

Research Methods For Business Students 5th Edition

Business Research Methods is the complete introduction to doing business research and is an ideal guide for students embarking on a research project. Developed specifically with business and management students in mind, this textbook explores the nature and purpose of business research and the issues it entails, while also providing students with practical advice through "Tips and skills" boxes. In addition to a broad range of relevant examples, the book features a substantial discussion of ethics, and a strong emphasis on the most frequent challenges faced by students, such as choosing a research question, planning a project, and writing it up. Fresh voices and perspectives run throughout this edition. New author, Bill Harley, further internationalizes the book's coverage, based on his expertise in the Australian business and management context. Also hear from Amrit, Jordan, Anna, Ed, and Alex - an additional five students whose personal insights and advice in the "student experience" feature help you avoid common mistakes, and follow their successful strategies when undertaking your own research project. This edition has been extensively revised, updated, and streamlined. Coverage of E-Research is now woven throughout the entire book to reflect the centrality of internet-based research methods. The book is accompanied by a suite of online resources that include: For students: * Multiple choice questions * Research Project guide * Interviews with students * Data sets * Using Excel in data analysis (in Excel) * Web links For lecturers: * Test bank * Discussion questions * PowerPoint slides * Lecturer's guide * Case studies * Figures and plates from the text * VLE cartridge

Written by Chinese authors who having both successfully completed Masters degrees and PhDs and become lecturers at UK universities, are equipped to provide Chinese students with straightforward guidance to help overcome the cultural and language difficulties they are confronted with, and to support them in their undertaking of the research methods section of their dissertations. The book comprehensively covers both the theory and practice and includes a number of features to support learning including: Chinese translations of key concepts and definitions Tips about how to use different methods in the Chinese context Clear definitions of key terms Short illustrative examples A list of useful resources about Chinese research The book also features examples of Chinese research from the authors' own work and from top journals to illustrate how the methods can be applied in the Chinese context. Suitable reading for undergraduate and postgraduate students across all business and management disciplines.

Managers increasingly must make decisions based on almost unlimited information. How can they navigate and organize this vast amount of data? Essentials of Business Research Methods provides research techniques for people who aren't data analysts. The authors offer a straightforward, hands-on approach to the vital managerial process of gathering and using data to make clear business decisions. They include such critical topics as the increasing role of online research, ethical issues, data mining, customer relationship management, and how to conduct information-gathering activities more effectively in a rapidly changing business environment. This is the only such book that includes a chapter on qualitative data analysis, and the coverage of

quantitative data analysis is more extensive and much easier to understand than in other works. The book features a realistic continuing case throughout the text that enables students to see how business research information is used in the real world. It includes applied research examples in all chapters, as well as Ethical Dilemma mini - cases, and interactive Internet applications and exercises.

Now in its Fifth Edition, this much-loved text offers theoretical and philosophical depth as well as insights into practice. The text covers the entire research process in an accessible way and provides critical, thoughtful treatment of important issues like ethics and politics, making it an invaluable companion for any business and management student. New to the Fifth Edition: Expanded to include examples from across business and management including Marketing, International Business and Psychology Up-to-date, international examples and cases from a range of countries Introductory chapter looks at writing proposals in detail Chapter on the literature review now includes how to critically review Move towards new technologies and social media including discussion of wikis and cloud sourcing Improved structure and flow, with three chapters on qualitative methods and three on quantitative methods Additional practical exercises which are linked to key research tasks throughout The companion website (<https://edge.sagepub.com/easterbysmith>) offers a wealth of resources for both lecturers and students including, for lecturers, an instructor's manual and PowerPoint slides and, for students, author podcasts, journal articles, web links, MCQs, datasets and a glossary.

In *Template Analysis*, Nigel King and Joanna Brookes guide you through the origins of template analysis and its place in qualitative research, its basic components, and the main strengths and limitations of this method. Practical case studies and examples from published research then guide you through how to use it in your own research project. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as a reference book for doctoral students and faculty members interested in the method. Part of SAGE's *Mastering Business Research Methods*, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the *Mastering Business Research Methods* series.

