

## This Changes Everything Capitalism Vs The Climate Naomi Klein

This Graphic Novel Series features classic tales retold with attractive color illustrations. Educators using the Dale-Chall vocabulary system adapted each title. Each 70 page, softcover book retains key phrases and quotations from the original classics. Introduce literature to reluctant readers and motivate struggling readers. Students build confidence through reading practice. Motivation makes all the difference. What's more motivation than the expectation of success?

A groundbreaking investigation of how and why, from the 18th century to the present day, American resistance to our ruling elites has vanished. From the American Revolution through the Civil Rights movement, Americans have long mobilized against political, social, and economic privilege. Hierarchies based on inheritance, wealth, and political preferment were treated as obnoxious and a threat to democracy. Mass movements envisioned a new world supplanting dog-eat-dog capitalism. But over the last half-century that political will and cultural imagination have vanished. Why? The Age of Acquiescence seeks to solve that mystery. Steve Fraser's account of national transformation brilliantly examines the rise of American capitalism, the visionary attempts to protect the democratic commonwealth, and the great surrender to today's delusional fables of freedom and the politics of fear. Effervescent and razorsharp, The Age of Acquiescence is provocative and fascinating.

Naomi Klein, author of the #1 international bestsellers, The Shock Doctrine and No Logo, returns with This Changes Everything, a must-read on how the climate crisis needs to spur transformational political change. We seem to have given up on any serious effort to prevent catastrophic climate change. Despite mounting scientific evidence, denialism is surging in many wealthy countries, and extreme fossil-fuel extraction gathers pace. Exposing the work of ideologues on the right who know the challenge this poses to the free market all too well, Naomi Klein also challenges the failing strategies of environmental groups. This Changes Everything argues that the deep changes required should not be viewed as punishments to fear, but as a kind of gift. It's time to stop running from the full implications of the crisis and begin to embrace them. Naomi Klein is an award-winning journalist, syndicated columnist and author of the international bestsellers, The Shock Doctrine and No Logo. She is a member of the board of directors for 350.org, a global grassroots movement to solve the climate crisis, a Puffin Foundation Writing Fellow at The Nation Institute, and a former Miliband Fellow at the LSE. She holds an honorary Doctor of Civil Laws from the University of King's College, Nova Scotia.

Completely updated edition; the big picture of how humanity can combat the climate emergency, from a leading environmental author.

A People's Curriculum for the Earth is a collection of articles, role plays, simulations, stories, poems, and graphics to help breathe life into teaching about the environmental crisis. The book features some of the best articles from Rethinking Schools magazine alongside classroom-friendly readings on climate change, energy, water, food, and pollution—as well as on people who are working to make things better. A People's Curriculum for the Earth has the breadth and depth of Rethinking Globalization: Teaching for Justice in an Unjust World, one of the most popular books we've published. At a time when it's becoming increasingly obvious that life on Earth is at risk, here is a resource that helps students see what's wrong and imagine solutions. Praise for A People's Curriculum for the Earth "To really confront the climate crisis, we need to think differently, build differently, and teach differently. A People's Curriculum for the Earth is an educator's toolkit for our times." — Naomi Klein, author of The Shock Doctrine and This Changes Everything: Capitalism vs. the Climate "This volume is a marvelous example of justice in ALL facets of our lives—civil, social, educational, economic, and yes, environmental. Bravo to the Rethinking Schools team for pulling this collection together and making us think more holistically about what we mean when we talk about justice." — Gloria Ladson-Billings, Kellner Family Chair in Urban Education, University of Wisconsin-Madison "Bigelow and Swinehart have created a critical resource for today's young people about humanity's responsibility for the Earth. This book can engender the shift in perspective so needed at this point on the clock of the universe." — Gregory Smith, Professor of Education, Lewis & Clark College, co-author with David Sobel of Place- and Community-based Education in Schools

'One of those who has been warning me of [a coming crisis] for a long time is Paul Gilding, the Australian environmental business expert. He has a name for this moment - when both Mother Nature and Father Greed have hit the wall at once - The Great Disruption.'-Thomas Friedman, The New York Times

