This book provides a comprehensive guide on the basics of essay writing. The first part goes through some of the fundamentals: what an essay actually is, different essay writing styles, the core elements of an essay, organizing, and planning. Going through these basics is integral to any essay writer; it will help establish the tone and structure of your writing, as well as provide for a more cohesive piece. The remainder of the book will outline the specifics of each essay genre. Firstly, we will explain the reason for the genre. Next, explain the elements of the genre. Common language and grammar associated with that particular essay will be explained. Finally, a complete essay example is included, which draws from all of the elements discussed in this guide.

This book covers the subject of digital manufacturing. It provides a practical guide for readers on using computer aided design (CAD), computer aided engineering (CAE) and computer aided manufacturing (CAM) and other computer assistive tools for the design of products, machines, processes and system integrations through the case studies of engineering projects. The book introduces a thorough theoretical foundation and discussion of the historical development, and enabling technologies of digital manufacturing. It also covers a broad range of computer aided tools for a variety of applications including: geometric modelling; assembly modelling; motion simulation; finite element analysis; manufacturing process simulation; machining programming; product data management; and, product lifecycle management. Practical Guide to Digital Manufacturing uses many real-world case studies to illustrate the discussed applications, making it easily readable for undergraduate and graduate students, as well as engineers with the needs of computer-aided design and manufacturing knowledge and skills.

The focus on smart education has become a new trend in the global educational field. Some countries have already developed smart education systems and there is increasing pressure coming from business and tech communities to continue this development. Simultaneously, there are only fragmented studies on the didactic aspects of technology usage. Thus, pedagogy as a science must engage in a new research direction—smart pedagogy. This book seeks to engage in a new research direction, that of smart pedagogy. It launches discussions on how to use all sorts of smart education solutions in the context of existing learning theories and on how to apply innovative solutions in order to reduce the marginalization of groups in educational contexts. It also explores transformations of pedagogical science, the role of the educator, applicable teaching methods, learning outcomes, and research and assessment of acquired knowledge in an effort to make the smart education process meaningful to a wide audience of international educators, researchers, and administrators working within and tangential to TEL.

The University of Jyväskylä is proud to welcome the 12th edition of the European Conference in Cyber Warfare to Jyväskylä. We intend to make this event as enjoyable as possible both on scientific and human aspects. As in previous years, ECCWS will address elements of both theory and practice of all aspects of Information Warfare and Security, and offers an opportunity for academics, practitioners and consultants involved in these areas to come together and exchange ideas. We also wish to attract operational papers dealing with the critical issue that the modern world has to face regarding the evolution of cyberwarfare capabilities development by nation states. The programme for the event promises an extensive range of peer-reviewed papers,

networking opportunities and presentations from leaders in the field."

A guide to the application essay-writing process includes and discusses seven successful admissions essays.

The Oxford Handbook of William Wordsworth deploys its forty-eight original essays, by an international team of scholar-critics, to present a stimulating account of Wordsworth's life and achievement and to map new directions in criticism. Nineteen essays explore the highlights of a long career systematically, giving special prominence to the lyric Wordsworth of Lyrical Ballads and the Poems in Two Volumes and to the blank verse poet of 'The Recluse'. Most of the other essays return to the poetry while exploring other dimensions of the life and work of the major Romantic poet. The result is a dialogic exploration of many major texts and problems in Wordsworth scholarship. This uniquely comprehensive handbook is structured so as to present, in turn, Wordsworth's life, career, and networks; aspects of the major lyrical and narrative poetry; components of 'The Recluse'; his poetical inheritance and his transformation of poetics; the variety of intellectual influences upon his work, from classical republican thought to modern science; his shaping of modern culture in such fields as gender, landscape, psychology, ethics, politics, religion and ecology; and his 19th- and 20th-century reception-most importantly by poets, but also in modern criticism and scholarship.

