This book explores how different constituencies influenced the development of nineteenth-century swimming in England, and highlights the central role played by swimming professors. These professionals were influential in inspiring participation in swimming, particularly among women, well before the amateur community created the Amateur Swimming Association, and this volume outlines some key life-courses to illustrate their working practices. Female exhibitors were important to professors and chapter three discusses these natationists and their impact on women's swimming. Subsequent chapters address the employment opportunities afforded by new swimming

baths and the amateur community that formed clubs and a national organization, which excluded swimming professors, many of whom subsequently worked successfully abroad. Dave Day and Margaret Roberts argue that the critical role played by professors in developing swimming has been forgotten, and suggest that their story is a reminder that individuals were just as important to the foundation of modern sport as the formation of amateur organizations.

Often, a child becomes too frightened to speak up because they lack the vocabulary to describe what happened. Hopefully, this book will be a helpful tool and encourage children to speak up boldly with confidence if the need arises.

The Swimsuit: Fashion from Poolside to Catwalk documents the modern

swimsuit's trajectory from men's underwear and circus/performance wear to its unique niche in world fashion. It emphasizes the relationship between fashion, media, celebrity, sport and the cultivation of the modern body. This fascinating book provides an historical, sociological and cultural context in which to view how the swimsuit - and Australia, the country that significantly influenced its modern form - migrated from the cultural and colonial periphery to the centre of international attention. In addition, the book offers new perspectives on national histories of the swimsuit and investigates how traditional European fashion centers have opened up to new markets and modes of living, bringing together influences from around the globe. The Swimsuit is essential reading for students, scholars, and the general reader interested in fashion, popular culture, history, media, sport, and gender studies.

Resort-town tabloid reporter Alex Perkins, 33 and most happy hanging out on Northport's working waterfront, reluctantly covers local arts happenings. When he encounters an oddly attractive, bird's nest-haired, young woman, putting up posters for a performance piece depicting her bikinied-self striding down a beach, his editor, Steve Towle, assigns Alex to it - presuming he will return with a few decent skin shots for the next week's cover. Fond of quoting Joseph Goebbels' "Every time I hear the word culture I reach for my revolver," Steve's primary

concerns aren't artistic. Alex, arriving late, finds Lucinda - naked but for a painted-on black bikini and the words, "This Is Not My Bathing Suit" lettered on her torso - beset by outraged middle-American beach-goers. Arrest follows when the perpetrator refuses to settle for just a warning. To her, this is a matter of principle (and a good career move). Arthur Dalmore, director of the Northport Museum of Modern Art, newly wooed from New York's Whitney, bails Lucinda out - peevishly explaining that "This Is Not My Bathing Suit" is an ironic response to surrealist painter Rene Magritte's infamous canvas entitled, "This Is Not A Pipe." Alex has gleaned from arts magazines that in Dalmore's previous habitat, the New York postmodern art scene of the 70's and 80's, almost anything might be art: artists locked in boxes, vagina paintings, or even a present day Van Gogh wannabe having an assistant shoot him. When Alex interviews Lucinda (over beachfront Margaritas) it devolves into a midnight stagger to Alex's bed at his "Gram's" nearby cottage (where he's resided since his divorce six months before). This long night of the body and soul finally ends in a meeting of minds; i.e. in a rapport over breakfast between the anything-goes, twenty-something, postmodernist artiste and a 90-year-old, proto-feminist, New England grandmother. Soon Alex's and Lucinda's adventure moves off-shore when Dalmore invites the pair to join the trendy crowd on his sailing yacht, Pure

Conception. At the end of an unexpectedly fraught voyage, the boaters find, as Dalmore attempts to dock at his manse's private wharf, a dead humpback whale lodged between the pilings. Alex, the local boy, calls in Gram's neighbor, Captain Fred Avery, for aid on the morrow. Unfortunately for Dalmore, Avery will turn out to be not nearly the typical Northport fisherman he might have hoped for - and careers also may be torpedoed by Fred's method of demolishing a leviathan. The bikini was invented by Louis Reard and Jacques Heim, in Paris in 1946. However, due to its skimpiness, hardly anyone had the courage to wear a bikini until the late 1950s, when actress Brigitte Bardot created a splash by wearing a bikini in the film, 'And God Created Woman.' The bikini revolution subsequently became a rage, and even got its own song: 'Itsy Bitsy Teeny Weeny Yellow Polka Dot Bikini.' Grab a copy of this ebook today.