Climate change is one of the greatest threats facing humanity, a definitive manifestation of the well-worn links between progress and devastation. This book explores the complex relationship that the corporate world has with climate change and examines the central role of corporations in shaping political and social responses to the climate crisis. The principal message of the book is that despite the need for dramatic economic and political change, corporate capitalism continues to rely on the maintenance of 'business as usual'. The authors explore the different processes through which corporations engage with climate change. Key discussion points include climate change as business risk, corporate climate politics, the role of justification and compromise, and managerial identity and emotional reactions to climate change. Written for researchers and graduate students, this book moves beyond descriptive and normative approaches to provide a sociologically and critically informed theory of corporate responses to climate change.

**\*\*SUNDAY TIMES AND THE NEW YORK TIMES BESTSELLER\*\*** 'An epoch-defining book' Matt Haig 'If you read just one work of non-fiction this year, it should probably be this' David Sexton, Evening Standard Selected as a Book of the Year 2019 by the Sunday Times, Spectator and New Statesman A Waterstones Paperback of the Year and shortlisted for the Foyles Book of the Year 2019 Longlisted for the PEN / E.O. Wilson Literary Science Writing Award It is worse, much worse, than you think. The slowness of climate change is a fairy tale, perhaps as pernicious as the one that says it isn't happening at all, and if your anxiety about it is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible, even within the lifetime of a teenager today. Over the past decades, the term "Anthropocene" has climbed into the popular imagination - a name given to the geologic era we live in now, one defined by human intervention in the life of the planet. But however sanguine you might be about the proposition that we have ravaged the natural world, which we surely have, it is another thing entirely to consider the possibility that we have only provoked it, engineering first in ignorance and then in denial a climate system that will now go to war with us for many centuries, perhaps until it destroys us. In the meantime, it will remake us, transforming every aspect of the way we live-the planet no longer nurturing a dream of abundance, but a living nightmare.

From the founder of the Climate Outreach and Information Network, a groundbreaking take on the most urgent question of our time: Why, despite overwhelming scientific evidence, do we still ignore climate change? "Please read this book, and think about it." --Bill Nye Most of us recognize that climate change is real, and yet we do nothing to stop it. What is this psychological mechanism that allows us to know something is true but act as if it is not? George Marshall's search for the answers brings him face to face with Nobel Prize-winning psychologists and the activists of the Texas Tea Party; the world's leading climate scientists and the people who denounce them; liberal environmentalists and conservative evangelicals. What he discovered is that our values, assumptions, and prejudices can take on lives of their own, gaining authority as they are shared, dividing

people in their wake. With engaging stories and drawing on years of his own research, Marshall argues that the answers do not lie in the things that make us different and drive us apart, but rather in what we all share: how our human brains are wired—our evolutionary origins, our perceptions of threats, our cognitive blindspots, our love of storytelling, our fear of death, and our deepest instincts to defend our family and tribe. Once we understand what excites, threatens, and motivates us, we can rethink and reimagine climate change, for it is not an impossible problem. Rather, it is one we can halt if we can make it our common purpose and common ground. Silence and inaction are the most persuasive of narratives, so we need to change the story. In the end, *Don't Even Think About It* is both about climate change and about the qualities that make us human and how we can grow as we deal with the greatest challenge we have ever faced.

In twenty short books, Penguin brings you the classics of the environmental movement. In *Hot Money* Naomi Klein lays out the evidence that deregulated capitalism is waging war on the climate, and shows that, in order to stop the damage, we must change everything we think about how our world is run. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.

An analysis of the invasion of our personal lives by logo-promoting, powerful corporations combines muckraking journalism with contemporary memoir to discuss current consumer culture

Explains why the environmental crisis should lead to an abandonment of "free market" ideologies and current political systems, arguing that a massive reduction of greenhouse emissions may offer a best chance for correcting problems.