All the tips, ideas and advice given to, and requested by, MA students in Media and Communications, are brought together in an easy-to-use accessible guide to help students study most effectively. Based upon many years of teaching study skills and hundreds of lecture slides and handouts this introduction covers a range of general and generic skills that the author relates specifically towards media and communications studies. As well as the mechanics of writing and presentations, the book also shows how students can work on and engage with the critical and contemplative elements of their degrees whilst retaining motivation and refining timekeeping skills. Of course the nuts and bolts of reading, writing, listening, seminars and the dreaded dissertation and essays are covered too. In addition advice on referencing, citation and academic style is offered for those with concerns over English grammar and expression. Aimed primarily at postgraduate students, there is significant crossover with undergraduate work, so this book will also prove of use to upper level undergraduate readers whether using English as a first or second language.

A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection. A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference, and presented by the students in front of a wider audience. These students also got free access to all other parts of the OTM program, and only paid a heavily discounted fee for the Doctoral Symposium itself. (In fact their attendance was largely sponsored by the other participants!) If evaluated as successful, it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum. All three main conferences and the associated workshops share the distributed aspects of modern computing systems, and the resulting application pull created by the Internet and the so-called Semantic Web. For DOA 2004, the primary emphasis stayed on the distributed object infrastructure; for ODBASE 2004, it was the knowledge bases and methods required for enabling the use of formal semantics; and for CoopIS 2004 the main topic was the interaction of such technologies and methods with management issues, such as occurs in networked organizations. These subject areas naturally overlap and many submissions in fact also treat envisaged mutual impacts among them.

A collection of essays and reviews by renowned author J.G. Ballard, spanning over thirty years and covering film, science, art, literature and current affairs.

A sharply observed, affectionate, and unsentimental portrait of life in a Maine fishing village, *The Country of the Pointed Firs* is Sarah Orne Jewett's most enduring work, and commonly regarded as the finest example of American regionalist literature in the nineteenth century. It was originally published in four installments of the *Atlantic Monthly* in 1896; this Broadview Edition is based on the Atlantic serialization and also includes the four other stories set in Dunnet Landing. The critical introduction situates the text in its historical, cultural, and literary milieu, attending to its place in Jewett's oeuvre and in her biography. Appendices include earlier "local color" writing by Jewett and others, Jewett's letters, and contemporary reviews of the novel.

This publication includes the Proceedings of the PLE Conference 2013. The Conference on Personal Learning Environments is now an established annual international, scientific event and a reference point for the current state of the art in research and development in Personal Learning Environments (PLE). The PLE Conference creates a space for researchers and practitioners to share concepts, case studies and research related to the design, development and implementation of Personal Learning Environments in diverse educational contexts including formal and informal education. The 4th PLE Conference in 2013 took place at Beuth University of Applied Sciences in Berlin, Germany together with a parallel event at Monash University in Melbourne, Australia. The PLE Conference 2013 received 75 submissions and welcomed almost 100 delegates from Europe, Asia, Australasia, North and South America and Africa. The papers included in the Proceedings provide rich and valuable theoretical and empirical insights into Personal Learning Environments. Personal Learning Environments (PLE) is an approach in Technology-Enhanced Learning (TEL) based on the principles of learner autonomy, ownership and empowerment. PLEs are integrated, individual environments for learning which include specific technologies, methods, tools, contents, communities and services constituting complex learning infrastructures, enhancing new educational practices and at the same time emerging from these new practices. This represents a shift away from the traditional model of technology-enhanced learning based on knowledge transfer towards a model based on knowledge construction and sharing.

“Just tell a story,” the teacher said. “It will be fun.” Yet the student stares at a blank screen, uncertain what to write, and it’s far from a fun experience. The narrative essay -- a personal form of storytelling about true experiences -- requires the

writer to abandon familiar tools such as topic sentences, thesis statements, and supporting authority. But this doesn't mean the writer should just type words until the pages are filled. Rambling freeform narratives are not what most writing instructors hope to see. There is a better method, and it can be found in this short booklet. This booklet explains everything the writer needs to generate a successful narrative essay in step-by-step fashion. Starting with a story goal, proceeding through a timeline, and finishing with two targeted paragraphs, this booklet will turn a blank screen into a finished paper.
