Sams Teach Yourself Game Programming with Visual Basic in 21 Days teaches the reader the art of game programming from the ground up. The reader is assumed to have basic programming knowledge that he wishes to apply to the creation of basic games. Upon completion of the book readers will have learned to build eight games including card games, puzzles, and strategy games, each focusing on a specific task and building the reader's knowledge and skill level. The final week is a culmination of the skills learned in the first two weeks where the reader builds a complete game incorporating sound, animation, etc. Designed to be an all in one solution, this book helps users to get up and running on their computers and learn the pre-loaded software applications. This third edition has been revised and updated to include coverage of new PC hardware and software.

Visual C# .NET is available as part of Microsoft's Visual Studio .NET suite of developer tools ($1,079 to $2,499) or as a standalone product ($109 before MS rebates). With the initial release of Visual Studio.NET in 2001, the focus was on the new language C# and not the developer tool Visual C#. Now that Visual Studio is moving out of the "early adopter" stage and into general acceptance by the bulk of the developer audience, the trend is toward Visual C# as a developer tool with less interest in the basis language. Teach Yourself Visual C# .NET in 24 Hours provides readers with 24 structured lessons with step-by-step guidance to real-world programming tasks including Windows and Web applications. James Foxall moves beyond the

pure syntax covered in most C# books to guide readers through the basics of Visual C# .NET. Each chapter includes practice exercises, tips, notes, and cautions providing easy-to-understand advice on how to start programming quickly. Sidebars provide more experienced readers with tips that will ease their migration from Visual Basic 6 and Visual C++ to Visual C# .NET.

Launched in January of 2013, Vine is a new mobile app and video-sharing service from Twitter. Vine enables users to shoot short (six-second max) looping videos on their mobile phones and then share those videos with online friends. Vine videos (called vines) can be viewed from a user's Vine or Twitter feed, shared via Facebook, or embedded in web pages and blogs. This makes Vine like a video version of Instagram, enabling users to "share life in motion" via social networking. This has made Vine enormously popular, especially among the same younger users who made Instagram a hit. Just three months after its release, Vine has become the #1 free app in Apple's U.S. App Store, and is used on 2.66% of all iOS devices — more than any other video app. In addition, 2.8% of Twitter users are also Vine users . These numbers puts Vine's userbase at somewhere between 4 to 6 million users, who upload more than 2,000 new videos each hour. There is no user manual for Vine, nor much in the way of online help files. Anyone wanting to get on the Vine bandwagon can use some help not just learning the basic shooting and sharing features, but also figuring out how to create more sophisticated types of vines. Sams Teach Yourself Vine in 10 Minutes is a one-stop shop for everything associated with Vine, from shooting basic videos to sharing those videos socially to creating more sophisticated and artistic videos. In short, it is a source of inspiration to aspiring Vine users in an easy step-by-step format. It is accompanied by a series of Vine videos, available for viewing from Que's website and YouTube channel, as well as the author Michael Miller's Vine feed. These videos demonstrate the various video techniques discussed in the book to make you an expert!
