

## The Aiap Is A Stand Alone Program File Type

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Comprehensive bilingual dictionary of the Hoc?k language. The most comprehensive dictionary of the Hoc?k language (formerly known as Winnebago) to date, this bidirectional Hoc?k-English/English-Hoc?k dictionary contains approximately 4,000 entries. Hoc?k is a highly endangered North American Indian language spoken by less than two hundred people in different parts of Wisconsin and Nebraska. This dictionary and volume 2 of the Hoc?k Teaching Materials are the outcome of a large project on the documentation of the Hoc?k language, which was carried out in close cooperation with the Hoc?k Language Division, a tribal institution for the stabilization and revitalization of the Hoc?k language in Mauston, Wisconsin. The volume contains a lengthy introduction to the basics of the phonology, orthography, and morphology of the Hoc?k language, written in a learner-friendly, easy-to-access style, explaining linguistic terms so that it can be used by nonlinguists. The individual lexical entries of the words are organized according to the standards of modern lexicography, containing all necessary phonetic, grammatical, and semantic information for the use of the Hoc?k words. In addition, every word is provided with about three Hoc?k example sentences in order to demonstrate the typical use of the words in different contexts. Also of interest are a frequency list of all words in the dictionary counted on the basis of a large corpus of Hoc?k texts, and a thesaurus of all Hoc?k words in the dictionary. A valuable source of information on the Hoc?k language and culture, this work will appeal to linguists in general, and specialists in Native American languages, as well as anthropologists and all learners of the Hoc?k language. "Collaboration between the Ho-Chunk Nation and University of Erfurt linguists yielded this and a second volume intended to teach the nation's language. The need is urgent: a people of 6,500 contains but 200 native speakers ... This is an important acquisition for reference collections supporting Native American studies and linguistics study." ? CHOICE

This book introduces research presented at the "International Conference on Artificial Intelligence: Advances and Applications-2019 (ICAIAA 2019)," a two-day conference and workshop bringing together leading academicians, researchers as well as students to share their experiences and findings on all aspects of engineering applications of artificial intelligence. The book covers research in the areas of artificial intelligence, machine learning, and deep learning applications in health care, agriculture, business and security. It also includes research in core concepts of computer networks, intelligent system design and deployment, real-time systems, WSN, sensors and sensor nodes, SDN and NFV. As such it is a valuable resource for students, academics and practitioners in industry working on AI applications. Zanele Muholi: Somnyama Ngonyama, Hail the Dark Lioness features over ninety of Muholi's evocative self-portraits, each image drafted from material props in Muholi's immediate environment. These portraits reflect the journey, self-image, and possibilities of a black woman in today's global society. With more than twenty written contributions from curators, poets, and authors, alongside luxurious tritone reproductions of Muholi's images, this title is as much a manifesto of resistance as it is an autobiographical, artistic statement.

"A number of important steps have been taken in recent years to improve the planning and management of Army International Activities (AIA). Still, a need remains, and is widely recognized, for a high-level assessment mechanism to allocate AIA resources more efficiently, execute AIA programs more effectively, and highlight the contributions of AIA to the National Military Strategy, the DoD Security Cooperation Guidance, and The Army Plan. This report presents a framework for assessing the value of the Army's non-combat interactions with other militaries. It provides an overview of AIA programs and establishes their connection to the U.S. government's current strategy for security cooperation. It also provides a matrix of eight AIA "ends," derived from top-level national and Army guidance, and eight AIA "ways," which summarize the various capabilities inherent in AIA programs. Next, the report presents a method for linking AIA "ends" and "ways" that involves a theoretical rationale for security cooperation, selection criteria for AIA "output" and "outcome" indicators, and related measures of performance and effectiveness. The report also describes the new online AIA Knowledge Sharing System (AIKSS) that is being used to solicit programmatic and assessment data from AIA officials in the Army's Major Commands. In addition, the report includes the results of three test cases -- involving the Army Medical Department, the National Guard Bureau, and U.S. Army South -- that helped to identify potential problems in evaluating AIA and to suggest improvements in the proposed AIA assessment mechanism. Finally, the report contains an extensive list of "output" and "outcome" indicators that have been reviewed by AIA officials throughout the Army."--Publisher's website.
