“Since K–12 students taught using the new [Next Generation Science Standards] will be arriving in college classrooms prepared in a different way from those in our classrooms currently, it would behoove college teachers to be prepared to alter their teaching methods ... or be perceived to be dinosaurs using the older teaching methods.” — From Exemplary College Science Teaching If you’re looking for inspiration to alter your teaching methods to match new standards and new times, this book is for you. As the first in the Exemplary Science series to focus exclusively on college science teaching, this book offers 16 examples of college teaching that builds on what students learned in high school. Understanding that college does not exist in a vacuum, the chapter authors demonstrate how to adapt the methods and frameworks under which secondary students have been working and make them their own for the college classroom, adding new technologies when appropriate and letting the students take an active role in their learning. Among the innovative topics and techniques the essays in this book explore are • Lecture-free college science teaching • Peer-led study groups as learning communities • Jigsaw techniques that enhance learning • Inquiry incorporated into large-group settings • Interactive video conferences for assessing student attitudes and behaviors The clichéd image of the professor droning on before a packed lecture hall is a thing of the past. The essays in this book explain why—and offer the promise of a better future.

As consumers become more resistant to direct sales appeals, white papers — promotional pieces in the guise of informational articles or reports — are increasingly alluring. And this exciting new book is the first to tell marketers across industry how to create effective white papers using a variety of media, all the while building successful marketing campaigns to create interest, generate leads, build relationships, and ultimately drive sales. Offering insight into the "Edu-Marketing" revolution, the book explains the dynamics of white paper marketing and why it works, equipping readers with the tools to create content, educate buyers, generate leads, and develop marketing plans using white papers — and measure the results. Packed with practical illustrations, the book includes more than a dozen cases from such industry heavyweights as IBM, Comfort Control, Home Depot, and Engineered Software. It also illustrates how white papers effectively fit into successful Integrated Marketing Communications efforts to speak with one voice, be where the prospect is, and help the prospect find you.

Wendy B. Sharer explores the rhetorical and pedagogical practices through which two prominent postsuffrage organizations—the League of Women Voters and the Women’s International League for Peace and Freedom—challenged the conventions of male-dominated political discourse and trained women as powerful rhetors. *Vote and Voice* is the first book-length study to address the writing and speaking practices of members of women’s political organizations in the decade after the suffrage movement. During those years, women still did not have power within deliberative and administrative organs of politics, despite their recent enfranchisement. Because they were largely absent from diplomatic circles and political parties, post-suffrage women’s organizations developed rhetorical practices of public discourse to push for reform within traditional politics. *Vote and Voice* is historically significant as well as pedagogically beneficial for instructors who connect rhetorical education with public participation by integrating writing and speaking skills into a curriculum that aims to prepare educated students and active citizens.

The best-selling legal skills textbook in the market, *Legal Skills* is the essential guide for law students, encompassing all the academic and practical skills in one manageable volume. It is an ideal text for students new to law, helping them make the transition from secondary education and giving them the skills they need to succeed from the beginning of their

degree, through exams and assessments and into their future career. The first part covers 'Sources of Law' and includes information on finding and using legislation, ensuring an understanding of where the law comes from and how to use it. The second part covers 'Academic Legal Skills' and provides advice on general study and writing skills. This part also includes a section on referencing and avoiding plagiarism amongst a number of other chapters designed to help students through the different stages of the law degree. The third and final part is dedicated to 'Practical Legal Skills'; a section designed to help develop transferable skills in areas such as presentations and negotiations that will be highly valued by future employers. The text contains many useful features designed to support a truly practical and self-reflective approach to legal skills including self-test questions, diagrams and practical activities. Students are given the opportunity to take a 'hands on' approach to tackling a variety of legal skills from using cases to negotiation. Each skill is firmly set in its wider academic and professional context to encourage an integrated approach to the learning of legal skills. Online resources -For lecturers, a bank of multiple choice questions and diagrams from the book -For students, answers to the self-test questions and practical exercises from the book and a glossary of all the keywords and terms used within the text. There is also an extensive range of videos with guidance on topics from what to expect from lectures and tutorials, how to research for essays and structure problem questions, to examples of good and bad practice in mooting and negotiations.

At heart, learning to read and write analytically is learning to think well For Evidence-Based Writing: Nonfiction, renowned teacher Leslie Blauman combed the standards and her classroom bookshelves to craft lessons that use the best nonfiction picture books, biographies, and article excerpts to make writing about reading a clear, concrete process. Students learn to analyze and cite evidence about main idea, point of view, visuals, and words and structure. And best of all, your students gain a confidence in responding to complex texts and ideas that will serve them well in school, on tests, and in any situation when they are asked: What are you basing that on? Show me how you know.

Oswaal CBSE Sample Question Papers + Question Banks Class 10 (Set of 4 Books) Mathematics Standard, Science Recognized as one of the most cited methodology books in the social sciences, the Sixth Edition of Robert K. Yin's bestselling text provides a complete portal to the world of case study research. With the integration of 11 applications in this edition, the book gives readers access to exemplary case studies drawn from a wide variety of academic and applied fields. Ultimately, Case Study Research and Applications will guide students in the successful design and use of the case study research method. New to this Edition Includes 11 in-depth applications that show how researchers have implemented case study methods successfully. Increases reference to relativist and constructivist approaches to case study research, as well as how case studies can be part of mixed methods projects. Places greater emphasis on using

plausible rival explanations to bolster case study quality. Discusses synthesizing findings across case studies in a multiple-case study in more detail Adds an expanded list of 15 fields that have text or texts devoted to case study research. Sharpens discussion of distinguishing research from non-research case studies. The author brings to light at least three remaining gaps to be filled in the future: how rival explanations can become more routinely integrated into all case study research; the difference between case-based and variable-based approaches to designing and analyzing case studies; and the relationship between case study research and qualitative research.

Exploring Nonfiction with Young Learners explores the four basic nonfiction structures that the youngest learners are most likely to encounter: descriptive, recount/collection, procedural, and explanatory texts. This book also includes information to help teach four, more complex structures that younger readers sometimes encounter during read-alouds: comparison, response, causation/cause and effect, and persuasive genres. This book is organized to help plan lessons using each type of nonfiction structure. Strategies and suggestions for activities to use before, during and after reading are included. Templates and graphic organizers are also provided in order to facilitate planning, and offer additional resources. Detailed information about each text structure as well as mentor texts to illustrate each type is included. Text structures, as well as text access features, are defined and located in easy reference charts. Whole class and small group planning ideas are included throughout the book in order to allow for differentiation. Additionally, assessment ideas, sample think-alouds, lesson planning templates, and sample lessons with completed graphic organizers are included for each text structure.
