They said it couldn't be done ... all the myriad worlds which have been sought out and explored through more than 500 television episodes and nine Star Trek movies, mapped, illustrated and brought to life in the pages of a comprehensive Star Trek atlas. From the comparatively crowded space of the Alpha and Beta Quadrants, home to Earth and Vulcan, Bajor and Betazed, the Cardassian Union and the Romulan and Klingon Empires; to the distant Gamma Quadrant controlled by the Dominion; to the far reaches of the Delta Quadrant, home space of the Borg, where of Federation explorers only the crew of the USS Voyager has ever been; NEW WORLDS, NEW CIVILIZATIONS catalogues peoples and planets from all four corners of the galaxy. Ever wondered where the blue-skinned Bolians originated from? Or what it is like on the permanently frozen homeworld of the bloodless Breen? From the first world that the first away team landed on under the command of Christopher Pike in the original pilot episode 'The Cage' (a world that has been off-limits to the Federation ever since), to the world of the Ba'ku as seen in 'Star Trek: Insurrection', all these and many more are described and depicted in all their

In celebration of one of science fiction's most beloved franchises, an updated edition of the acclaimed Ships of the Line hardcover collection. They dared to risk it all in a skiff of reeds or leather, on a ship of wood or steel, knowing the only thing between them and certain death was their ship. To explore, to seek out what lay beyond the close and comfortable, every explorer had to embrace danger. And as they did so, what arose was a mystical bond, a passion for the ships that carried them. From the very first time humans dared to warp the fabric of space, escaping from the ashes of the third World War, they also created ships. These vessels have become the icons of mankind's desire to rise above the everyday, to seek out and make the unknown known. And these ships that travel the stellar seas have stirred the same passions as the ones that floated in the oceans. While every captain has wished that their starship could be outfitted in the same manner as the sailing ship H.M.S. Beagle—without weapons—that proved untenable. From the start, Starfleet realized that each vessel, due to the limited range of the early warp engines, must be able to stand alone against any attack. Thus arose the idea, taken from the days of wooden sailing ships, that every Starfleet vessel must stand as a ship of the line. Through the actions of their captains and crews, countless starships have taken on that role. Here we remember some of those ships and their heroic crews. In celebration of one of science fiction's most beloved franchises, this updated edition of the acclaimed Ships of the Line hardcover collection now includes dozens of additional images brought together for the first time in book format—spectacular renderings featured in the highly successful Star Trek: Ships of the Line calendar series. With text by Star Trek's own Michael Okuda, the story of each of these valiant starships now comes to life. ™, ®, & © 2014 CBS Studios, Inc.
