A glance through the Table of Contents will give you an insight to the information that has been fully packed in this handy guide. Don't wait any further, get a copy by clicking the BUY button NOW Hurry!

Is your phone the first thing you reach for when you wake up? And the last thing you see before you sleep? Do you find the hours slip away as you idly scroll through your social media timeline? In short, are you addicted to your phone? If so, How to Break Up with Your Phone is here to help. How to Break Up With Your Phone is a smart, practical and useful plan to help you conquer your mobile phone addiction in just 30 days - and take back your life in the process. Recent studies have shown that spending extended time on our phones affects our ability to form new memories, think deeply, focus and absorb information, and the hormones triggered every time we hear our phones buzz both add to our stress levels and are the hallmark signs of addiction. In How to Break Up with Your Phone, award-winning science journalist Catherine Price explores the effects that our constant connectivity is having on our brains, bodies, relationships, and society at large and asks, how much time do you really want to spend on your phone? Over the course of 30 days, Catherine will guide you through an easy-to-follow plan that enables you to identify your goals, priorities and bad habits, tidy your apps, prune your email, and take time away. Lastly, you will create a new, healthier relationship with your phone and establish habits and routines to ensure this new relationship sticks. You don't have to give up your phone forever; instead you will be more mindful not only of how you use your phone, but also about how you choose to spend the precious moments of your life.

Attention-grabbing, money-saving ideas. Now small to mid-sized companies, entrepreneurs, and their marketing staff can expand their customer base in new and exciting ways. Need help with your new Android phone or tablet? Are you new to smartphones in general, or coming from an iPhone or BlackBerry? The Guide to Android for Seniors is a book written specifically for those who have difficulty using electronics, such as phones, personal computers, and tablet computers. There is a wealth of knowledge about all types of Android devices in this book, regardless of the manufacturer or model, and can be easily accessed and navigated for quick reference. Whether you are puzzled about managing your electronic address book, or how to take and send a picture to a friend, you will find the information in this guide. The Internet is riddled with advanced tips and tricks, but the goal of this book is to sort through the extra information to simplify your first experience with using an Android phone or tablet. Help is here! Here are some examples of the topics discussed in this guide: - Charging the Device - Finding the Android Buttons - Calling a Contact - Assigning a Speed Dial - Using the Speakerphone During a Voice Call - Adding a New Contact - Composing a New Text Message - Adding an Attachment to a Text Message - Taking a Picture - Capturing a Video - Navigating to a Web Page - Setting Up Email - Setting Up a Google Account - Buying an Application - Importing Your Contacts from Another Phone - Adjusting the Brightness - Saving on Data Costs with Your Phone PLUS, what to do when the phone - Does not turn on - Can't make a call - Touchscreen does not respond as expected ...and much more! This is a short story and a reference book that can be used as a checklist for promoting Mobile Apps. Mobile App Promotion(MAP) Framework is a guideline which defines the product promotion steps - Ideation, Design, Marketing and Growth - with trending tools and resources that will take more than 80 hours for you to collect and discover. Digital marketing of mobile apps requires vertical and deep expertise. Marketing a mobile app involves defining a target audience, learning how to reach them and interacting with your users through their entire lifecycle, from when they meet your app, to when they become a loyal user. Although mobile marketing starts with the introduction of your application, more strategies are required for App Store Optimization (ASO) and the sale of services and products within the application. And growth hacking methods need to be considered for engagement and retention. You may prefer hiring an agency for promoting your app, but how you measure the quality of work? Instead, we suggest you to try it yourself first, then ask for professional assistance. Ideation, Design, Marketing and Growth phases are the most critical pillars of Mobile App Lifecycle. With MAP Framework, you will get a top-down approach and be able to create your strategy for your mobile apps. We will focus on 30+ subtopic with proven tools and techniques within MAP Framework. This e-book

will also let you to look at the Mobile App Lifecycle from a Higher Perspective. Why Seeing From a Higher Perspective is Essential? When you look at the big picture it can cause a shift in perspective, change your judgment, focus and activity. Getting a big picture perspective tends to reinforce the things that are important and refocus your attention on what you determine to be true priorities. “No problem can be solved from the same level of consciousness that created it.” – Albert Einstein *Development is not a concern of MAP Framework. Instead we are focusing on Ideation, Design, Marketing and Growth Phases.