'Impassioned, hugely informative, wonderfully controversial, and scary as hell' John le Carré Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed. 'Packed with thinking dynamite ... a book to be read everywhere' John Berger 'If you only read one non-fiction book this year, make it this one' Metro Books of the Year 'There are a few books that really help us understand the present. The Shock Doctrine is one of those books' John Gray, Guardian 'A brilliant book written with a perfectly distilled anger, channelled through hard fact. She has indeed surpassed No Logo' Independent

THE SUNDAY TIMES BESTSELLER 'Everyone should read this book' MATT HAIG 'One of the most inspiring books I have ever read' YUVAL NOAH HARARI 'Inspirational, compassionate and clear. The time to read this is NOW' MARK RUFFALO 'Figueres and Rivett-Carnac dare to tell us how our response can create a better, fairer world' NAOMI KLEIN \*\*\*\*\* Discover why there's hope for the planet and how we can each make a difference in the climate crisis, starting today. Humanity is not doomed, and we can and will survive. The future is ours to create: it will be shaped by who we choose to be in the coming years. The coming decade is a turning point - it is time to turn from indifference or despair and towards a stubborn, determined optimism. *The Future We Choose* is a passionate call to arms from former UN Executive Secretary for Climate Change, Christiana Figueres, and Tom Rivett-Carnac, senior political strategist for the Paris Agreement. Practical, optimistic and empowering, *The Future We Choose* shows us steps we can all take to renew our planet and create a better world beyond the climate crisis: today, tomorrow, this year and in the coming decade. The time to act is now. This book will change the way you see the world, and your place in it.

Climate change is profoundly altering our world in ways that pose major risks to human societies and natural systems. We have entered the Climate Casino and are rolling the global-warming dice, warns economist William Nordhaus. But there is still time to turn around and walk back out of the casino, and in this essential book the author explains how. Bringing together all the important issues surrounding the climate debate, Nordhaus describes the science, economics, and politics involved—and the steps necessary to reduce the perils of global warming. Using language accessible to any concerned citizen and taking care to present different points of view fairly, he discusses the problem from start to finish: from the beginning, where warming originates in our personal energy use, to the end, where societies employ regulations or taxes or subsidies to slow the emissions of gases responsible for climate change. Nordhaus offers a new analysis of why earlier policies, such as the Kyoto Protocol, failed to slow carbon dioxide emissions, how new approaches can succeed, and which policy tools will most effectively reduce emissions. In short, he clarifies a defining problem of our times and lays out the next critical steps for slowing the trajectory of global warming.

An eye-opening and vital account of the future of our earth and our civilisation if current rates of global warming persist, by the highly acclaimed author of 'High Tide'.

*How Bad Are Bananas?* was a groundbreaking book when first published in 2009, when most of us were hearing the phrase 'carbon footprint' for the first time. Mike Berners-Lee set out to inform us what was important (aviation, heating, swimming pools) and what made very little difference (bananas, naturally packaged, are good!). This new edition updates all the figures (from data centres to hosting a World Cup) and introduces many areas that have become a regular part of modern life - Twitter, the Cloud, Bitcoin, electric bikes and cars, even space tourism. Berners-Lee runs a considered eye over each area and gives us the figures to manage and reduce our own carbon footprint, as well as to lobby our companies, businesses and government.

His findings, presented in clear and even entertaining prose, are often surprising. And they are essential if we are to address climate change.

The U.S. scientific community has long led the world in research on such areas as public health, environmental science, and issues affecting quality of life. These scientists have produced landmark studies on the dangers of DDT, tobacco smoke, acid rain, and global warming. But at the same time, a small yet potent subset of this community leads the world in vehement denial of these dangers. *Merchants of Doubt* tells the story of how a loose-knit group of high-level scientists and scientific advisers, with deep connections in politics and industry, ran effective campaigns to mislead the public and deny well-established scientific knowledge over four decades. Remarkably, the same individuals surface repeatedly—some of the same figures who have claimed that the science of global warming is "not settled" denied the truth of studies linking smoking to lung cancer, coal smoke to acid rain, and CFCs to the ozone hole. "Doubt is our product," wrote one tobacco executive. These "experts" supplied it. Naomi Oreskes and Erik M. Conway, historians of science, roll back the rug on this dark corner of the American scientific community, showing how ideology and corporate interests, aided by a too-compliant media, have skewed public understanding of some of the most pressing issues of our era.

