An invitation to readers from every walk of life to rediscover the impractical splendors of a life of learning In an overloaded, superficial, technological world, in which almost everything and everybody is judged by its usefulness, where can we turn for escape, lasting pleasure, contemplation, or connection to others? While many forms of leisure meet these needs, Zena Hitz writes, few experiences are so fulfilling as the inner life, whether that of a bookworm, an amateur astronomer, a birdwatcher, or someone who takes a deep interest in one of countless other subjects. Drawing on inspiring examples, from Socrates and Augustine to Malcolm X and Elena Ferrante, and from films to Hitz's own experiences as someone who walked away from elite university life in search of greater fulfillment, *Lost in Thought* is a passionate and timely reminder that a rich life is a life rich in thought. Today, when even the humanities are often defended only for their economic or political usefulness, Hitz says our intellectual lives are valuable not despite but because of their practical uselessness. And while anyone can have an intellectual life, she encourages academics in particular to get back in touch with the desire to learn for its own sake, and calls on universities to return to the person-to-person transmission of the habits of mind and heart that bring out the best in us. Reminding us of who we once were and who we might become, *Lost in Thought* is a moving account of why renewing our inner lives is fundamental to preserving our humanity.

This volume brings together ten essays by Alexandra Walsham dealing with Catholic Reformation in Protestant Britain. It revisits questions about the Catholic experience in England, Wales and Scotland, and situates it in the wider European context of the Counter Reformation to take stock of the current scholarly debate and suggest avenues for future research. Two of the chapters are entirely new, whilst the others are all updated and revised versions of previously published pieces.

'A landmark in social thought. Henrich may go down as the most influential social scientist of the first half of the twenty-first century' MATTHEW SYED Do you identify yourself by your profession or achievements, rather than your family network? Do you cultivate your unique attributes and goals? If so, perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich and Democratic. Unlike most who have ever lived, WEIRD people are highly individualistic, nonconformist, analytical and control-oriented. How did WEIRD populations become so psychologically peculiar? What part did these differences play in our history, and what do they mean for our collective identity? Joseph Henrich, who developed the game-changing concept of WEIRD, uses leading-edge research in anthropology, psychology, economics and evolutionary biology to explore how changing family structures, marriage practices and religious beliefs in the Middle Ages shaped the Western mind, laying the foundations for the world we know today. Brilliant, provocative, engaging and surprising, this landmark study will revolutionize your understanding of who - and how - we are now. 'Phenomenal ... The only theory I am aware of that attempts to explain broad patterns of human psychology on a global scale' Washington Post 'You will never look again in the same way at your own seemingly universal values' Uta Frith, Professor of Cognitive Development, University College London

English society in the late seventeenth and early eighteenth centuries was fascinated by deception, and concerns about deceptive narratives had a profound effect on reading practices. Kate Loveman's interdisciplinary study explores the

ways in which reading habits, first developed to deal with suspect political and religious texts, were applied to a range of genres, and, as authors responded to readers' critiques, shaped genres. Examining responses to authors such as Defoe, Swift, Richardson and Fielding, Loveman investigates reading as a sociable activity. She uncovers a lost critical discourse, centred on strategies of 'shamming', which involved readers in public displays of reason, wit and ironic pretence as they discussed the credibility of oral and written narratives. Widely understood by early modern readers and authors, the codes of this rhetoric have now been forgotten, to the detriment of our perception of the period's literature and politics. Loveman's lively book offers a striking new approach to Restoration and eighteenth-century literary culture and, in particular, to understanding the development of the novel.

AN INVESTIGATION OF EPIC FINANCIAL INTRIGUE, RENDER UNTO ROME EXPOSES THE SECRECY AND DECEIT THAT RUN COUNTER TO THE VALUES OF THE CATHOLIC CHURCH. The Sunday collection in every Catholic church throughout the world is as familiar a part of the Mass as the homily and even Communion. There is no doubt that historically the Catholic Church has been one of the great engines of charity in history. But once a dollar is dropped in that basket, where does it go? How are weekly cash contributions that can amount to tens of thousands of dollars accounted for? Where does the money go when a diocese sells a church property for tens of millions of dollars? And what happens when hundreds of millions of dollars are turned over to officials at the highest ranks, no questions asked, for their discretionary use? The Roman Catholic Church is the largest organization in the world. The Vatican has never revealed its net worth, but the value of its works of art, great churches, property in Rome, and stocks held through its bank easily run into the tens of billions. Yet the Holy See as a sovereign state covers a mere 108 acres and has a small annual budget of about \$280 million. No major book has examined the church's financial underpinnings and practices with such journalistic force. Today the church bears scrutiny by virtue of the vast amounts of money (nearly \$2 billion in the United States alone) paid out to victims of clergy abuse. Amid mounting diocesan bankruptcies, bishops have been selling off whole pieces of the infrastructure—churches, schools, commercial properties—while the nephew of one of the Vatican's most powerful cardinals engaged in a lucrative scheme to profiteer off the enormous downsizing of American church wealth.

