Tackles one of the most enduring and contentious issues of positive political economy: common pool resource management.

This book, comprising the Instructional Course Lectures delivered at the 19th ESSKA Congress in Milan in 2021, provides an excellent update on current scientific and clinical knowledge in the field of orthopaedics and sports traumatology. It addresses a variety of interesting and controversial topics relating to the shoulder, elbow, hip, knee and foot, all of which are highly relevant to orthopaedic surgeons' daily practice. Featuring contributions written by leading experts from around the globe, it enables readers to gain a better understanding of pathologies, which in turn can lead to more individualized treatments for patients. The book is of interest to clinicians and researchers alike.

In today's globalized world, traditions of a national Self and a national Other no longer hold. This timely volume considers the stakes in our changing definitions of national boundaries in light of the unmistakable transformation of German and Dutch societies. Examining how the literature of migration intervenes in public discourses on multiculturalism and including detailed analysis of works by the Turkish-German writers Emine Sevgi Özdamar and Feridun Zaimoglu and the Moroccan-Dutch writers Abdelkader Benali and Hafid Bouazza, *New Germans, New Dutch* offers crucial insights into the ways in which literature negotiates both difference and the national context of its writing.

Although the balance sheet may not even put a value on it, a company's brand or its portfolio of brands is in many cases its most valuable asset, accounting for as much as 70% of a firm's market value in some cases. This book argues that because of this and because of the power of not-for-profit brands like Oxfam, all organisations should make the brand their central organising principle, guiding every action and decision. Divided into three parts and written by eighteen experts on the subject, this fully revised and updated guide to brands and branding examines the case for brands, outlines best practice and the future for brands. It includes chapters on brand valuation, what makes a brand great, brand strategy, brand experience, visual and verbal identity, brand communications, brand protection and new chapters on branding in India and brands in a digital world.

Interpersonal trauma is ubiquitous and its impact on health has long been understood. Recently, however, the critical importance of this issue has been magnified in the public eye. A burgeoning literature has demonstrated the impact of traumatic experiences on mental and physical health, and many potential interventions have been proposed. This volume serves as a detailed, practical guide to trauma-informed care. Chapters provide guidance to both healthcare providers and organizations on strategies for adopting, implementing and sustaining principles of trauma-informed care. The first section maps out the scope of the problem and defines specific types of interpersonal trauma. The authors then turn to discussion of adaptations to care for special populations, including sexual and gender minority persons, immigrants, male survivors and Veterans as these groups often require more nuanced approaches. Caring for trauma-exposed patients can place a strain on clinicians, and approaches for fostering resilience and promoting wellness among staff are presented next. Finally, the book covers concrete trauma-informed clinical strategies in adult and pediatric primary care, and women's health/maternity care settings. Using a case-based approach, the expert authors provide real-world front line examples of the impact trauma-informed clinical approaches have on patients' quality of life, sense of comfort, and trust. Case examples are discussed along with evidence based approaches that demonstrate improved health outcomes. Written by experts in the field, *Trauma-Informed Healthcare Approaches* is the definitive resource for improving quality care for patients who have experienced trauma.

The 1999 International Workshop on Interactive Distributed Multimedia Systems and Telecommunication Services (IDMS) in Toulouse is the sixth in a series that started in 1992. The previous workshops were held in Stuttgart in 1992, Hamburg in 1994, Berlin in 1996, Darmstadt in 1997, and Oslo in 1998. The area of interest of IDMS ranges from basic system technologies, such as networking and operating system support, to all kinds of teleservices and distributed multimedia applications. Technical solutions for telecommunications and distributed multimedia systems are merging and quality-of-service (QoS) will play a key role in both areas. However, the range from basic system technologies to distributed multimedia applications and teleservices is still very broad and we have to understand the implications of multimedia applications and their requirements for middleware and networks. We are challenged to develop new and more fitting solutions for all distributed multimedia systems and telecommunication services to meet the requirements of the future information society.