Are you conducting business research for the first time and aren't sure where to begin? This book gives you everything you need to successfully complete your research project. From choosing a direction for your research and considering ethics to data collection and presenting your results, it offers straightforward guidance on every step of the research process. Covering topics such as social media research, group working and how to research your own organisation, it provides a thorough view of research for business and management students. The book: Enables you visualise how each stage of research links to the next, and makes sure you don't miss a step with a handy 'Research Project Wheel' Empowers you to increase your employability and develop transferable skills, such as proposal writing and data analysis Provides student research examples that show common challenges you might face - and how to address them. Key features include research snapshots, offering short how-to examples for doing real

research, and concept cartoons, which put forward different views about research so you can broaden your knowledge. It also has end-of-chapter questions, online multiple choice questions and Kahoot! questions so you can test your understanding. Guiding you through working with and understanding both primary and secondary data, this book is the perfect companion for any undergraduate conducting a business and management research project.

Addresses what are perhaps the two biggest problems in teaching Research Methods - getting students interested in methodology and theory and helping them to understand the practical relevance.

Research Methods for Graduate Business and Social Science Students is a fundamental and easy guide to studying research methods. In addition to the general concepts relating to research methods, broad research issues and theoretical concepts critical to research are discussed. The book is written in a highly reader-friendly manner and contains plenty of examples and helpful practical exercises at the end of each chapter to reinforce and enjoy learning. Divided into 16 chapters, the authors aim to clearly and concisely explain the basics of quantitative and qualitative analysis and research to students, including: - Research ethics - Formulation and process of research - Literature analysis and critical reading - How to plan and implement a research project - Data collection, survey research and data management - Practical research techniques - Elementary and advanced statistical analyses - Assessment, reliability and validity of research work - Guidelines on research writing and structures of dissertation

In Case Study Research, Bill Lee and Mark Saunders describe the properties of case study designs in organizational research, exploring the uses, advantages and limitations of case research. They also demonstrate the flexibility that case designs offer, and challenges the myths surrounding this approach. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support students by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series and tell you more about the first three books.

Electronic Inspection Copy available for instructors here The highly-anticipated Fourth Edition of this bestselling text still succeeds in providing a step-by-step guide to implementing particular methodologies, while simultaneously encouraging a strong awareness of philosophical assumptions. NEW to the Fourth Edition: - Expanded coverage to accommodate recent developments in management research methodology. New topics include: doing a literature review, case study research, action research, mixed methods, and writing-up. - Packed with practical research examples and exercises that encourage students to reflect upon the issues raised and relate them to their own experience. - Additional learning features including critical reflection boxes, case studies and chapter summaries. - A companion website with a full Instructors' Manual and PowerPoint slides. Students have free access to downloadable journal articles and author podcasts. Visit the companion website at www.sagepub.co.uk/gillandjohnson Using a practical approach, but with explicit attention to the role of theory in management research, the new edition of Research Methods for Managers is a stimulating guide for students in management, organization and organization research.

Doing Research in Business and Management brings the theory and techniques of research methods to life and covers all of the areas of

research, from a review of secondary data or literature, or writing a research proposal, to completing an entire research project. The book is written for students on undergraduate and postgraduate degree programmes in business, management or related disciplines.

In *Analysing Quantitative Survey Data*, Jeremy Dawson introduces you to the key elements of analysing quantitative survey data using classical test theory, the measurement theory that underlies the techniques described in the book. The methodological assumptions, basic components and strengths and limitations of this analysis are explained and with the help of illustrative examples, you are guided through how to conduct the key procedures involved, including reliability analysis, exploratory and confirmatory factor analysis. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods Series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series

In *Analysing Quantitative Data*, Charles A. Scherbaum and Kristen M. Shockley guide the reader through *Understanding Quantitative Data Analysis, Basic Components of Quantitative Data Analysis, Conducting Quantitative Data Analysis, Examples of Quantitative Data Analysis and Conclusions*. An appendix contains Excel Formulas. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods Series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series

Addresses the needs of HRM students writing either a management report or dissertation, providing both a theoretical framework and practical guidance. This guide to the planning and execution of HRM research projects seeks to develop the knowledge and skills of first-time researchers for effective research into HRM issues in organisations.