In this highly acclaimed, provocative book, Robert Kuttner disputes the laissez-faire direction of both economic theory and practice that has been gaining in prominence since the mid-1970s. Dissenting voices, Kuttner argues, have been drowned out by a stream of circular arguments and complex mathematical models that ignore real-world conditions and disregard values that can't easily be turned into commodities. With its brilliant explanation of how some sectors of the economy require a blend of market, regulation, and social outlay, and a new preface addressing the current global economic crisis, Kuttner's study will play an important role in policy-making for the twenty-first century. "The best survey of the limits of free markets that we have. . . . A much needed plea for pragmatism: Take from free markets what is good and do not hesitate to recognize what is bad."—Jeff Madrick, *Los Angeles Times* "It ought to be compulsory reading for all politicians—fortunately for them and us, it is an elegant read."—*The Economist* "Demonstrating an impressive mastery of a vast range of material, Mr. Kuttner lays out the case for the market's insufficiency in field after field: employment, medicine, banking, securities, telecommunications, electric power."—Nicholas Lemann, *New York Times Book Review* "A powerful empirical broadside. One by one, he lays on cases where governments have outdone markets, or at least performed well."—Michael Hirsh, *Newsweek* "To understand the economic policy debates that will take place in the next few years, you can't do better than to read this book."—Suzanne Garment, *Washington Post Book World*

A call for the Left and Right — the business community and environmentalists, bankers and activists — to join together, reclaim capitalism, and force profits to align with the planet A warming climate and a general distrust of Wall Street has opened a new cultural divide among those who otherwise agree we must mitigate climate risk: anti-market critics such as Naomi Klein target capitalism itself as a root cause of climate change while climate-savvy business leaders believe we can largely continue with business as usual by tinkering around the edges of our economic system. Rand argues that both sides in this emerging cultural war are ill-equipped to provide solutions to the climate crisis, and each is remarkably naïve in their view of capitalism. On one hand, we cannot possibly transition off fossil fuels without the financial might and entrepreneurial talent market forces alone can unlock. On the other, without radical changes to the way markets operate, capitalism will take us right off the climate cliff. Rejecting the old Left/Right ideologies, Rand develops a more pragmatic view capable of delivering practical solutions to this critical problem. A renewed capitalism harnessed to the task is the only way we might replace fossil fuels fast enough to mitigate severe climate risk. If we leave our dogma at the door, Rand argues, we might just build an economy that survives the century.

Workplace training and education have increasingly been seen as pivotal factors in improving the abilities, skills and competitiveness of industry, and the aim of the Management Charter Initiative (MCI), was to improve managers' practical competency in line with this. Under the MCI, qualification was gained by proving managerial competence in work related tasks, rather than by studying for a theoretical, educational qualification such as an MBA or degree. This book provides a welcome and comprehensive analysis of the MCI within the context of modern management development. It emphasizes the benefits of linking management development with organizational strategy, and includes: \* up-to-date analysis of how management development can be measured \* the first comprehensive assessment of the impact of using Management Standards \* practical illustrations with sixteen in-depth case studies of contemporary organizations. This revealing book is endorsed by the MCI and includes a foreword by Professor Tom Cannon, whose leadership spearheaded and developed the MCI itself.

What is the Green New Deal and how can we afford it? To protect the future of life on earth, we need to do more than just reimagine the economy--we have to change everything. One of the seminal thinkers of the program that helped ignite the US Green New Deal campaign, Ann Pettifor explains how we can afford what we can do, and what we need to do, before it is too late. *The Case for the Green New Deal* argues that economic change is wholly possible, based on the understanding that finance, the economy and the ecosystem are all tightly bound together. The GND demands total decarbonization and a commitment to an economy based on fairness and social justice. It proposes a radical new understanding of the international monetary system. Pettifor offers a roadmap for financial reform both nationally and globally, taking the economy back from the 1%. This is a radical, urgent manifesto that we must act on now.

