Law and Society is a rapidly-growing interdisciplinary field that turns on its head the conventional, idealized view of the "Law" as a magisterial abstraction. Kitty Calavita's Invitation to Law and Society brilliantly brings to life the ways in which law shapes and manifests itself in the institutions and interactions of human society, while inviting the reader into conversations that introduce the field's dominant themes and most lively disagreements. Deftly interweaving scholarship with familiar personal examples, Calavita shows how scholars in the discipline are collectively engaged in a subversive exposé of law's public mythology. While surveying prominent issues and distinctive approaches to the use of the law in everyday life, as well as its potential as a tool for social change, this volume provides a view of law that is more real but just as compelling as its mythic counterpart. In a field of inquiry that has long lacked a sophisticated yet accessible introduction to its ways of thinking, Invitation to Law and Society will serve as an engaging and indispensable guide.

This need was, in turn, prompted by the experience of the contributors as students and teachers, of the problems of understanding/communicating the connections between sociology and the society in which one lives, and between sociological theory and empirical studies.

Public Sociology examines the 'discourse' of mainstream journal articles in sociology in order to understand the essentially conservative nature of mainstream sociology. These articles primarily make advances in method, not substance. Drawing from Mills, critical theory and postmodernism, Agger develops a non-positivist version of sociological writing that is at once accessible and relevant to social problems. This collection focuses on education policy in the context of globalisation and draws together influential research dealing with the interplay between education policy and globalisation. Globalisation and neo-liberalism in relation to education policy are addressed, as is the impact of the global financial crisis, the recent rise of ethno-nationalism and progressive challenges to neo-liberal hegemony. A number of chapters deal with the new spatialities instantiated by globalisation's new technology, and consider the implications for education policy. Also discussed are global policy actors (such as the OECD, EU and edu-businesses) in education policy; the significance of international large scale assessments to an emergent global policy field; refugees and education; English language policy and globalisation; off-shore schools; and the importance of affect in policy in the context of globalisation. The collection closes with two methodological contributions that consider the implications of globalisation in today's critical education policy analysis. The collection is brought together in a substantial introduction that traverses the literature and research on globalisation and education policy and also situates the chapters and approaches in the collection within the field. The chapters in this book were originally published as articles in various Taylor and Francis journals.