La 4e de couverture indique : "If you need any help with your research project or dissertation then this fully revised and updated 2nd edition is ideal for you. *Doing Research in Business and Management* brings research methods to life, covering critical literature review projects, projects using existing data, and those projects where you collect your own data. It explains how to write your research proposal and complete your entire research project. The concise and easy-to-read style combined with clear tables and diagrams makes it highly accessible. 'Definition' boxes explain key terms and 'Research in practice' boxes show how research is used in real life, making this the book you need to successfully complete your project. New to the 2nd edition: latest sources of online secondary data, extended discussion of research philosophies and theory development, using observation, and how to reference. Don't forget to visit www.pearsoned.co.uk/saunders for online tutorials on research software, such as SPSS, and where you can search the Internet more efficiently and effectively with our Smarter Online Searching Guide!"

In *Conducting Research Interviews*, Catherine Cassell guides you through conceptualizing the interview, preparing for the research interview, conducting the interview, examples, conclusions and next steps. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods Series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis.

Get Free Research Methods For Business Students 5th Edition

Watch the editors introduce the Mastering Business Research Methods series.

Research Methods for Business and Social Science Students aims to present a clear discussion of the research methods employed in various disciplines related to our daily life problems. The theoretical basis of research methods is explained clearly and succinctly. Collecting data is a key part of the book and this includes both qualitative and quantitative methods of data collection, along with the advantages and disadvantages of each method. The book also describes in clear terms how students can analyse data, interpret results and link these to the literature review and hence their own contribution. It sets out a range of fundamental ideas in research methods, such as deductivism and inductivism, and explains why methodology is not the same as method. In this second edition every chapter has been re-written to be more readable and also to include more examples. The authors have also added a real student research proposal and a multiple-choice test with answers for the readers to test their own understanding of the ideas in the book. The book has been designed to illustrate research tools in a clear and accessible manner through chapters on such topics as formulating research, research design, data analysis and writing up the research results.

An adaptation of 'Social Research Methods' by Alan Bryman, this volume provides a comprehensive introduction to the area of business research methods. It gives students an assessment of the contexts within which different methods may be used and how they should be implemented.

Summary: "Research Methods and Statistics for Business ... includes 30 research designs and 30 bivariate and multivariate statistical tests, taking students through a step-by-step process to select the appropriate statistical method. The author's approach effectively integrates research and statistics, beginning with research methodology and then guiding students through the process of conducting their own statistical research, from the initial process of selecting the research topic through the finished research paper."--Waveland website, viewed 10th June, 2011.

Organizations need research, and managers have to be able to commission, judge and use others' research as well as conduct research themselves to inform business decisions. Business Research Methods helps you understand the challenges of carrying out worthwhile research into significant issues and develop a wide range of research-related professional skills. Guiding you through the process of selecting, carrying out and reporting on a successful research project, it breaks down the research process, from exploring the literature and crafting a research proposal to practical research management and addressing the transferable skills of project management and communication. Business Research Methods places research firmly in the real world, exploring why research is done and how to ensure that projects are meaningful for organizations. Examples and case studies, including examples of students' projects, give learners with little or no work experience a meaningful context in which to relate their own projects. Online supporting resources for lecturers include an instructor's manual with additional activities and supporting handouts, lecture slides and figures and tables from the text. Resources for students include web links, templates, quizzes, activities, examples of practice and sample questionnaire results for students.

