editors should be commended for putting together this lively and engaging text' Nyla Branscombe, Department of Psychology, University of Kansas A range of international events have recently focused attention on issues of prejudice, racism and social conflict: increasing tensions in former Eastern bloc countries, political conflict in Northern Ireland and the United States, as well as racial conflict in the Baltic States, Middle East, Africa, and Australasia. In light of these events, *Understanding Prejudice, Racism and Social Conflict* presents a timely and important update to the literature, and makes a fascinating textbook for all students who need to study the subject. A variety of theoretical and conceptual approaches are necessary to fully understand the themes of prejudice and racism. This textbook successfully presents these, uniquely, by examining how these themes manifest themselves at different levels - at the individual, interpersonal, intergroup and institutional levels. It aims to integrate the different approaches to understanding racism and prejudice and to suggest new ways to study these complex issues. This integrated, international focus should make it key reading for students in many countries. With contributions from world-leading figures, *Understanding Prejudice, Racism and Social Conflict* should prove to be an invaluable teaching resource, and an accessible volume for students in social psychology, as well as some neighbouring disciplines.

chapters, not exiled to the end of the book; traditional emphasis on individual and interpersonal processes is balanced with full emphasis on the study of group processes and intergroup relations; chapters on language and social psychology, culture and self. Leadership and associated power issues lie at the core of group life in a variety of contexts. Even the most informal of groups typically have some form of leadership in their organization, and the understanding of leadership and power from a psychological standpoint can inform a greater understanding of group dynamics both inside and outside of the workplace. Leadership and Power is a synthesis of contributions from eminent social psychologists and organizational scientists that addresses these issues from a fresh perspective. In recent years, these themes have been re-examined through the lens of social categorization approaches that highlight people's social identity and social roles as group members, as well as the processes that influence perceptions of and expectations about people and groups. The book is wide-ranging; chapters cover such diverse issues as: interpersonal versus group-oriented styles of leadership; leadership of totalist groups; political leadership; and gender and leadership. It represents a state-of-the-art overview of this burgeoning field that will be important to a host of disciplines. Elements of cross-referencing to highlight thematic links as well as effective chapter conclusions will make the text appealing to advanced students taking courses in social and organizational psychology, management and organization studies, not just scholars interested in these

"A very clear and engaging introduction to a contemporary analysis of 'race' and racism(s). This text effectively combines key theoretical perspectives with vivid contemporary examples." - Dr Rebecca Barnes, University of Derby

"Fantastic book for helping students get past the stuntedness of the term 'racism' to understand the way in which racisms are part of our social practices and institutions. - Dr Lucy Michael, Hull University

"This is a solid text, covering the topic in a thoughtful manner. Studying and teaching racism is a complex issue, and this book is a very good resource." - Dr Sanjay Sharma, Brunel University

We hear much about 'race' and 'racism' in public discourse but the terms are frequently used without clear definitions or practical examples of how these phenomena work. Racisms: An Introduction introduces practical methods which enable students to think coherently and sociologically about this complex feature of the global landscape. Steve Garner argues that there is no single monolithic object of analysis but rather a plural set of ideas and practices that result in the introduction of 'race' into social relations. This differs over time and from one place to another. Focussing on the basics, this book: Defines 'race',

'racism', 'institutional racism' and 'racialization'. Provides examples of how these function in fields like the natural sciences and asylum. Clearly sets out theoretical arguments around collective identities ('race', class, gender, nation, religion). Uses empirical case studies, including some drawn from the author's own fieldwork. Points students toward sources of further web and text based information. Engaging and accessible this book provides a signposted route into key elements of contemporary debates. It is an ideal introduction for undergraduates studying 'race' and ethnicity, social divisions and stratification.

Introducing eight analytical approaches that are key to successful social science research, this book helps you get to grips with theory and apply it to qualitative analysis. With two 'matched chapters' dedicated to each approach, it provides a balance between theory and analytical method. The first chapter grounds the approach in theory and the second uses real-world examples to show how to conduct your own analysis using the approach. Drawing on the contributing authors' wealth of experience, the book:

- Highlights how analysis relates to the entire research process and helps you position your analysis within the larger context of your research
- Provides a strong, theoretical foundation for building good qualitative analysis
- Guides you through translating theory into real-world practice in your own research

Detailed, clear and accessible, this book is perfect for students who want to understand the theory behind qualitative analysis before conducting their own research, or develop their understanding of specific approaches.

This handbook explores prejudice, stereotyping and discrimination primarily as phenomena embedded in the social organization of societies and connected to structural factors and larger societal systems. It offers a unique critical and cross-disciplinary approach to the study of contemporary manifestations of prejudice, stereotyping and discrimination. New socio-psychological analyses of the most pressing social problems of our age bring into view future directions of research on prejudice, stereotyping and discrimination oriented to social change and collective action and that engage with wider systems of norms and discourse. The editors draw on social psychology, sociology, social policy, clinical psychology, cultural studies and feminist, antiracist and decolonizing social science to show how social psychology can successfully rekindle its intellectual dialogue with kindred social science fields to create broader foundations for the exploration of the paradoxes lodged at the heart of the social expression of prejudice in liberal democracies. This is essential reading for anyone interested in prejudice, discrimination and stereotypes. The handbook will be of interest to academics and researchers exploring

international policy-making draws on data on migrant movement, anticipated movement, and biometrics to maintain a sense of control over the mobilities of humans and things. Also, social imaginaries are constituted in highly mediated environments where information and emotions on migration are constantly shared on social and traditional media. The SAGE Handbook of Media and Migration offers a comprehensive overview of media and migration through new research, as well as a review of present scholarship in this expanding and promising field.
