This classic manual for structural steelwork design was first published in 1956. Since then, it has sold many thousands of copies worldwide. The fifth edition is the first major revision for 20 years and is the first edition to be fully based on limit state design, now used as the primary design method, and on the UK code of practice, BS 5950. It provides, in a single volume, all you need to know about structural steel design.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

Helen Hardacre, a leading scholar of religious life in modern Japan, examines the Japanese state's involvement in and manipulation of shinto from the Meiji Restoration to the present. Nowhere else in modern history do we find so pronounced an example of government sponsorship of a religion as in Japan's support of shinto. How did that sponsorship come about and how was it maintained? How was it dismantled after World War II? What attempts are being made today to reconstruct it? In answering these questions, Hardacre shows why State shinto symbols, such as the Yasukuni Shrine and its prefectural branches, are still the focus for bitter struggles over who will have the right to articulate their significance. Where previous studies have emphasized the state bureaucracy responsible for the administration of shinto, Hardacre goes to the periphery of Japanese society. She demonstrates that leaders and adherents of popular religious movements, independent religious entrepreneurs, women seeking to raise the prestige of their households, and men with political ambitions all found an association with shinto useful for self-promotion; local-level civil administrations and parish organizations have consistently patronized shinto as a way to raise the prospects of provincial communities. A conduit for access to the prestige of the state, shinto has increased not only the power of the center of society over the periphery but also the power of the periphery over the center.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.