This updated and revised edition offers a comprehensive overview of key research methods and the main choices available when undertaking research in business and management. New to this edition is a comprehensive, practical guide on how to write your dissertation - invaluable to all. It is a clear, concise and practical guide containing wealth of outstanding examples for each method covered. Central to this edition is the 'methods map' (chapter 4), which sets out a logical process for researchers to articulate their position in relation to five key aspects of their research philosophy. In addition, the editors have developed a free app to accompany the book and this enables novice

researchers to quickly develop a comprehensive justification of their particular research design in an interactive way. Taking you through the entire life cycle of a dissertation, the text covers everything from the purposes of research through to chapters on gathering primary and secondary data; using literature; quantitative and qualitative research; managing your research; using data and research ethics. Individual chapters are allied to a powerful critical commentary showing how some of the world's leading scholars have used particular methods in their own research. Carefully constructed to achieve the greatest clarity for the student the text gives the reader: * In-text exercises * End of chapter' review questions with solutions* Exemplar papers identified and discussed for each of the main methods *Directed further reading for developing understanding in key areas It is an essential learning aid for upper level undergraduates and postgraduates across a wide range of business and management courses and it comes with a range of supported learning materials including tutorials, lecture slides and tutor notes. Kevin O'Gorman is Professor of Management and Business History and Head of Business Management in the School of Languages and Management in Heriot-Watt University, Edinburgh. He trained in Glasgow, Salamanca and Rome as a philosopher, theologian and historian. His research interests have a dual focus: Origins, history and cultural practices of hospitality, and philosophical, ethical and cultural underpinnings of contemporary management practices. Using a wide range of methodological approaches he has published over 80 journal articles, books, chapters, and conference papers in business and management studies. Robert MacIntosh is Professor of Strategy and Head of the School of Management and Languages at Heriot-Watt University. He trained as an engineer and has worked at the Universities of Glasgow and Strathclyde. His research on the ways in which top teams develop strategy and on organizational change has been published in a wide range of outlets. He has a long-standing interest in research methods for business and management studies and has published on the relevance of management research using methods that include ethnography and action research. He has consulted extensively with public and private sector organizations and sits on the board of the charity Turning Point Scotland.

Designing and Managing a Research Project is a concise, easy to read text designed to guide business students through the various aspects of designing and managing research projects. The focus is on research projects that have a solid academic basis, although some implications for more applied projects are also highlighted. It is divided into three main sections, "Laying the Foundations", "Undertaking the Research", and "Communicating the Results", which present a logical flow for the research project. A unique aspect of the book is the inclusion of particular chapters on topics like supervision, group work and ethics, and the focus of the discussion of data analysis (qualitative and quantitative). The authors have applied their years of past experience in supervising student projects, when writing this book to provide some actual examples of problems and practical guidelines.

This book takes an extremely practical, skills-based approach and covers both the research methods themselves and the process of choosing, planning, researching and writing the dissertation.

Brings the theory, philosophy and techniques of research to life and enables students to understand the relevance of the research methods. This book helps you learn from worked examples and case studies based on real student research, illustrating what to do and what not to do in your project.

Revised edition of Research methods for business students, 2012.

Research Methods For Business, 8th Edition explains the principles and practices of using a systematic, organized method for solving problematic issues in business organizations. Designed to help students view research from the perspective of

management, this popular textbook guides students through the entire business research process. Organized into six main themes—Introduction, Defining the Management and the Research Problem, Theory, Collecting Information, Drawing Conclusions, and Writing and Presenting the Research Report—the text enables students to develop the skills and knowledge required to successfully create, conduct, and analyze a research project. Now in its eighth edition, this popular textbook has been thoroughly updated to incorporate substantial new and expanded content, and reflect current research methods and practices. The text uses a unique blended learning approach, allowing instructors the flexibility to custom-tailor their courses to fit their specific needs. This innovative approach combines the face-to-face classroom methods of the instructor with internet-based activities that enable students to study what they want, when they want, at their own pace.

