Nelli möchte etwas in ihrem Leben ändern, so viel ist ihr klar. Allerdings wäre alles so viel einfacher, wenn sie wüsste, was sich ändern sollte. Doch dann stolpert sie zufällig über einen Aushang einer Rundreise durch Irland. Ganz entgegen Nellis Hang zur Unentschlossenheit schlägt sie alle Zweifel in den Wind und fliegt auf die grüne Insel, um sich auf die Suche nach ihrem Glück zu machen. Was sie dort allerdings zunächst findet, ist eine bunt gemischte Reisegruppe, die ungleicher nicht sein könnte. Während Nelli quer durch Irland reist, sich zahllose Schlösser, Städte und Ruinen ansieht und malerische Küsten, karge Torfmoore sowie die Weite und Einsamkeit Connemaras hinter sich lässt, wird ihr eines immer klarer: Sie ist auf dieser Reise nicht die Einzige, die sich auf die Suche gemacht hat.

A Nèmesi, l'inspector Harry Hole es troba immers en la investigació d'un atracament en un banc d'Oslo quan rep la trucada d'una antiga amant, Anna Bethsen, que el convida a sopar a casa seva. Ell accepta la invitació i l'endemà es desperta sense recordar res de la nit anterior. Hores més tard, l'Anna apareix morta i el cas es tanca com un suïcidi. En Harry, però, no s'ho acaba de creure i, paral·lelament al cas del banc, decideix investigar la mort de la seva amiga pel

seu compte. Sempre valent-se de mètodes eficaços però trepitjant la fina ratlla de la llei, Harry resoldrà dos crims que no eren ben bé el que semblaven de bon principi.

For those who believe there is more... More. Isn't that what we all want? More money, more time, more energy. Common sense tells us that to get more of any of these things we need to invest what we have now for a return in the future, yet we continue to pour our resources down the drain day after day, year after year, in a blaze of self-gratifying consumption. The self-investment mentality is about realising the potential for self-improvement in the most mundane and seemingly insignificant of life's occurrences, actions and events, like eating a particular food, meeting a new person, buying a new pair of jeans or reading a book. It is the realisation that all these things are deeply but subtly linked into a virtuous circle of personal growth which, if harnessed correctly, can eventually lead to increased resources of time, energy and money. It is not always about changing behaviour; more often it is concerned with changing mindset to allow growth and resources to flow freely. More energy, more time, more money... The principles of self-investment are about treating expenditure of your resources (including, but not limited to, money) in a different way, particularly in relation to investment of those same resources. The philosophy that I'm going to describe is about achieving

your own goals and objectives, happiness and fulfilment even, through a mentality of self-investment. That means dedicating significant, if not the overwhelming majority, of your resources to your growth as an individual. Of course, your own programme of self-investments is going to be totally individual - I'm not going to encourage you to spend time, money or effort on any one thing in particular. What I am going to try to convince you to do is to deeply reconsider what you class as an investment and what you class as consumption, or perhaps even waste, in light of a new understanding of how different expenditures can impact your life in very subtle, but profound ways. Part 1: Redefining Investment and Consumption First, we'll throw out old, preconceived ideas of what constitutes 'frivolous' consumption as opposed to 'sensible' self-investment, always and only with reference to you, the individual. We'll learn to recategorise consumption and investment as they truly manifest themselves. More importantly, we'll learn that almost anything can be a self-investment given the right mentality and life situation. It all depends on you. Part 2: The Enabling Resources Next, we'll take a detailed look at the specific ways in which self-investment gets us one step closer to our goals by increasing our arsenal of potent tools and personal traits, like knowledge, health, motivation, self-esteem, contacts and belief. These are the intermediate resources that eventually lead

back to time, life-energy and money. Part 3: The Infrastructure of Self-Investment Finally, we'll seek to understand the silent, almost invisible mechanisms by which personal growth and success emerge once you accept the power of self-investment. This means a change in mindset. We'll also examine the more practical elements of living the self-investment philosophy and how to adapt your life-setup..

Make Coffee and Espresso at home! Make sure you're not getting ripped off at your local coffee shop! Revised and Expanded Second Edition for 2016 50% Additional Content This 'coffee for beginners' book will take you from zombie to full on coffee geek by teaching you everything from the basics of coffee brewing to coffee roasting at home. I've always loved coffee and wanted to know more about it, but I hated all the pretense and mystique that surrounded it. Most of all, I hated walking into a coffee shop and feeling like I had to learn a new language just to order my black coffee. Still... Coffee is more than just a caffeine delivery system! This book sets the record straight and separates fact from fiction.

