International Standard ISO 792 replaces ISO Recommendation R 792:1968 drawn up by Technical Committee ISO/TC 79, Light metals and their alloys. The Member Bodies of the following countries approved the Recommendation : ... This International Standard specifies a photometric method for the determination of iron in magnesium and magnesium alloys.

ISO 792:1973(en), Magnesium and magnesium alloys ...

Magnesium is the second most prevalent electrolyte in the human body, meaning it's essential for all people with active lifestyles to maintain proper magnesium levels. It's normal to feel sore after working out and breaking down your muscles. However, leg cramps and chronic muscle soreness are often the sign of a magnesium deficiency.