Research Methods for Business Students Pearson Education

This book introduces students to major research processes and methods used in business research. The research process includes all steps in the research project beginning from the problem formulation, through research design, proposal, conducting the research, deriving conclusions, writing research report, and preparing and making presentation. The major research methods include risk assessment, statistics, sampling, hypothesis testing, surveys, and comparative analysis. It helps students develop solid knowledge and practical skills sufficient for conducting a research project from its initiation, through completion, and delivery. The author provides multiple examples as well as the questions and problems for self-testing and self-evaluation in each chapter. The book is structured to provide a smooth flow of understanding and learning the material along the learning curve and is concise enough to fit a one-semester course.

A practical, concise, straightforward guide. Covering the entire process from reviewing the literature to writing up results, it has balanced coverage of quantitative and qualitative methods and a popular troubleshooting section. It provides all the tools needed to embark on and complete successful research, underpinned by academic rigour.

In *Conducting Action Research*, Coghlan and Shani explain how action research differs from more detached research methods and provides expert guidance on how to engage effectively with it, helping the reader to complete both a successful research project and produce findings that are useful in an organizational context. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's *Mastering Business Research Methods*, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the *Mastering Business Research Methods* series [Electronic Inspection Copy available for instructors here](#) The only case study research textbook written exclusively for students of Business and related disciplines. Using a step-by-step approach, *Case Study Research for Business* takes you right through the case study research process from research design and data collection using qualitative and quantitative methods, to research analysis, writing up and presenting your work. Key features: - Takes a multidisciplinary approach to case study research design by

drawing on research philosophies to improve student understanding of these critical research traditions and hence provide firmer theoretical foundations for their research - Coverage of contemporary topics such as research ethics and access - Packed with practical examples from all areas of business - Pedagogical features include vignettes, exercises and 'cases' which directly relate to business research Case Study Research for Business will prove a valuable resource for undergraduate, postgraduate and research students of business and related disciplines.

Part of SAGE's Mastering Business Research Methods series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support students by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Necessary Condition Analysis (NCA) is an emerging method of data analysis, based on the idea that research factors can be necessary for an outcome: if the condition is not there, then the result will not occur. These necessary conditions are everywhere, and NCA is an intuitive and straightforward means of finding and testing data, either as a standalone tool or as a complement to other research methods. This book is an invaluable guide to using NCA effectively in business and management dissertations, and offers practical guidance and insight into how to successfully transcribe and analyse data using the NCA approach in research projects. Jan Dul is Professor of Technology and Human Factors at Rotterdam School of Management, Erasmus University, The Netherlands.

This clearly written introduction is ideal for business students taking a course in research methods, or undertaking their first dissertation or report on a work placement project. Written in a concise and accessible style, it demonstrates the importance of a scientific approach to business research and problem-solving projects. It shows students how to formulate a problem, choose a research method, argue and motivate, and how to collect, analyse and present the data.

Since research is best learned by doing, this book emphasizes a hands-on, do-it yourself approach. The readers have many opportunities to see how business researches affect and support management decision. The book used a case study approach for all the chapters with interactive videos. The book gave emphasis to quantitative data analysis using a software program, IBM SPSS 20.0. The data analysis chapters illustrate in detail each step in running the software programs. The software programs files are provided for all data sets: outputs, demonstration movies, and screen captures are on the Website. This book provides students most extensive help available to learn quantitative data analysis using SPSS. Thus, the authors prepared this textbook and all the additional materials to help the students to understand the functional principles of business research and how to apply them in real-life situations.

