We are all journalists and publishers now: at the touch of a button we can send our words, sounds and images out to the world. No matter whether you're a traditional journalist, a blogger, a public relations practitioner or a social media editor, everything you publish or broadcast is subject to the law. But which law? This widely used practical guide to communication law is essential reading for anyone who writes or broadcasts professionally, whether in journalism or strategic communication. It offers a mindful approach to assessing media law risks so practitioners can navigate legal and ethical barriers to publishing in mainstream and social media. This sixth edition has been substantially revised to reflect recent developments in litigation, and the impact of national security laws and the rising gig economy where graduates might work in the news media, PR, new media start-ups, or as freelancers. 'Whether you're an MSM editor or reporter, a blogger, a tweeter or a personal brand, this book might save your bacon.' - Jonathan Holmes, former ABC Media Watch host 'The leading text book from which most journos learned their law' - Margaret Simons, associate professor in journalism, Monash University

In 1992 the National Research Council issued *DNA Technology in Forensic Science*, a book that documented the state of the art in this emerging field. Recently, this volume was brought to worldwide attention in the murder trial of celebrity O. J. Simpson. The *Evaluation of Forensic DNA Evidence* reports on developments in population genetics and statistics since the original volume was published. The committee comments on statements in the original book that proved controversial or that have been misapplied in the courts. This volume offers recommendations for handling DNA samples, performing calculations, and other aspects of using DNA as a forensic tool--modifying some recommendations presented in the 1992 volume. The update addresses two major areas: Determination of DNA profiles. The committee considers how laboratory errors (particularly false matches) can arise, how errors might be reduced, and how to take into account the fact that the error rate can never be reduced to zero. Interpretation of a finding that the DNA profile of a suspect or victim matches the evidence DNA. The committee addresses controversies in population genetics, exploring the problems that arise from the mixture of groups and subgroups in the American population and how this substructure can be accounted for in calculating frequencies. This volume examines statistical issues in interpreting frequencies as probabilities, including adjustments when a suspect is found through a database search. The committee includes a detailed discussion of what its recommendations would mean in the courtroom, with numerous case citations. By resolving several remaining issues in the evaluation of this increasingly important area of forensic evidence, this technical update will be important to forensic scientists and population geneticists--and helpful to attorneys, judges, and others who need to understand DNA and the law. Anyone working in laboratories and in the courts or anyone studying this issue should own this book.

This book considers how the law should manage conflicts between the right of religious freedom and that of non-discrimination on the grounds of sexual orientation. These disputes are often high-profile and frequently receive a lot of media attention and public debate. Starting from the basis that both these rights are valuable and worthy of protection, but that such disputes are often characterised by animosity, it contends that a proportionality analysis provides the best method for resolving these conflicts. The work takes a comparative approach, examining the law in England and Wales, Canada, and the USA and examines four main areas of law, considering how a proportionality approach could be used in each. The book will be an invaluable resource for students and researchers in the areas of Public Law, Human Rights Law, Law and Religion, Discrimination Law, and Comparative Law.