Description from 1st Edition I, too, was a coffee zombie, walking around calling myself a coffee lover. For years I stumbled around in a daze drinking stale, bitter coffee and grumbling "beans... beans...." Thank Goodness I finally woke up to

the world of coffee. By Immersing myself in the coffee world via reading every book I could find, visiting trade fairs, every high-end cafe I could find, and barista competitions, I realized that, while there is a huge amount of information out there free on the Internet and in artisan coffee shops, there was no single resource that connects all the dots and spells it all out for confused novice coffee drinkers. Until now. Fact: Making a great cup of coffee requires focus and commitment. This means that to make a billion dollar for-profit coffee franchise, you MUST find ways to cut corners and short change your customers. Fact: There are some GREAT coffee shops out there that care about coffee and customers and are worth every penny they charge, but they can be hard to identify, making it easy to just settle for familiar chain coffee. Fact: Making very good coffee is NOT THAT HARD. With a minimal investment in time and education you can make the best cup of coffee you've ever had in your life in the comfort of your own home. This book shows exactly why billion dollar for-profit coffee chains are inherently unable to produce coffee of the quality you can make in the kitchen. The Coffeelist Manifesto is half self-defense manual and half how-to instructional. By the end of it, any coffee beginner will have a foundational understanding of the coffee industry and know how to identify the good coffee shops from the bad ones. But most importantly, you'll know how to beat them at

Praise for *Red Audrey and the Roping* by Jill Malone: “Luminescent writing. . . . Finely tuned, daring, and perceptive, Malone’s auspicious debut leaves us wanting more.”—Whitney Scott, Booklist “A lyrical, passionate novel about desire, about danger,

and about the need for self-forgiveness. A wonderfully impressive writing debut.”—Sarah Waters, author of *Tipping the Velvet* and *The Night Watch* “First-rate writing and characterization.”—Cecelia Martin, *Diva* “Malone’s nonlinear novel jitterbugs through time and place—the splintered chronology is a rewarding challenge. . . . A dazzling and dramatic debut.”—Richard Labonté, *BookMarks/Q Syndicate* In Jill Malone’s second novel, *A Field Guide to Deception*, nothing is as simple as it appears: community, notions of motherhood, the nature of goodness, nor even compelling love. Revelations are punctured and then revisited with deeper insight, alliances shift, and heroes turn anti-hero—and vice versa. With her aunt’s death Claire Bernard loses her best companion, her livelihood, and her son’s co-parent. Malone’s smart, intriguing writing beguiles the reader into this taut, compelling story of a makeshift family and the reawakening of a past they’d hoped to outrun. Claire’s journey is the unifying tension in this book of layered and shifting alliances. *A Field Guide to Deception* is a serious novel filled with snappy dialogue, quick-moving and funny incidents, compelling characterizations, mysterious plot twists, and an unexpected climax. It is a rich, complex tale for literary readers. Jill Malone’s first novel, *Red Audrey and the Roping*, won the Bywater Prize for Fiction.

From his unique vantage point as editor-in-chief of MAKE magazine, the hub of the newly invigorated do-it-yourself movement, Mark Frauenfelder takes readers on an inspiring and surprising tour of the vibrant world of DIY. The Internet has brought together large communities of people who share ideas, tips, and blueprints for making everything from unmanned aerial vehicles to pedal-powered iPhone chargers to an automatic cat feeder jury-rigged from a VCR. DIY is a direct reflection of our basic human desire to invent and improve, long suppressed by the availability of cheap, mass-produced products that have drowned us in bland convenience and cultivated our most wasteful habits. Frauenfelder spent a year trying a variety of offbeat projects such as keeping chickens and bees, tricking out his espresso machine, whittling wooden

spoons, making guitars out of cigar boxes, and doing citizen science with his daughters in the garage. His whole family found that DIY helped them take control of their lives, offering a path that was simple, direct, and clear. Working with their hands and minds helped them feel more engaged with the world around them. Frauenfelder also reveals how DIY is changing our culture for the better. He profiles fascinating "alpha makers" leading various DIY movements and grills them for their best tips and insights. Beginning his journey with hands as smooth as those of a typical geek, Frauenfelder offers a unique perspective on how earning a few calluses can be far more rewarding and satisfying than another trip to the mall.

The toxicity and fate of pharmaceuticals and other emerging micro-organic contaminants in the natural and built environments have been the focus of much research over the last twenty years. Recently, particular focus has recently been centred on the fate of antimicrobial chemicals, including antibiotics and antifungals. The occurrence of such chemicals in the environment is thought to contribute to the selection of resistance in exposed microorganisms. This special issue (SI) brings together a broad range of recent advances in the field of emerging micro-organic contaminants, ranging from medicinal contaminants to industrial chemicals in the environment. Notably, these range from chemical extraction and large-scale analysis to adverse effects on non-target aquatic organisms and potential risk to humans via contaminated foodstuffs. Additionally, this special issue also presents novel contaminant treatment/ degradation methods of both physical and biological nature.

Leading scholars summarize the current research on risk, protection, and resilience in the context of youth violence and its implications for practice with children and families. It describes an emerging framework for understanding social and health problems and for developing more effective programs for interventions. This book describes resilient children by examining risk factors for violence and explores the factors that lead some children to resist or adapt to risk. The concept of resilience has been applied to family, school, neighborhood, and organizational contexts. Educational, family, and community resilience are used as the framework to describe social systems that possess risk factors. By understanding why some systems with risk factors are adaptable, information for assessment can be applied to service plans, that will be more effective in treating children at risk of antisocial, aggressive behavior. Only a killer hears their prayers. The first thriller in Richard Montanari's Sunday Times

At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.
