Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

This book provides a comprehensive and practical guide to Islamic finance. It covers a broad range of important topics including Islamic banking, capital markets, Takaful, wealth management, Fintech in Islamic finance, compliance and governance issues. It begins by introducing Islamic banking, covering its objectives, principles and evolution, before moving on to discuss the religious foundations of Islamic finance. The prohibition of Riba and Gharar and Islamic contracts are explored, before Islamic deposits, and financing are discussed in practice. A comparative analysis is provided between Islamic banking products and services in a range of countries throughout the world. Information technology including fintech, payment and settlement networks, opportunities and challenges are also addressed. Corporate governance, Islamic capital markets, and Islamic insurance (Takaful) are all explored, before concluding with a chapter on wealth management and Islamic investment funds. It features case studies based on the authors' own experiences consulting with Islamic financial institutions. Ideal for those looking to improve their understanding of practical Islamic financing models, contracts, product structures and product features, this book will appeal to both students and practitioners in Islamic finance and banking, those based in Islamic financial institutions, and those based in conventional financial institutions who may be looking to enter the Islamic financial market.

The modern histories of China and Japan are inexorably intertwined. Their relationship is perhaps most obvious in the fields of political, economic, and military history, but it is no less true in cultural and art history. Yet the traffic in artistic practices and practitioners between China and Japan remains an understudied field. In this volume, an international group of scholars investigates Japan's impact on Chinese art from the mid-nineteenth century through the 1930s.

Individual essays address a range of perspectives, including the work of individual Chinese and Japanese painters, calligraphers, and sculptors, as well as artistic associations, international exhibitions, the collotype production of artwork, and the emergence of a modern canon.

This unique collection of reworked and heavily illustrated essays, by one of the leading scholars of Chinese history, re-examines the relationship between the present day state and society in China.