In the newly revised 19th Edition of Contemporary Business, a distinguished team of business experts delivers an accessible and intuitive introduction to central concepts in business and management. Designed to engage with and cultivate interest in the world of business, the book explores topics as varied as entrepreneurship, promotion and pricing strategies, the role of technology in modern business, and customer-driven marketing.

In Ecuador, the livestock sector is essential for food security. It is also an important source of employment and income in provinces with a large presence of small and medium-scale farmers. From May 2020 to October 2020, FAO implemented the project to “reduce soil degradation, and mitigate greenhouse gas (GHG) emissions in the livestock sector of Ecuador”. The project was implemented seven provinces, distributed in three geographic regions of the country (coastal Ecuador, the Andes and Amazon). The project had an impact on public policies, with the incorporation of climate-smart livestock farming as one of the lines of action for the agricultural sector. In terms of technical aspects, the preparation of online tools to monitor GHG emissions and to calculate climate risk and the adaptation capacity of the sector is noteworthy. One void shown in the project, throughout the consultation process with interested parties, was the lack of connections to the market and the private sector. This was not contemplated in the project design and arose as a recurring issue during the implementation

Kozier and Erb’s Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.

Esta enciclopedia presenta numerosas experiencias y discernimientos de profesionales de todo el mundo sobre discusiones y perspectivas de la la interacción hombre-computadoras

By putting people at the centre of interactive design, user experience (UX) techniques are now right at the heart of digital media design and development. As a designer, you need to create work that will impact positively on everyone who is exposed to it. Whether it's passive and immutable or interactive and dynamic, the success of your design will depend largely on how well the user experience is constructed. User Experience Design shows how researching and understanding users' expectations and motivations can help you develop effective, targeted designs. The authors explore the use of scenarios, personas and prototyping in idea development, and will help you get the most out of the latest tools and techniques to produce interactive designs that users will love. With practical projects to get you started, and stunning examples from some of today's most innovative studios, this is an essential introduction to modern UXD.

Create fun filled, rich apps for Android and iOS with LiveCode.

The four-volume set LNCS 11583, 11584, 11585, and 11586 constitutes the proceedings of the 8th International Conference on Design, User Experience, and Usability, DUXU 2019, held as part of the 21st International Conference, HCI International 2019, which took place in Orlando, FL, USA, in July 2019. Streamline software development with Jenkins, the popular Java-based open source tool that has revolutionized the way teams think about Continuous Integration (CI). This complete guide shows you how to automate your build, integration, release, and deployment processes with Jenkins—and demonstrates how CI can save you time, money, and many headaches. Ideal for developers, software architects, and project managers, Jenkins: The Definitive Guide is both a CI tutorial and a comprehensive Jenkins reference. Through its wealth of best practices and real-world tips, you'll discover how easy it is to set up a CI service with Jenkins. Learn how to install, configure, and secure your Jenkins server Organize and monitor general-purpose build jobs Integrate automated tests to verify builds, and set up code quality reporting Establish effective team notification strategies and techniques Configure build pipelines, parameterized jobs, matrix builds, and other advanced jobs Manage a farm of Jenkins servers to run distributed builds Implement automated deployment and continuous delivery

Streetscapes are part of the taken-for-granted spaces of everyday urban life, yet they are also contested arenas in which struggles over identity, memory, and place shape the social production of urban space. This book examines the role that street naming has played in the political life of urban streetscapes in both historical and contemporary cities. The renaming of streets and remaking of urban commemorative landscapes have long been key strategies that different political regimes have employed to legitimize spatial assertions of sovereign authority, ideological hegemony, and symbolic power. Over the past few decades, a rich body of critical scholarship has explored the politics of urban toponymy, and the present collection brings together the works of geographers, anthropologists, historians, linguists, planners, and political scientists to examine the power of street naming as an urban place-making practice. Covering a wide range of case studies from cities in Europe, North America, Sub-Saharan Africa, and Asia, the contributions to this volume illustrate how the naming of streets has been

instrumental to the reshaping of urban spatial imaginaries and the cultural politics of place.

