States. Historians have become both combatants and casualties in this war of words. In The History Wars, Stuart Macintyre and Anna Clark explore how this intense public debate has polarised the nation and paralysed history departments. This edition includes a new afterword by Stuart Macintyre which recounts, with rueful irony, the outbreak of controversy that followed the

power not what it is” but what it does has become central to a range of historical discourses, from the founding of the Republic and the role of the educational system, to the functions of agencies and America's place in the world. Here, James Sparrow, William J. Novak, and Stephen Sawyer assemble some definitional work in this area, showing that the state is an integral actor in physical, spatial, and economic exercises of power. They further imply that traditional conceptions of the state cannot grasp the subtleties of power and its articulation. Contributors include C.J. Álvarez, Elisabeth Clemens, Richard John, Robert Lieberman, Omar McRoberts, Gautham Rao, Gabriel Rosenberg, Jason Scott Smith, Tracy Steffes, and the editors.

Though the Filipino American population has increased numerically in many areas of the United States, especially since the influx of professional immigrants in the wake of the 1965 Immigration Act, their impact on schools and related educational institutions has rarely been documented and examined. *The Other Students: Filipino Americans, Education, and Power* is the first book of its kind to focus specifically on Filipino Americans in education. Through a collection of historical and contemporary perspectives, we fill a profound gap in the scholarship as we analyze the emerging presence of Filipino Americans both as subjects and objects of study in education research and practice. We highlight the argument that one cannot adequately and appropriately understand the complex histories, cultures, and contemporary conditions faced by Filipino Americans in education unless one grapples with the specificities of their colonial pasts and presents, their unique migration and immigration patterns, their differing racialization and processes of identity formations, the connections between diaspora and community belonging, and the various perspectives offered by ethnic group-centered analysis to multicultural projects. The historical, methodological, and theoretical approaches in this anthology will be of interest to scholars, researchers, and students in disciplines which include Education, Ethnic Studies, Asian American and Pacific Islander Studies, Anthropology, Sociology, Political Science, Urban Studies, Public Policy, and Public Health. In a provocative analysis of European and American historical thinking and practice since the early 18th century, *A History of History* confronts several basic assumptions about the nature of history. Among these are the concept of historical realism, the belief in representationalism and the idea that the past possesses its own narrative. What is offered in this book is a far-reaching and fundamental rethinking of realist and representationalist 'history of a particular kind' by addressing and explaining the ideas of major philosophers of history over the past three hundred years and those of the key theorists of today. In pursuing this radical analysis, the understanding of history as a narrative is evaluated along with contemporary notions such as the continuing presence of the past and the idea of 'its lessons'. Written by one of the leading thinkers on the subject, *A History of History* provides an accessible and radical history of history while offering new insights into the pressing questions of the nature, purpose and function of history. This book is an essential text for all students, teachers and consumers of history.

What sense do children and young people make of history? How do they cope with competing historical accounts in textbooks? How do they think historical or archaeological claims are supported or rejected? And whatever students think about history, how do their teachers see history education? The contributors to this fourth volume of the *International Review of History Education* discuss these questions in the context of their research. Divided into two sections, the first part of the book examines students' ideas about the discipline of history and the knowledge it produces. The second part looks in detail at teachers' own ideas about

teaching. Featuring contributions from authors throughout the world, including the USA, Canada, Portugal, Brazil, Taiwan and the UK, the book provides interesting studies of how history is both taught and received in these different countries. Understanding History contributes to current knowledge of successful teaching: that teachers must take into accounts students' preconceptions that they bring to the classroom as well as accepting the complexity and importance of their own professional knowledge. The book will be of interest to anyone studying or researching history education as well as teachers of history throughout the world. This text provides in-depth balanced content covering the beginnings of U.S. history through the present.

This outstanding collection of fifteen original essays represents innovative work by some of the most influential scholars in the field of women's history. Covering a broad sweep of history from colonial to contemporary times and ranging over the fields of legal, social, political, and cultural history, this book, according to its editors, 'intrudes into regions of the American historical narrative from which women have been excluded or in which gender relations were not thought to play a part.' State formation, power, and knowledge have not traditionally been understood as the subjects of women's history, but they are the themes that permeate this book. Individually and together, the essays explore how gender serves to legitimize particular constructions of power and knowledge and to meld these into accepted practice and state policy. They show how the field of women's history has moved from the discovery of women to an evaluation of social processes and institutions. The book is dedicated to pioneering

women's historian Gerda Lerner, whose work inspired so many of the contributors, and it includes a bibliography of her works. from the book The contributors to this volume grew up into a world in which history was rigidly limited. It paid little attention to social relationships, to issues of race, to the concerns of the poor, and virtually none to women. Women figured in it for their ritual status, as wives of presidents like Abigail Adams or Dolly Madison; for their role as spoilers, from the witches of Salem to Mary Todd Lincoln, or for their sacrificial caregiving, like Clara Barton or Dorothea Dix. Even when women like Sojourner Truth, Jane Addams, and Eleanor Roosevelt were named by historians, the radical substance of their work and their lives was routinely ignored. A very few historians of women--Eleanor Flexner, Julia Cherry Spruill, Caroline Ware--worked on the margins of the profession, their contributions unappreciated, and their writing vulnerable to the charge of irrelevance.