Originating in India, the Gypsies arrived in Europe around the 14th century, spreading not only across the entirety of the continent but also immigrating to the Americas. The first Gypsy migration included farmworkers, blacksmiths, and mercenary soldiers, as well as musicians, fortune-tellers, and entertainers. At first, they were generally welcome as an interesting diversion to the dull routine of that period. Soon, however, they attracted the antagonism of the governing powers, as they have continually done throughout the following centuries. The second edition of the *Historical Dictionary of the Gypsies (Romanies)* seeks to end such prejudice by clarifying the facts about this nomadic people. Through a list of acronyms, a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on significant persons, places, events,

institutions, and aspects of culture, society, economy, and politics, the history of the Gypsies and their culture is told.

Draws on the collective experiences and insights of many individuals, and in particular from the implementation of the WHO Multi-country Study on Women's Health and Domestic Violence against Women in over 10 countries. Twenty years ago, violence against women was not considered an issue worthy of international concern. Gradually, violence against women has come to be recognized as a legitimate human rights issue and as a significant threat to women's health and well-being. Now that international attention is focused on gender-based violence, methodologically rigorous research is needed to guide the formulation and implementation of effective interventions, policies, and prevention strategies. The manual has been developed in response to the growing need to improve the quality, quantity, and comparability of international data on physical and sexual abuse. It outlines some of the methodological and ethical challenges of conducting research on violence against women and describes a range of innovative techniques that have been used to address these challenges.

A wonderful work, addressed to scientists but deserving of a wider audience. A personal, purposeful, and passionate exposition about the subjective process that accompanies discovery--and how to choose a discovery-laden topic for research, how to find opportunities in science overlooked by others, and how to break out of the rut of mundane thinking. The Internet has become one of the most efficient and useful ways to obtain information on a particular subject. Geography Resources in the Electronic Age provides basic information on how to navigate the Web and helps students to quickly identify the appropriate geography resources. Approximately 500 reliable sites listed alphabetically by topic are reviewed. Each site review provides details about the best (and worst) features, specific grade range, and how to use the site for research. Geography Resources in the Electronic Age saves students, teachers, and librarians time in finding the Web's best geography resources. Topics are chosen based on the national geography curriculum, and the Web sites are reviewed by a geographer. Expanded coverage offers information specifically for educators, resources for special needs students, a list of museum and organization Web sites, and information on careers in geography.

Our knowledge of the cognitive and social-emotional functioning of developmentally disabled infants and preschoolers derives, in large part, from our assessment of such children. This book has been developed to familiarize readers with the characteristics of developmentally disabled children, and to introduce to readers aspects of measurement that are of relevance to the assessment of atypical infants and preschoolers. The book has been developed with clinicians and prospective clinicians in mind. These are individuals who are committed to the care and education of developmentally disabled infants and preschoolers and the families of those children. The book has thus been written to provide support for the use of assessment data in planning early intervention programs. Of special note in the development of this edited book is that it is divided into four major parts with interrelated chapters in each part. The authors of chapters in Parts II and III had access to the chapters in Part I before writing their chapters.

The summary chapters found in Part IV were similarly written by authors having access to all chapters in Parts I-III. This approach to the development of an edited book was chosen as a way of ensuring an integration of major concepts throughout the book. This process is also a reflection of our belief that assessment is an interdisciplinary process, involving the synthesis of a number of diverse interests.

Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

'What's better than a good crime novel? I'll tell you - a spoof crime novel, by the absurdly funny and clever Fergus Craig' MIRANDA HART 'We all need more laughs like this' AISLING BEA Inspired by the smash hit Twitter videos, Once Upon a Crime is a hilarious, ridiculous, gripping comic crime novel to make every reader's life better. Exeter: a city in decline, East Devon's capital of crime. Detective Roger LeCarre: a man on a quest to rid the world of crime (starting with Devon and Cornwall and then working outwards) so he can concentrate on his watercolours. LeCarre runs 10km a day but probably burns

more calories shaking his head at what has become of his city. Now Exeter is set to become the UK Capital of Culture and the ambitious Lord Mayor wants to turn things around. But when a young man's (dead) body is found in the centre of town, things get murky. Detective Roger LeCarre is a character never seen before in modern fiction - a tough but troubled detective with a drink problem and a marriage in trouble. Can he find out who killed the young man, save the city and change his energy provider before the new more expensive tariff kicks in? Filled with drama, eroticism and very specific Wikipedia-sourced information on Devon, *Once Upon A Crime* is a thriller which demands to be read.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. *The Car Hacker's Handbook* will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, *The Car Hacker's Handbook* will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make *The Car Hacker's Handbook* your first stop.

