

Trucks Machines On The Move

It can drive off road. It can tow big trailers. This pickup truck is on the move! How do people use pickup trucks? And how do drivers control them? Read this book to find out! Learn all about mighty machines in the Vroom-Vroom series—part of the Lightning Bolt Books™ collection. With high-energy designs, exciting photos, and fun text, Lightning Bolt Books™ bring nonfiction topics to life!

Photographs and text examine the parts and functions of such large machines as trucks, jets, supertankers, tractors, bulldozers, and fire engines.

What a big idea! And what big fun: A whopping oversize book of interactive paper models to appeal to every kid who loves big machines—which pretty much covers all of them. These are the coolest big machines that kids love—each re-created in an oversize paper model that, once built, really moves. The book has everything the reader needs to pop out, fold, and create a full-color model of ten big machines: a dump truck, space shuttle, excavator, ladder truck, front loader, concrete mixer, steam locomotive, steamboat, dirigible, Chinook helicopter. Created by Phil Conigliaro, a gifted paper engineer and artist, the models are printed on sturdy card stock; perforated to pop out and fold; require only gluing (no tape or pins); and come with complete, easy-to-follow step-by-step instructions. And, worth repeating, each one moves: Wheels roll and the mixer turns, helicopter blades spin, and the excavator's boom and bucket raises and lowers.

Additionally there's the story of each machine—how it works, who invented it, what it's used for. Kids will learn the history of the steam shovel—the smoking, hissing monster that dug the Panama Canal, the largest engineering feat of the 20th century; how astronauts in a space shuttle could withstand the 3,000 degrees of heat created when it returned to Earth; how the world's largest dump truck can haul a million pounds. It's big stuff!

Early childhood educators around the world use this best seller to plan daily curriculum and classroom activities. The book contains 76 different themes ranging from Ants to Zoo Animals, presented in alphabetical order. Content for each theme includes the following sections: Curriculum Flowchart, Theme Goals, Concepts for Children to Learn, Vocabulary, Bulletin Board Ideas, Sample Parent Letter, Arts and Crafts, Cooking, Dramatic Play, Field Trips, Fingerplays/Chants, Group Time, Science, Math, Sensory, Large Motor, Fine Motor, Social Studies, Books, Recordings and Song Titles, and Technology/Multimedia Resources. The updated book sections for each theme include hundreds of new children's literature references with a special emphasis on multicultural selections. In addition, the new Sixth Edition includes a brand new four-color insert on Using the Digital Camera in the Early Childhood Classroom. The text is accompanied by a companion website that contains important assessment tools, lesson plan forms, rainy day activities, developmental checklists, classroom artifacts, and much more. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
