Recently appointed as the new U. S. Poet Laureate, Ted Kooser has been writing and publishing poetry for more than forty years. In the pages of *The Poetry Home Repair Manual*, Kooser brings those decades of experience to bear. Here are tools and insights, the instructions (and warnings against instructions) that poets—aspiring or practicing—can use to hone their craft, perhaps into art. Using examples from his own rich literary oeuvre and from the work of a number of successful contemporary poets, the author schools us in the critical relationship between poet and reader, which is fundamental to what Kooser believes is poetry's ultimate purpose: to reach other people and touch their hearts. Much more than a guidebook to writing and revising poems, this manual has all the comforts and merits of a long and enlightening conversation with a wise and patient old friend—a friend who is willing to share everything he's learned about the art he's spent a lifetime learning to execute so well.

This manual guides macro practitioners as they bring service users into the community planning process. The authors have developed the Community Development Planning Model (CDPM) - a cohesive eight step planning framework anchored in the concept of empowerment. This framework changes the relationship between service users and providers by structuring defined parallel and joint planning tracks that encourage not only service user participation but leadership, and promotes democratic decision-making. Using this model to engage service users encourages transparency, allows for the inclusion of minority voices, and increases planning and program effectiveness. This approach will be a significant asset in community planning and development courses. The author's manual helps students understand both the complexity of managing stakeholder relationships and the necessity of a rigorous evidence-informed approach to planning.