Why do Americans read contemporary fiction? This question seems simple, but is it? Do Americans read for the purpose of aesthetic appreciation? To satisfy their own insatiable intellectual curiosities? While other forms of media have come to monopolize consumers' leisure time, in the past two decades book clubs have proliferated, Amazon has sponsored thriving online discussions, Oprah Winfrey has inspired millions of viewers to read both contemporary works and classics, and novels have retained their devoted following within middlebrow communities. In *Reading as Therapy*, Timothy Aubry argues that contemporary fiction serves primarily as a therapeutic tool for lonely, dissatisfied middle-class American readers, one that validates their own private dysfunctions while supporting elusive communities of strangers unified by shared feelings. Aubry persuasively makes the case that contemporary literature's persistent appeal depends upon its capacity to perform a therapeutic function. Aubry traces the growth and proliferation of psychological concepts focused on the subjective interior within mainstream, middle-class society and the impact this has had on contemporary fiction. The prevailing tendency among academic critics has been to decry the personal emphasis of contemporary fiction as complicit with the rise of a narcissistic culture, the ascendancy of liberal individualism, and the breakdown of public life. *Reading as Therapy*, by contrast, underscores the varied ideological effects that therapeutic culture can foster. To uncover the many unpredictable ways in which contemporary literature answers the psychological needs of its readers, Aubry considers several different venues of reader-response—including Oprah's Book Club and Amazon customer reviews—the promotional strategies of publishing houses, and a variety of contemporary texts, ranging from Khaled Hosseini's *The Kite Runner* to Anita Shreve's *The Pilot's Wife* to David Foster Wallace's *Infinite Jest*. He concludes that, in the face of an atomistic social landscape, contemporary fiction gives readers a therapeutic vocabulary that both reinforces the private sphere and creates surprising forms of sympathy and solidarity among strangers.

Drawing on interviews with more than three hundred nuns from a variety of orders and reflecting a diversity of beliefs, this candid study of life behind the walls of the convent describes their daily lives, their daily worship services, vow ceremonies, friendships, attitude toward the modern world and its consumerism, and interior lives. Reinventing Rhetoric Scholarship: Fifty Years of the Rhetoric Society of America collects essays reflecting on the history of the Rhetoric Society of America and the organization's 18th Biennial Conference theme, "Reinventing Rhetoric: Celebrating the Past, Building the Future," on the occasion of the Society's 50th anniversary. The opening section, "Looking Back: RSA at Fifty" describes the establishment of the organization and includes remembrances from some of the founders. These historical essays consider the transdisciplinary nature of RSA scholarship and pedagogy and offer critical reviews of trends in some of its subfields. The essays in the second section, "Reinventing the Field: Looking Forward," focus on the future of scholarship and pedagogy in the field, from reinventing scholarship on major figures such as Vico, Burke, and Toulmin, to reconsidering future work on rhetoric and democracy, rhetoric and religion, and rhetoric from both sides of the Atlantic. The authors in the last section, "Rhetorical Interventions," offer critical interventions on contemporary issues, including food justice, fat studies, indigenous protest, biopolitics, Chinese feminism, and anti-establishment ethos. Together, the essays in Reinventing Rhetoric Scholarship offer a Janus-faced portrait of a discipline on the occasion of its golden anniversary: a loving and critical remembrance as well as a robust exploration of possible futures. Christianity claims the allegiance of up to a third of the world's population and has had a profound impact on almost all the rest. In his accessible and comprehensive history, leading authority David Chidester examines the key doctrines and developments, from the ancient origins of Christian beliefs and practices during the first five centuries, through the historical transitions of the mediaeval and Byzantine era, to the global transformations of Christianity in the modern world. Alongside this broad panorama is a richly human story which the author encapsulates in incisive character sketches and historical vignettes.