The hosting of sports events – whether large international events, or smaller niche events – can have a significant and long-lasting impact on the local environment, economy and society. Strategic Sports Event Management provides students and event managers with an insight into the strategic management of sports events of all scales and types, from international mega-events to school sports. Combining a unique conceptual framework with a practical, step-by-step guide to planning, organising, managing and evaluating events, the book explains the importance of adopting a strategic approach, showing how to implement strategies

that lead to successful outcomes over the short and long-term. This fully revised and updated third edition uses international case studies in every chapter, from the NBA and NFL to Formula One and the English Premier League, offering real-world insight into both larger and smaller events. In addition, woven throughout the book are a series of in-depth studies of the London Olympic Games, the ultimate sporting event and an important point of reference for all practising and aspiring event managers. The book covers every key aspect of the sports event management process, including sports organizations, such as the IOC, FIFA and IAAF, and their interactions with event partners, the media and promoters short-term and long-term benefits of the planning process event impact and legacy operational functions including finance, ticketing, transport, venues, IT, human resources, and security marketing and communications, including social networking and new media the bidding process research and evaluation. Strategic Sports Event Management is the leading sports event management textbook and is now accompanied by a companion website containing a range of additional teaching and learning features. The book is important reading for all students of sport management or event management, and all practising event managers looking to develop their professional skills..

"This accessible and clearly written textbook provides a comprehensive and in-depth treatment of philosophical, methodological and ethical aspects of conducting business and management research. Illustrative case studies drawing on published research studies are used throughout and readers are given multiple opportunities to consolidate their learning through review and discussion questions, quizzes, and other exercises. At the end of each chapter a case study takes the reader through the realities and practicalities of applying the knowledge to a specific student research project. This will be an invaluable guide for all students seeking to understand and undertake business and management research." Professor Natasha Mauthner, Newcastle University

With over 400,000 copies sold, Research Methods for Business Students, is the definitive and market-leading textbook for Business and Management students conducting a research-led project or dissertation. The fully revised 8th edition answers key questions such as: How do I choose my topic and design the research? Why is research philosophy relevant to my research? How do I collect and analyse my data? When and what do I need to write? With the 8th edition you will discover:

- Fully updated chapters incorporating visual methods throughout, detailed insights on drafting the critical literature review, the latest EU data protection regulations, using audio recordings and visual images in observation research, collecting data using diaries, the use of online survey tools, and preparing and presenting an academic poster
- New cases using up-to-date scenarios at the end of each chapter
- Boxed examples throughout of research methods in the news, from student research and in published management research
- A glossary of clear definitions of over 700 research-related terms
- Practical guidance and opportunities for checking your learning and self-reflection to enable you to progress your own research
- Detailed chapters on choosing your topic, critically reviewing the literature, understanding philosophies, research design, access and ethics, secondary data, data collection methods and analysis techniques and writing about and presenting your research
- Teach yourself guides to research software available at www.pearsoned.co.uk/saunders with practice data sets

About the authors Mark NK Saunders is Professor of Business Research Methods and Director of Postgraduate Research Programmes at Birmingham Business School, University of Birmingham. Philip

Lewis was a Principal Lecturer and Adrian Thornhill was a Head of Department, both at the University of Gloucestershire. In *Conducting Focus Groups*, Caroline J. Oates and Panayiota J. Alevizou explain what is involved in conducting focus groups, outlining their main features, use in research, their design and the kind of rich, qualitative data they facilitate. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's *Mastering Business Research Methods*, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the *Mastering Business Research Methods* series

Written specifically for business students, this best-selling, jargon-free textbook highlights each stage of the research process, guiding the reader through actionable steps and explicitly setting out how best to meet a supervisor's expectations. Easy to navigate and full of practical advice, it shows you how to choose a topic and write a proposal, with easy to follow tips and detailed screenshots and diagrams. Key student features include: 'You're the Supervisor' sections - helps students to meet learning objectives 'Common questions and answers' - real-world advice on how to tackle common challenges Examples from different types of international businesses Detailed guidance on software packages such as SPSS Student case studies Annotated further reading Accompanied by a fully integrated companion website designed to support learning. Free to access, it includes author podcasts, guides to online tools, links to downloadable journal articles, examples of completed projects, PowerPoint slides and students' multiple choice questions to test progress. Available on publication: www.uk.sagepub.com/jonathanwilson2e. A must-have title for all business and management students; this is the ideal companion for achieving success in your research project.
