

Solar System For Kids The Planets And Their Moons Universe For Kids Childrens Astronomy Space Books

Young readers (and cats!) discover the wonders our solar systems as they travel to each of the planets in turn!

Look up! That's a lot of space out there! In *The Solar System: Out of This World with Science Activities for Kids*, young readers explore the comets, meteors, asteroids, sun, planets, and moons that make up our solar system. Hands-on science projects, essential questions, links to primary sources, and more get kids excited about learning what's deep in the sky.

Introduces basic concepts about outer space, from the sun and the moon to the planets and space exploration.

This Book *Astronomy for Kids - The ultimate space knowledge base for children* is designed to blow your mind with incredible images, from the deep darkness of black holes to the spectacular sparkle of supernovas. The many mysteries of the Universe are explored in breathtaking detail, including in-depth cross-sections and lifelike cutaways to showcase the planets, stars, moons, and space stations.

Featuring absolutely everything under the Sun, this exciting visual reference guide is your guaranteed one-stop shop for space. Filled with the latest facts, infographics, and NASA images, *Space!* takes you on a journey that is truly out of this world before bringing you back seriously starry-eyed!

In this stellar activity book, kids delve into the rich history of space exploration, where telescopes, satellites, probes, landers, and human missions lead to amazing discoveries. Updated to include the recent discovery of Eris which, along with Pluto, has been newly classified as a "dwarf planet" by the International Astronomical Union, this cosmic adventure challenges kids to explore the planets and other celestial bodies for themselves through activities such as building a model of a comet using soil, molasses, dry ice, and window cleaner; or creating their own reentry vehicle to safely return an egg to Earth's surface. With biographies of more than 20 space pioneers, specific mission details, a 20-page field guide to the solar system, and plenty of suggestions for further research, this is the ultimate guidebook to exploring the solar system.

The youngest astronomers can go forth and journey into outer space in this fun, basic introduction to the solar system. The unique format presents our sun and each planet in order with graduated flaps turn each flap to reveal fascinating facts on each celestial body, and even the Milky Way!"

Simple concepts about up-and-coming science and technology to kick-start your future genius! *Solar System for Babies & Toddlers* is a great way to introduce basic concepts about space, our solar system, and beyond. With interplanetary travel a real possibility for the next generation, this book will launch your little one on an out of this world adventure! The colorful, beautiful, and visually stimulating illustrations encourage the child's sense of wonder and adventure (and might stimulate your senses too)! Look for other books by Tinker Toddlers(TM) *Machine Learning for Babies & Toddlers* and *Artificial Intelligence for Babies & Toddlers*

Join the famous astronomer Patrick McFuddy and his son, Jacob, on their poetic journey through our Solar System.

Revisit the interesting truths of the solar system in this revised edition of a Baby Professor best seller. Recreated with new images and a better reading format, this edition will definitely capture a child's attention. The child-friendly texts are best for early and intermediate readers. Grab a copy in print, hardcover or digital format today.

A glow-in-the-dark, interactive guide to the Solar System, carefully crafted to make complex STEM concepts like astronomy, physics and chemistry understandable for children aged 8-12. *Barefoot Books Solar System* joins the celebrated *Barefoot Books World Atlas* another standout nonfiction title on Barefoot's list to explore the world and universe.

Blast off on an exploration of our solar system--a fun space book for kids 3 to 5 Get even the smallest astronomer excited for the big universe of space, from the bright and burning sun to our own blue Earth to ice-capped Pluto and every planet in between. With this book, kids will explore the entire solar system through incredible photos and fascinating facts on what makes each planet so special--like their size, distance from the sun, what the surface is like, how many moons they have, and more! This planets for kids book includes: Big, beautiful images? Vibrant photos will take kids deep into space and onto each planet?no telescope required. Astronomy for kids? Learn all about the eight planets in our solar system, plus dwarf planets Ceres, Pluto, Eris, Haumea, and Makemake. Fun space facts? Did you know the bubbles in soda are the same gas that's on Venus? Out of this world facts will keep kids glued to the page and excited to explore the sky. Show kids the amazing universe that surrounds them with this fun and engaging astronomy book.

Is your child fascinated by space? You want to make them go "WOW", right? Well, do we have the answer for you! *Solar System For Kids* is a totally awesome activity book with LOADS of amazing facts about the solar system, including a detailed look at each planet and cool handwriting activities to get stuck into. Your cosmos-crazy child will not only learn about the solar system but also enjoy the colouring-in and mazes included within this activity book. Watch them soar with enthusiasm through the stratosphere and return on a cloud of stardust to impress you with their newly-learned facts and figures all about the solar system. For example, did you know there was a MOUNTAIN on Mars? That's just one of the cool facts contained in this brilliant space book. They will learn all about: the planets in our solar system, what an astronaut does, what the International Space Station is, famous people who have travelled into space, what comets and asteroids are, and they even get to design their own planet! So, let's not waste another second on Earth. Get hold of your copy of *Solar System For Kids TODAY* and give your child their ticket on the rocket ship to the stars. Visit hackneyandjones.com to see our full range of fiction, notebooks/journals and activity books for kids.

The solar system is a complicated but very interesting subject to study. The problem is, school textbooks are so heavy with texts, they become very boring to children. The good news is, workbooks such as this exist. Using a hands-on and picture-dominated approach to learning, a child would have absolute fun learning about the star and the planets.