This title draws together international authorities to explore the variety of work that libraries are doing across the world to deliver resources to users via mobile and hand-held devices. Based on the proceedings of the Third International M-Libraries Conference held in Brisbane in May 2011, this draws together cutting-edge international contributions from the leading authorities in the field. The main strands of discussion include: • mobile services and their development • mobile users, their behaviour and requirements • emerging technical developments including new platforms, devices and applications • strategy and infrastructure developments at national level • reflections and feedback on new service models • local innovation. Readership: Information professionals in all sectors, policy makers, researchers, developers, publishers, suppliers, LIS students and new professionals.

Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave.

The book is a collection of high-quality peer-reviewed research papers presented in International Conference on Soft Computing Systems (ICSCS 2015) held at Noorul Islam Centre for Higher Education, Chennai, India. These research papers provide the latest developments in the emerging areas of Soft Computing in Engineering and Technology. The book is organized in two volumes and discusses a wide variety of industrial, engineering and scientific applications of the emerging techniques. It presents invited papers from the inventors/originators of new applications and advanced technologies.

Design and deliver traditional reference services in new and innovative ways Librarians work in an environment of constant change created by new technology, budget restraints, inflationary costs, and rising user expectations. New Directions in Reference examines how they can use new and innovative methods to design and deliver traditional reference services in a wide range of settings. The book's contributors relate first-hand experiences in libraries large and small, public and academic, and urban and rural dealing with a variety of changes, including virtual reference, music reference, self-service interlibrary loan, e-mail reference, and copyright law. Change isn't new to libraries but the accelerated pace of change is. Traditional lines that have existed between library departments have been erased and traditional notions about general and specialized reference services have been reconsidered. New Directions in Reference documents how librarians are re-thinking their roles and responsibilities to keep pace with the ongoing process of evolution that borders on revolution. New Directions in Reference examines: the skills needed to manage and evaluate virtual reference services the basics of modern copyright law and the Digital Millennium Copyright Act (DMCA) the changes in users, sources, and modes of access in music reference services the use of interlibrary loan management software that allows patrons to request, track, and renew borrowed materials online the "Ask-A-Librarian" e-mail reference service the Government Printing Office and government information online and much more! New Directions in Reference also includes case studies involving the new Martin Luther King Jr. Library in San Jose, California, and the impact of Personal Digital Assistants (PDAs) in providing references services for medical libraries. This important book is an essential professional resource for public, academic, and special librarians, especially those providing reference services.

Corporations are spying on you more than government spies ever could. Just follow the money to find out how and why. Corporations can often predict what you will do next, detect subtle changes in your mood, and essentially know what you're thinking about. Development of behavioral biometrics accelerated after 9/11. Some of the research and development was funded by the government to identify potential terrorists and protect the public. However, these technologies are now used by corporations to trample your privacy, practically read your mind, and manipulate you to enhance their profits. Verify the facts yourself. This book contains over two hundred references, including court documents, patents, official government documents, and many other sources. You can do many things to protect yourself. With your help, this book can do for Internet privacy what Ralph Nader's Unsafe at Any Speed did for automobile safety.

Users of this book will be able to quickly and efficiently build I-Mode pages using any desired text editor. Following examples and instructions based on the authors' successful experiences, developers will create or convert images from

other platforms, create animations and sound files, and develop dynamic database driven I-Mode applications and Web sites using common scripting languages such as Perl, PHP, and Java. They will also understand the relationship between I-Mode and other wireless technologies, and the unique business model of I-Mode. An overview of several "killer applications" that have fueled I-Mode's success will further prepare the reader to create applications that take full advantage of the features of small-screen devices.

The two LNCS volume set 9754-9755 constitutes the refereed proceedings of the Second International Conference on Human Aspects of IT for the Aged Population, ITAP 2016, held as part of the 18th International Conference on Human-Computer Interaction, HCII 2016, held in Toronto, ON, Canada, in July 2016, jointly with 14 other thematically conferences. The total of 1287 papers and 186 poster papers presented at the HCII 2016 conferences were carefully reviewed and selected from 4354 submissions. LNCS 9754, Design for Aging (Part I), addresses the following major topics: designing for and with the elderly; technology use and acceptance by older users; psychological and cognitive aspects of interaction and aging; mobile and wearable technologies for the elderly. LNCS 9755, Healthy and Active Aging (Part II), addresses these major topics: smart and assistive environments; aging and social media; aging, learning, training and games; and aging, mobility and driving.