The Black Power movement has often been portrayed in history and popular culture as the quintessential "bad boy" of modern black movement-making in America. Yet this impression misses the full extent of Black Power's contributions to U.S. society, especially in regard to black professionals in social work. Relying on extensive archival research and oral history interviews, Joyce M. Bell follows two groups of black social workers in the 1960s and 1970s as they mobilized Black Power ideas, strategies, and tactics to change their national professional associations.

Comparing black dissenters within the National Federation of Settlements (NFS), who fought for concessions from within their organization, and those within the National Conference on Social Welfare (NCSW), who ultimately adopted a separatist strategy, she shows how the Black Power influence was central to the creation and rise of black professional associations. She also provides a nuanced approach to studying race-based movements and offers a framework for understanding the role of social movements in shaping the non-state organizations of civil society.

Fearless necessary reporting . . . Klein exposes the 'battle of utopias' that is currently unfolding in storm-ravaged Puerto Rico" (Junot Díaz, author of *The Brief Wondrous Life of Oscar Wao*) "We are in a fight for our lives. Hurricanes Irma and María unmasked the colonialism we face in Puerto Rico, and the inequality it fosters, creating a fierce humanitarian crisis. Now we must find a path forward to equality and sustainability, a path driven by communities, not investors. And this book explains, with careful and unbiased reporting, only the efforts of our community activists can answer the paramount question: What type of society do we want to become and who is Puerto Rico for?" —Carmen Yulín Cruz, Mayor of San Juan, Puerto Rico In the rubble of

Hurricane Maria, Puerto Ricans and ultrarich “Puertopians” are locked in a pitched struggle over how to remake the island. In this vital and startling investigation, bestselling author and activist Naomi Klein uncovers how the forces of shock politics and disaster capitalism seek to undermine the nation’s radical, resilient vision for a “just recovery.” All royalties from the sale of this book in English and Spanish go directly to JunteGente, a gathering of Puerto Rican organizations resisting disaster capitalism and advancing a fair and healthy recovery for their island. “Klein chronicles the extraordinary grassroots resistance by the Puerto Rican people against neoliberal privatization and Wall Street greed in the aftermath of the island’s financial meltdown, of hurricane devastation, and of Washington’s imposition of an outside control board over the most important U.S. colony.” —Juan González, cohost of Democracy Now! and author of *Harvest of Empire: A History of Latinos in America*

This Changes Everything Capitalism Vs. The Climate Simon and Schuster

WINNER 2014 – Hilary Weston Writers’ Trust Prize for Non-Fiction Forget everything you think you know about global warming. The really inconvenient truth is that it’s not about carbon—it’s about capitalism. The convenient truth is that we can seize this existential crisis to transform our failed system and build something radically better. In her most provocative book yet, Naomi Klein, author of the global bestsellers *The Shock Doctrine* and *No Logo*, tackles the most profound threat humanity has ever faced: the war our economic model is waging against life on earth. Klein exposes the myths that are clouding the climate debate. We have been told the market will save us, when in fact the addiction to profit and growth is digging us in deeper every day. We have been told it’s impossible to get off fossil fuels when in fact we know exactly how to do it—it just requires breaking every rule in the “free-market” playbook: reining in corporate power, rebuilding local economies and reclaiming our democracies. We have also been told that humanity is too greedy and selfish to rise to this challenge. In fact, all around the world, the fight back is already succeeding in ways both surprising and inspiring. Climate change, Klein argues, is a civilizational wake-up call, a powerful message delivered in the language of fires, floods, storms and droughts. Confronting it is no longer about changing the light bulbs. It’s about changing the world—before the world changes so drastically that no one is safe. Either we leap—or we sink. Once a decade, Naomi Klein writes a book that redefines its era. *No Logo* did so for globalization. *The Shock Doctrine* changed the way we think about austerity. *This Changes Everything* is about to upend the debate about the stormy era already upon us.

