How is it possible for six men to take a Liberian-flagged oil tanker hostage and negotiate a huge pay out for the return of its crew and 2.2 million barrels of crude oil? In his gripping new book, Jatin Dua answers this question by exploring the unprecedented upsurge in maritime piracy off the coast of Somalia in the twenty-first century. Taking the reader inside

pirate communities in Somalia, onboard multinational container ships, and within insurance offices in London, Dua connects modern day pirates to longer histories of trade and disputes over protection. In our increasingly technological world, maritime piracy represents not only an interruption, but an attempt to insert oneself within the world of oceanic trade. Captured at Sea moves beyond the binaries of legal and illegal to illustrate how the seas continue to be key sites of global regulation, connectivity, and commerce today.

"Why a second edition of the text book - Goodman's Neurosurgery Oral Board Review? The American Board of Neurological Surgery Oral Examination is the important final step in the certification process of a neurosurgeon. The examination has been in a constant state of evolution over the last 75 years. A major change in the examination process occurred in 2017, and the details of this transition are nicely outlined in Chapter 1. In keeping with this significant change in the Oral Board Examination format - I felt that the Goodman course needed to change to keep up with the Examination - see Chapter 3. The 2nd edition of the book now also reflects these updates with an emphasis on how to prepare for the current exam format. "--