Rhetoric and feminism have yet to coalesce into a singular recognizable field. In this book, author Cheryl Glenn advances the feminist rhetorical project by introducing a new theory of rhetorical feminism. Clarifying how feminist rhetorical practices have given rise to this innovative approach, Rhetorical Feminism and This Thing Called Hope equips the field with tools for a more expansive and productive dialogue. Glenn's rhetorical feminism offers an alternative to hegemonic rhetorical histories, theories, and practices articulated in Western culture. This alternative theory engages, addresses, and supports feminist rhetorical practices that include openness, authentic dialogue and deliberation, interrogation of the status quo, collaboration, respect, and progress. Rhetorical feminists establish greater representation and inclusivity of everyday rhetors, disidentification with traditional rhetorical practices, and greater appreciation for alternative means of delivery, including silence and listening. These tenets are supported by a cogent reconceptualization of the traditional rhetorical appeals, situating logos alongside dialogue and understanding, ethos alongside experience, and pathos alongside valued emotion. Threaded throughout the book are discussions of the key features of rhetorical feminism that can be used to negotiate cross-boundary mis/understandings, inform rhetorical theories, advance feminist rhetorical research methods and methodologies, and energize feminist practices within the university. Glenn discusses the power of rhetorical feminism when applied in classrooms, the specific ways it inspires and sustains mentoring, and the ways it supports administrators, especially directors of writing programs. Thus, the innovative theory of rhetorical feminism—a theory rich with tactics and potentially broad applications—opens up a new field of research, theory, and practice at the intersection of rhetoric and feminism.

Would you tell your deepest secrets to a relative stranger? And if you did, would you feel vulnerable? Cleansed? Or perhaps even worse than you did before? Confession has always performed a complex role in society, always created mixed feelings in its practitioners. As an acknowledgement of sinfulness, it can provide immense psychological relief; but while aiming to replace remorse with innocence, its history has become inextricably intertwined with eroticism and shame. The Dark Box is an erudite and personal history; Cornwell draws on his own memories of Catholic boyhood, and weaves it with the story of confession from its origins in the early church to the current day, where its enduring psychological potency is evidenced by everything from the Vatican's 'confession app' to Oprah Winfrey's talk shows. Since the 16th century, seclusion of two individuals in the intimate 'dark box', often discussing sexual actions and thoughts, has eroticised the experience of confession. When, in 1905, Pius X made confession a weekly, rather than yearly ritual, the horrific cases of child abuse which have haunted the Catholic church in the twentieth century became possible. John Cornwell's impassioned treatise on the dangers of confession is now available in paperback.

In the nineteenth century, advanced educational opportunities were not clearly demarcated and defined. Author Amy J. Lueck demonstrates that public high schools, in addition to colleges and universities, were vital settings for advanced rhetoric and writing instruction. Lueck shows how the history of high schools in Louisville, Kentucky, connects with, contradicts, and complicates the accepted history of writing instruction and underscores the significance of high schools to rhetoric and composition history and the reform efforts in higher education today. Lueck explores Civil War- and Reconstruction-era challenges to the University of Louisville and nearby local high schools, their curricular transformations, and their fate in regard to national education reform efforts. These institutions reflect many of the educational trends and developments of the day: college and university building, the emergence of English education as the dominant curriculum for higher learning, student-centered pedagogies and educational theories, the development and transformation of normal schools, the introduction of manual education and its mutation into vocational education, and the extension of advanced education to women, African American, and working-class students. Lueck demonstrates a complex genealogy of interconnections among high schools, colleges, and universities that demands we rethink our categories and standards of assessment and our field's history. A shift in our historical narrative would promote a move away from an emphasis on the preparation, transition, and movement of student writers from high school to college or university and instead allow a greater focus on the fostering of rich rhetorical practices and pedagogies at all educational levels. As the definition of college-level writing becomes increasingly contested once again, Lueck invites a reassessment of the discipline's understanding of contemporary programs based in high schools like dual-credit and concurrent enrollment.

With over 70,000 copies of the first edition in print, this radical treatise on public education has been a New Society Publishers' bestseller for 10 years! Thirty years in New York City's public schools led John Gatto to the sad conclusion that compulsory schooling does little but teach young people to follow orders like cogs in an industrial machine. This second edition describes the wide-spread impact of the book and Gatto's "guerrilla teaching." John Gatto has been a teacher for 30 years and is a recipient of the New York State Teacher of the Year award. His other titles include *A Different Kind of Teacher* (Berkeley Hills Books, 2001) and *The Underground History of American Education* (Oxford Village Press, 2000).

Acts of Reading examines how John Foxe's *Actes and Monuments* shaped reading and interpretive practice in the early modern period and addresses the impact of recent electronic editions of Foxe's text on current reading practice and scholarship. The collection draws on history-of-the-book scholarship to make a plea for the centrality of Foxe to any discussion of Renaissance literary history. These essays also productively attend to the relationship between the materiality of books and the conceptual assumptions that govern our engagement with them. The anthology's focus on digital editions of Foxe's *Book of Martyrs* allows it to explore the often conflicted relationship between modern technologies of book production and reception and the early modern texts transmitted via these technologies. More broadly, *Acts of Reading* explores how books, and our encounters with them through different media, turn us into who we are.