The book could be considered a portrait, or rather the underlying negative, of the planet’s torrid time between the Seattle summit and the world-changing events of 11 September 2001.

This book is a fascinating account of the financial disaster which overtook Southeast Asia in 1997. The author explains the causes, events, reactions, and effects of the Asian currency crisis. Starting with the crash of the Thai baht, Professor Tan traces the chain of events and details the economic, social and political consequences in the countries involved, plus the responses of the major economic institutions like the World Bank and IMF are described. He also includes a chapter on the Asian economic miracle in the years before the crash, and asks whether that sort of growth is sustainable anyway. The final chapters deal with the lessons to be learned and the possible paths to recovery. This book is essential reading for anyone in the fields of finance, economics, or politics, but it is also interesting and accessible to the lay reader with an interest in world economies.

Climate change: watershed or endgame? In this compelling new book, Noam Chomsky, the world’s leading public intellectual, and Robert Pollin, a renowned progressive economist, map out the catastrophic consequences of unchecked climate change—and present a realistic blueprint for change: the Green New Deal. Together, Chomsky and Pollin show how the forecasts for a hotter planet strain the imagination: vast stretches of the Earth will become uninhabitable, plagued by extreme weather, drought, rising seas, and crop failure. Arguing against the misplaced fear of economic disaster and unemployment arising from the transition to a green economy, they show how this bogus concern encourages climate denialism. Humanity must stop burning fossil fuels within the next thirty years and do so in a way that improves living standards and opportunities for working people. This is the goal of the Green New Deal and, as the authors make clear, it is entirely feasible. Climate change is an emergency that cannot be ignored. This book shows how it can be overcome both politically and economically.

Mark McCormack, dubbed 'the most powerful man in sport', founded IMG (International Management Group) on a handshake. It was the first and is the most successful sports management company in the world, becoming a multi-million dollar, worldwide corporation whose activities in the business and marketing spheres are so diverse as to defy classification. Here, Mark McCormack reveals the secret of his success to key business issues such as analysing yourself and others, sales, negotiation, time management, decision-making and communication. *What They Don't Teach You at Harvard Business School* fills the gaps between a business school education and the street knowledge that comes from the day-to-day experience of running a business and managing people. It shares the business skills, techniques and wisdom gleaned from twenty-five years of experience.

The best-selling author of *The Shock Doctor* explains why the environmental crisis challenges us to abandon "free market" ideologies and remake political systems, arguing that a massive reduction of greenhouse emissions may offer a best chance for correcting economic challenges. 150,000 first printing.

The International Bestseller 'With clarity and compassion, DiAngelo allows us to understand racism as a practice not restricted to "bad people." In doing so, she moves our national discussions forward. This is a necessary book for all people invested in societal change' Claudia Rankine Anger. Fear. Guilt. Denial. Silence. These are the ways in which ordinary white people react when it is pointed out to them that they have done or said something that has - unintentionally - caused racial offence or hurt. After, all, a racist is the worst thing a person can be, right? But these reactions only serve to silence people of colour, who cannot give honest feedback to 'liberal' white people lest they provoke a dangerous emotional reaction. Robin DiAngelo coined the term 'White Fragility' in 2011 to describe this process and is here to show us how it serves to uphold the system of white supremacy. Using knowledge and insight gained over decades of running racial awareness workshops and working on this idea as a Professor of Whiteness Studies, she shows us how we can start having more honest conversations, listen to each other better and react to feedback with grace and humility. It is not enough to simply hold abstract progressive views and condemn the obvious racists on social media - change starts with us all at a practical, granular level, and it is time for all white people to take responsibility for relinquishing their own racial supremacy. 'By turns mordant and then inspirational, an argument that powerful forces and tragic histories stack the deck fully against racial justice alongside one that we need only to be clearer, try harder, and do better' David Roediger, *Los Angeles Review of Books* 'The value in *White Fragility* lies in its methodical, irrefutable exposure of racism in thought and action, and its call for humility and vigilance' Katy Waldman, *New Yorker* 'A vital, necessary, and beautiful

book' Michael Eric Dyson

Reproduction of the original: The Miner's Friend by Thomas Savery

Shows readers how we can all help solve the climate crisis by focusing on a few key, achievable actions.