The unpredictable counterinsurgency environment challenges centralized, quantitative campaign assessment. A comprehensive examination of the centralized, quantitative approach to assessment, as described in the literature and doctrine and applied in two primary case studies (Vietnam and Afghanistan), reveals weaknesses and gaps and proposes an alternative process: contextual assessment. Asia's premier business magazine. The magazine reports on politics, business, economics, technology and social and cultural issues throughout Asia, with a particular emphasis on both Southeast Asia and China.

'Impassioned, hugely informative, wonderfully controversial, and scary as hell' John le Carré Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed. 'Packed with thinking dynamite ... a book to be read everywhere' John Berger 'If you only read one non-fiction book this year, make it this one' Metro Books of the Year 'There are a few books that really help us understand the present. The Shock Doctrine is one of those books' John Gray, Guardian 'A brilliant book written with a perfectly distilled anger, channelled through hard fact. She has indeed surpassed No Logo' Independent

Security force assistance (SFA) is a central pillar of the counterinsurgency campaign being waged by U.S. and coalition forces in Afghanistan. This monograph analyzes SFA efforts in Afghanistan over time, documents U.S. and international approaches to building the Afghan force from 2001 to 2009, and provides observations and recommendations that emerged from extensive fieldwork in Afghanistan in 2009 and their implications for the U.S. Army.

Lively and well-researched history of the English privateers of the Elizabethan age, now available in paperback.

The chapters of this book explore, from different disciplinary perspectives, the relationship between transitional justice, distributive justice, and economic efficiency in the settlement of internal armed conflicts. They specifically discuss the role of land reform as an instrument of these goals, and examine how the balance between different perspectives has been attempted (or not) in selected cases of internal armed conflicts, and how it should be attempted in principle. Although most chapters closely examine the Colombian case, some provide a comparative perspective that includes countries in Latin America, Africa, and Eastern Europe, while others examine some of the more general, theoretical issues involved.

NO.1 INTERNATIONAL BESTSELLER One of the most influential books of the 21st century *Fully revised and updated from cover to cover* Since the original publication of *Nudge* more than a decade ago, the word has entered the vocabulary of businesspeople, policy makers, engaged citizens and consumers everywhere. The book has given rise to hundreds of "nudge units" in governments around the world and countless groups of behavioural scientists in every part of the economy. It has taught us how to use thoughtful choice architecture to help us make better decisions for ourselves, our families, and our society. Now, Richard Thaler and Cass Sunstein have updated the book, making use of their experiences in and out of government over the past dozen years as well as an explosion of new research. This final edition offers a wealth of new insights, for both its avowed fans and newcomers, about a wide range of issues that we face in our daily lives -- health, personal finance, climate change, and "sludge" (paperwork and other nuisances we don't want, and that keep us from getting what we do want) -- all while honouring one of the cardinal rules of nudging: make it fun!

In Kenya, cultural and natural heritage has a particular value. Its pre-historic heritage not only tells the story of man's origin and evolution but has also contributed to the understanding of the earth's history: fossils and artefacts spanning over 27 million years have been discovered and conserved by the National Museums of Kenya (NMK). Alongside this, the steady rise in the market value of African art has also affected Kenya. Demand for African tribal art has surpassed that for antiquities of Roman, Byzantine, and Egyptian origin, and in African countries currently experiencing conflicts, this activity invariably attracts looters, traffickers and criminal networks. This book brings together essays by heritage experts from different backgrounds, including conservation, heritage management, museum studies, archaeology, environment and social sciences, architecture and landscape, geography, philosophy and economics to explore three key themes: the underlying ethics, practices and legal issues of heritage conservation; the exploration of architectural and urban heritage of Nairobi; and the natural heritage, landscapes and sacred sites in relation to local Kenyan communities and tourism. It thus provides an overview of conservation practices in Kenya from 2000 to 2015 and highlights the role of natural and cultural heritage as a key factor of social-economic development, and as a potential instrument for conflict resolution

"This book contains authentic photographs and salient facts covering 358 troopships used in World War II. In addition, other vessels of miscellaneous character, including Victory and Liberty type temporary conversions for returning troops, are listed in the appendices ..."--Pref.