What a silly sight to see! Bird enjoys flying through the skies, eating worms and splashing around in his favorite red swim trunks. He's used to flying around unnoticed, but what happens when the neighborhood kids see him soaring through the air in a bathing suit?

When I decided to create a new bathing suit pattern, I searched for a modern book documenting Victorian bathing suits. To my surprise, I couldn't find one. Yet I had quite a few period magazines with engravings of bathing dresses in my

collection. While I was doing more research, I fell in love with the traditions and ethics surrounding American, English, and French bathing. This book focuses on the culture of swimming and sea bathing across the decades, and on women's bathing suits, noting their styles, variations, and evolution, all quoted from the original writers of that time. For your enjoyment, I've included descriptions and engravings of men's and children's suits when I could find them, but their clothing was not as well documented as the ladies' dresses. The culture and proper dress of bathing changed radically during Queen Victoria's reign, led, of course, by the French. The accepted ladies' one-piece bathing gown gave way to the two-piece bathing suit, and bathing went from a medical treatment to a social event. Even the French bathing dress was not admired in its early days. It was plain, usually black, and, at best, boring. But once fashion got hold of the bathing suit, the dress evolved rapidly. By 1870, many bathing suits were downright gorgeous. Fashion magazines began to include descriptions and engravings on a regular basis, vying to provide the most up-to-date styles. Bathing went from a quick, unpleasant dip in the ocean to true enjoyment, and even swimming became popular. Victorian Bathing and Bathing Suits has over 125 period illustrations. It is intended for costume historians, bathing enthusiasts, Victorian re-enactors, historical writers and history buffs.

Packed with hundreds of photographs, this title provides a history of the bikini, recording its progression from the French beaches in 1946 to the small strings of modern times.

As the 1950s dawned, a new level of sexual openness developed in behavior and dress. In magazines and on beaches, women appeared in revealing two-piece bathing suits called bikinis. Bunny Yeager, model and commercial photographer, forged a unique role in 1952, photographing bikinis and the beautiful women who wore them. This collection of Bunny's work from the 1950s features 169 original photographs and featuring little known models and women she helped launch to fame, such as Betty Page. The bikinis they wore were often of Bunny's own creation, sewn with her own hands. She says, "My ability helped me sell photographs to men's magazines and compete with male photographers. They didn't know how to sew!" Many of her original designs still influence styles today. This collection of photographs, along with Bunny's reflections on her life and career, the models, and the era, make an insightful addition to the literature on this photographic pioneer.

It was in 1946 that the world first came to hear of a coral atoll in the Marshall Islands called Bikini. The following year, French couturier Louis Reart borrowed the name and applied it to a bathing costume for women. Breaking with decades of boring conformity, Reart dared to 'undress' women's bodies in order to better emphasize what remained clothed -- albeit in tiny wisps of material. By taking up the bikini as popular beachwear, women also found themselves thinking differently about their bodies. An ideal of perfection was many times reinforced by the appearance on the cinema screen of such stars as Marilyn Monroe, Brigitte Bardot and Ursula Andress, all of whom featured in bikinis that accentuated their own gloriously curvaceous contours. More than a bathing costume, the bikini made its own contribution during the 1970s to the sexual revolution, to the changing relationship between men and women in general. This book investigates the history of the bikini as a way of noting the change in the perception of women by society, as women have regained responsibility for the way they look and laid claim once more to full sexual equality. A wealth of pictures throughout the book

illustrates this womanly progression step-by-step over more than 50 years.

However the deeper

significance of the experience of 'the beach', and its influence on Australian culture generally, have not yet been seriously explored. How, why and when did the beach become part of the Australian way of life? In *Sand in our Souls* Leone Huntsman describes the forces and pressures that encouraged or impeded Australians' enjoyment of sand and surf, from early enjoyment of bathing, through nearly a century of repressive restrictions, to freedom won in the face of drawn-out opposition. The ways in which artists, writers, film-makers and the advertising industry have depicted the beach are examined for the light they throw on the beach's significance. She traces the development of a distinctively Australian way-of-being-at-the-beach, suggesting that the beach experience has been absorbed into our emerging culture and continues to shape it in subtle ways. Huntsman's provocative arguments will stimulate debate on the concept of 'national identity' appropriate for a new Australian century, and promote a deeper understanding of an aspect of life in Australia that is cherished by many of those who live here.