The most authoritative book yet about climate change for teenagers, written by internationally bestselling expert Naomi Klein. Warming seas. Superstorms. Fires in the Amazon. The effects of climate change are all around us. Reforestation. School-strikes for climate change. Young people are saving the world and you can join them because you deserve better. Are you ready to change everything? Forget everything you think you know about climate change. This book explains why the planet desperately needs our help and how you can use your power to change the world through climate activism. Klein presents her urgent message about saving the environment by asking three simple questions: Where are we? How did we get here? What happens next? From the Great Barrier Reef to Hurricane Katrina to school environmental policies to Greta Thunberg - climate change impacts every aspect of the world you live in and you have the power to lead the way by enacting change. Internationally bestselling author of The Shock Doctrine, Naomi Klein, with award-winning children's science writer Rebecca Stefoff, gives a powerful picture of why and how the planet is changing, providing effective tools for action so that YOU really can make a difference. Includes notes on the COVID-19 pandemic, 2020, and how you can get involved to make the world a safer and better place.

The definitive guide to a new generation of natural beauty, skincare and makeup. The perfect Christmas gift for all beauty lovers. This honest, expert book will teach you how to recognise what your skin needs and how to buy the best products for you. It offers both time-honoured and modern techniques, tips and guidance for all ages, and showcases the powerful natural ingredients and brands that all beauty lovers should know about. 'Imelda and her team have been teaching their customers, including me, about the best botanical brands out there for years. Now all their experience is bound together in this wonderful beauty guide.' Melissa Hemsley 'Imelda is the go-to person for natural beauty in London, I've learnt so much from her and her team' Ella Mills, Delicious Ella 'I can't put this book down #bestbeautytips' Tata Harper

Essays that address the question: how can people and class agency change this destructive course of history? Capitalism's addiction to fossil fuels is heating our planet at a pace and scale never before experienced. Extreme weather patterns, rising sea levels and accelerating feedback loops are a commonplace feature of our lives. The number of environmental refugees is increasing and several island states and low-lying countries are becoming vulnerable. Corporate-induced climate change has set us on an ecocidal path of species extinction. Governments and their international platforms such as the Paris Climate Agreement deliver too little, too late. Most states, including South Africa, continue on their carbon-intensive energy paths, with devastating results. Political leaders across the world are failing to provide systemic solutions to the climate crisis. This is the context in which we must ask ourselves: how can people and class agency change this destructive course of history? Volume three in the Democratic Marxism series, The Climate Crisis investigates eco-socialist alternatives that are emerging. It presents the thinking of leading climate justice activists, campaigners and social movements advancing systemic alternatives and developing bottom-up, just transitions to sustain life. Through a combination of theoretical and empirical work, the authors collectively examine the challenges and opportunities inherent in the current moment. This volume builds on the class-struggle focus of Volume 2 by placing ecological issues at the centre of democratic Marxism. Most importantly, it explores ways to renew historical socialism with democratic, eco-socialist alternatives to meet current challenges in South Africa and the world.

The "courageous and clarion" Booker Prize-winner "continues her analysis and documentation of the disastrous consequences of unchecked global capitalism" (Booklist). From the poisoned rivers, barren wells, and clear-cut forests, to the hundreds of thousands of farmers who have committed suicide to escape punishing debt, to the hundreds of millions of people who live on less than two dollars a day, there are ghosts nearly everywhere you look in India. India is a nation of 1.2 billion, but the country's one hundred richest people own assets equivalent to one-fourth of India's gross domestic product. Capitalism: A Ghost Story examines the dark side of democracy in contemporary India and shows how the demands of globalized capitalism have subjugated billions of people to the highest and most intense forms of racism and exploitation. "A highly readable and characteristically trenchant mapping of early-twenty-first-century India's impassioned love affair with money, technology, weaponry and the 'privatization of everything,' and—because these must not be impeded no matter what—generous doses of state violence." —The Nation "A vehement broadside against capitalism in general and American cultural imperialism in particular . . . an impassioned manifesto." —Kirkus Reviews "Roy's central concern is the effect on her own country, and she shows how Indian politics have taken on the same model, leading to the ghosts of her book's title: 250,000 farmers have committed suicide, 800 million impoverished and dispossessed Indians, environmental destruction, colonial-like rule in Kashmir, and brutal treatment of activists and journalists. In this dark tale, Roy gives rays of hope that illuminate cracks in the nightmare she evokes." —Publishers Weekly

This book intends to be an alert to the fact that the curve measuring environmental costs against the economic benefits of capitalism has irreversibly entered into a negative phase. The prospect of an environmental collapse has been evidenced by the sciences and the humanities since the 1960s. Today, it imposes its urgency. This collapse differs from past civilizations in that it is neither local nor just civilizational. It is global and occurs at the broadest level of the biosphere, accelerated by the convergence of different socio-environmental crises, such as: Earth energy imbalance, climate change and global warming Sea-level rise Decrease and degradation of forests Collapse of terrestrial and aquatic biodiversity Floods, droughts, wildfires, and extreme weather events Degradation of soils and water resources Increase in pollution caused by fossil fuels and coal Increase in waste production and industrial intoxication The book is divided in two parts. In the first part it presents a comprehensive review of scientific data to show the already visible effects of each of the different environmental crises and its consequences to human life on Earth. In the second part, Luiz Marques critically discusses what he calls the three concentric illusions that prevent us from realizing the gravity of the current socio-environmental crises: the illusion of a sustainable capitalism, the illusion that economic growth is still capable of providing more well-being and the anthropocentric illusion. Finally, Marques argues that "fitting" back into the biosphere will only be possible if we dismantle the expansive socioeconomic gear that has shaped our societies since the 16th century by moving from a Social Contract to a Natural Contract, which takes into account the whole biosphere. According to him, the future society will be post-capitalist or it will not be a complex society, and even perhaps, we must fear, no society at all. "This book is backed up with the latest and best science and has made the complexities understandable for the average reader, all in a context of hope for the future." - William J. Ripple, PhD, Distinguished Professor of Ecology, Director of the Alliance of World Scientists, Oregon State University

**\*\*The New York Times and Sunday Times Bestseller\*\*** 'An ordinary person's guide to hope. Read this book' Arundhati Roy 'As accessible as it is brilliant' Owen Jones 'A genuine page turner' Michelle Alexander Naomi Klein - award-winning journalist, bestselling author of No Logo, The Shock Doctrine and This Changes Everything, scourge of brand bullies and corporate liars - gives us the toolkit we need to survive our surreal, shocking age. 'This is a look at how we arrived at this surreal political moment, how to keep it from getting a lot worse, and how, if we keep our heads, we can flip the script.' Remember when love was supposed to Trump hate? Remember when the oil companies and bankers seemed to be running scared? What the hell happened? And what can we do about it? Naomi Klein shows us how we got here, and how we can make things better. No Is Not Enough reveals, among other things, that the disorientation we're feeling is deliberate. That around the world, shock political tactics are being used to generate crisis after crisis, designed to force through policies that will destroy people, the environment, the economy and our security. That extremism isn't a freak event - it's a toxic cocktail of our times.

From how to trash the Trump megabrand to the art of reclaiming the populist argument, Naomi Klein shows all of us how we can break the spell and win the world we need. Don't let them get away with it. 'Who better than Naomi to make sense of this madness, and help us find a way out? A top-of-the-stack must read' Michael Stipe 'Naomi Klein's new book incites us brilliantly to interweave our No with a programmatic Yes. A manual for emancipation' Yanis Varoufakis 'Magnificent ... a courageous coruscating counterspell' Junot Díaz
